Graduation is always cause for celebration!

Husson Names Dean for School of Business

Husson College recently welcomed Dr. Jessica Reynolds Jenner as the founding dean of the School of Business at Husson.

As dean, Jenner will oversee the education of more than 1800 full- and part-time business and professional studies students studying at our Bangor campus and at our external sites in Portland, Lewiston and Caribou.

The Trustees selected Dr. Jenner for the new post from a pool of more than 100 candidates from around the country. The position was created as part of an administrative restructuring move at the college.

According to Husson President William H. Beardsley, Jenner joins us at Husson at a time when, contrary to national trends, the student enrollment is showing steady growth. While many institutions are eliminating faculty, Jenner will have the opportunity to appoint new faculty in the accounting, marketing and sports management programs, to meet the needs of the growing student population, Beardsley said.

Dr. Jessica Jenner

"Dr. Jenner is very familiar with graduate and undergraduate business education from accounting to sports management," Beardsley said. "She has extensive experience in collaboration between business and health institutions, and will bring a demonstrated interest and expertise in international business education. She also has sought and obtained substantial grant funding to initiate successful programs in those areas, which are so central to Husson's mission and strategic plan. I am very excited about what Dr. Jenner can bring to the college and the State of Maine."

For the past seven years, Jenner has headed the Department of Management at the College of St. Scholastica in Duluth, Minnesota, where she administered both undergraduate and graduate programs. During that time, she initiated a successful master's program at five off-campus sites, developed a strong focus on international management, administered the sports management program, and also administered nearly $1 million in foundation and government grants for departmental activities.

Jenner earned an undergraduate degree in industrial and labor relations from Cornell University and holds two master's degrees, as well as a Ph.D. in organizational psychology from Columbia University. She served as an assistant professor at Clark University and has published widely in her field. Jenner also has extensive experience as a consultant with banks, brokerage houses, manufacturers and hospitals.

Husson Expands School of Nursing and Health Professions

Health care: Who gets it and who pays for it?

Those are the questions that politicians in Washington will have to answer in the months ahead as they debate the merits of the various options for health care reform.

And while they discuss the issues, Husson College will make sure that there will be trained professionals ready to provide health care in Maine and around the country, regardless of which system is adopted. In keeping with that commitment, Husson's Board of Trustees recently approved the addition of Physical Therapy and Nurse Practitioner programs to the college's degree offerings.

"Health care is changing, the population is aging and cost-effective ambulatory care in rural communities is becoming more of a challenge," Husson President William H. Beardsley said. "Physical therapists and nurse practitioners are in growing demand. Profession-oriented education for careers in Maine is Husson's specialty, and we will be central in helping to meet that demand.

The Master of Science in Nursing will prepare family and community nurse practitioners, while the new physical therapy program will enable a high school graduate to complete a combined BS/MS degree in physical therapy in five years.

Husson President William H. Beardsley speaks to the media during a press conference at which he announced the establishment of the Physical Therapy and Nurse Practitioner programs at the college. Joining President Beardsley at the press conference were Dr. Elizabeth Burns, the dean of the School of Nursing and Health Professions, Dr. Jessica Jenner, the dean of the School of Business and Dr. Barbara Higgins, the director of the Nurse Practitioner program.

The addition of the two programs is the first expansion of the health professions offerings at Husson since the nursing program was established more than a decade ago, Beardsley noted. They will have a significant impact on the college and on health care education in the state.

"We are projecting enrollment growth of 280 students, 25 additional faculty and staff positions, and a $3 million annual increase in the operating budget," he said. " Added to the 50 percent increase in enrollment over the past decade, these new programs will continue the dramatic changes at the college."

Beardsley also noted that the college will invest $1 million in new labs and equipment for the new programs. The physical therapy program, particularly, will require additional space for classrooms and laboratories. The college plans to house the program in a portion of Bell Hall. Renovations have begun on sections of the building and will continue throughout the 1994-95 academic year. The first class of nurse practitioner students will begin classes this fall, utilizing existing classrooms and labs. Physical therapy classes will begin in the renovated Bell Hall in the fall of 1995.

The demand for physical therapists and nurse practitioners is growing throughout the state and the nation, according to Dr. Elizabeth Burns, the dean of Husson's School of Nursing and Health Professions. People are living longer, Burns said, and as the elderly population in America grows, there is a greater demand for specialists to provide the kinds of care older people need.

