HUSSON COLLEGE DEGREES

Undergraduate

Since 1954, Husson College has conferred the baccalaureate degree in four major areas of business: Accounting, Business Administration, Business Teacher Education, and Office Administration. Each academic area has a variety of business programs open to a student's choice of concentration. In 1982 the College was authorized by the State Legislature to award the baccalaureate degree in Nursing.

The Associate in Science Degree, a two-year program, has been offered since 1965. The Associate in Science is given in the areas of Accounting, Business Administration, Office Administration, and Medical Assisting. A student receiving an A.S. degree may continue a program of study for a baccalaureate degree.

Students who maintain a 3.4 cumulative academic average or better throughout their enrollment at Husson are identified for achievement. DISTINCTION, HIGH DISTINCTION and HIGHEST DISTINCTION are the categories indicative of scholastic achievement.

Graduate

Husson College conferred its first Master of Science in Business degree at the eighty-first commencement.

Approval to offer a Master's degree was given by the State Legislature in 1977. Classes began in the summer of 1978.

The Master of Science degree at Husson College serves three distinct types of students: those with prior degrees in business, those who teach business at the high school level, and those with no prior education in business. With guidance from the faculty, the student selects a program of studies that is particularly suited to his or her own unique background and future goals.

Academic Dress

The use of caps and gowns and hoods as part of academic ceremonies began in Europe around the thirteenth century.

Today the regalia is much modified. The style of the gown, as well as the length of the hood, is indicative of the degree conferred: bachelor's, Master's, doctoral. The hood is lined with the official color of the institution conferring the degree. For Husson, the colors are green and white.

The velvet edging of the hoods varies in width according to the degree; the color, gold, indicative of science.

The cap or mortarboard is of similar material as the gown; the tassel, black or the color appropriate to the subject. Mortarboards worn with a doctoral gown and hood have a gold tassel.