"There is a strong demand for additional physical therapy education providing opportunities for both high school graduates and people with baccalaureate degrees in other disciplines," Burns said. "Graduates are in short supply. Our goal is to establish a program that serves both Maine high school graduates and practicing physical therapists and to prepare them for badly-needed professional careers in Maine and around the country."

Beardsley added that the decision to institute the Physical Therapy program at the master's level would position the program and its graduates for the future.

"The master's level in Physical Therapy is considered to be the base level of the future," Beardsley said. "By bypassing some of the stages other colleges have gone through in this area, Husson can come in with a program that is in sync with the standards of the 21st Century."

The Nurse Practitioner program also looks ahead to the future of health care, according to Burns. As advanced practice nurses, they provide nursing and health care services to individuals, families and groups, emphasizing health promotion and disease prevention, as well as the diagnosis and management of acute and chronic diseases.

"As the country moves towards a health care system emphasizing increased access to health care, we anticipate that nurse practitioners will be delivering more and more primary health care services throughout the country, particularly in rural areas," Burns said. "Nurse practitioners are well-qualified to provide those types of services. Teaching and counselling are a major part of a nurse practitioner's activities."

Husson Associate Professor Dr. Barbara Higgins, who will be the director of the new Nurse Practitioner program, added that the demand exists for this program. Only 300 of Maine's 15,000 registered nurses are nurse practitioners, and surveys show that a high percentage of those nurses are interested in furthering their education.

"Combine this supply of potential graduate students with the expanding role seen for nurse practitioners in health care reform and the opportunities are impressive," Higgins said. "Our goal is to graduate our first MSN's before our College Centennial in 1998."

The new programs provide a natural step in the evolution of the School of Nursing and Health Professions, Beardsley said, adding that the programs will be equivalent to Husson's graduate program in business.

"Just as the MSB offers a continuation for students in the business program, the Physical Therapy and Nurse Practitioner programs will offer additional educational opportunities for our bachelor's degree students in health care," he said.

Beardsley added that although the programs are distinctive from the college's business programs, he anticipated a close association between the two schools.

"In the developing health care system, physical therapists and nurse practitioners will be providing services outside of the hospital, often working independently in small towns and rural areas," he said. "Some may be working in their own, private businesses. There will be a greater need for knowledge in the area of business. And it's very possible that a wedding of our business and health programs could develop."

Visit With The Deans

This spring, Husson College reorganized its administrative structure creating the School of Business and the School of Nursing and Health Professions, with deans overseeing each school.

The restructuring eliminates one layer of administration and establishes a "Dean's Council" which will guide the academic developement of the college. The Council consists of the deans of business, nursing and health professions and graduate studies, and the chair of the division of arts and sciences.

Dr. Jessica Reynolds Jenner has been appointed as the founding dean for the School of Business. Dr. Elizabeth Burns serves as the dean of the School of Nursing and Health Professions. Recently, the two deans discussed the restructuring and the programs offered in their respective schools.

What are the strengths of the existing program?

Jenner: Whenever someone new comes on board, there is the implication that things are not as good as they might be. That's not the case here. It appears to me, as a newcomer, that the hallmark of a Husson education is great thoroughness in preparing students for a variety of professional fields. Fundamentally, we're in good shape. Husson has a very strong existing business education base.

I think what is here for me to do is to provide some energy and be a systems person. Management education is a rapidly changing field all around the country. Husson needs to be changing along with other business schools.

Burns: One of the strengths of the nursing program is that it has remained small enough so that students still get personal attention, and the faculty is well prepared. A high percentage of the faculty members have completed doctoral education and have a strong clinical involvement in a variety of settings. I consider them Master teachers.

We have a strong curriculum that has offered students more clinical time than most programs. With hospitals down-sizing we need to refocus our curriculum on care in the community. Whatever new national health care plan is eventually adopted, we know that there will be more of a focus on prevention and wellness. Professionals with the kind of training we provide are well-positioned to care for a population in that particular area. We need to look at our curriculum and build in more knowledge and practice in community settings.

Why restructure? What are the effects and/or benefits of the new administrative structure?

Burns: The decision to restructure came from the President, but it is one which I support. The new administrative structure is one that will assist the deans in developing a clear working relationship in which we can focus on issues related to the growth and rejuvenation of the college. I value the ability to plan with the deans and to talk about those issues. That's different than it has been.

That, I think, is the major effect and benefit of the restructuring. It will provide more effective communications among the deans. We will no longer be separate entities with our own agendas. Husson's Business, Arts and Sciences, and Health administrators can bring their agendas and work together, supporting all the issues that strengthen the college.

Also, the new structure provides the deans with direct access to the President. Things can happen more quickly in this structure.

Jenner: Being a newcomer, I don't have a real basis for comparison. But I think the new lateral structure offers an opportunity to build strong, committed leadership for the college. The Dean's Council will provide a strong sense at the leadership level, that we are all here together. Yes, we have the School of Business and the School of Nursing and Health Professions, but we want to be a college at Husson. The Liberal Arts are essential to the success of the two professional schools. The exciting thing about Husson is that we have the chance to work together as partners, and, I think, the desire to do that. I sense that people really want to work together to do what is right for the college.

What does the future hold for Husson? Will there be any changes in curriculum or course offerings?

Jenner: I would like to see us integrate all components of the Business School; to make sure that our two- and four-year programs are very clearly articulated; and the different parts brought to work together--Professional Studies, Business Administration, Accounting, Computing --I'd like to see them as component parts of a total, integrated educational system. I 'd like to see the School of Business be a school where each of those elements maintains its own identity, but where the family ties are really strong and close.

I hope no one is surprised if there are no specifics here. I am not coming with an agenda of what programs there

will be. Husson will figure that out. I expect things to change as the world of business changes and we will have to keep ourselves on the cutting edge.

There are some really hot issues nationally in education: Global awareness, computer technology, and developing leadership attributes in business such as communications, analytical skills, and critical thinking.

There is a great deal of discussion about those issues and educators are struggling with which way to go. There is no doubt that the Liberal Arts hold a critical place in Business Education and I see a very close working relationship with that division.

All business students need a solid understanding of the international aspects of business. They need to face the fact that all business today is international business. They need to have the training to be able to deal with that reality. There are already some good things happening in that direction here.

As we look at our curriculum, I think we need to be thinking of ways of involving our alumni and the business people in the community and around the state in our curriculum. Education can't take place only in the classroom. Our lab should be the real world. We need a new way of building connections with the real world. Internships and co-op programs certainly accomplish that. But, I think there needs to be other, innovative ways in which we can involve people from the community. I think we need a lot of interaction of all kinds.

I would hope that Husson will be a place where we do an excellent job of educating business students to be ready to face their individual futures. In today's world, they have to plan assertively and aggressively for their future, realizing, as someone has said, that when they get there, it will have changed. We need to train people who can go out and be successful in that kind of environment.

Burns: The trustees have recently approved two new programs, Physical Therapy and Family and Community Nurse Practitioner. The Nurse Practitioner program is a master's degree program that will prepare students to sit for the Nurse Practitioner Certificate. Physical Therapy is a five-year master's degree program. Together they will round out what we offer in the School of Nursing and Health Professions.

These additions will have a big impact on the college. While the present faculty is qualified to teach in the nurse practitioner program, Physical Therapy will require the hiring of new faculty. We'll need additional science faculty and we anticipate that the college also will hire faculty in the humanities.

This will increase the enrollment at Husson and will diversify the student population. It also will require a big commitment space-wise. We'll require at least one additional lab for physical therapy. Bell Hall is currently being renovated and we plan to have the new programs housed in a portion of that building. There's no doubt that this is a big investment for the college, but from all the projections, it looks like it will be a very good investment in a strong health program at Husson.

There are other programs that we are looking at. Occupational Therapy and Athletic Training would be compatible with the Physical Therapy program once it is established. They would use some of the same facilities. Also under consideration is a Masters program in Nursing Administration.

In the Nursing program, I don't see us adding or deleting any course offerings. Rather, I think, we will be reorganizing the existing courses in order to meet the health care needs of the future. The health care system of the future is going to focus on wellness and on health maintenance. We need to adapt our existing courses so that they prepare our students not only for work in a hospital setting, but so they are prepared to work in a community setting and a variety of local situations. We are going to be reviewed by the National League for Nursing, and we'll be looking at all our current course offerings as we prepare for that review.

What is the job market for graduates from Husson now and in the future?

Burns: In nursing, the jobs are not quite as plentiful as they have been in recent years. There has been a lot of reduction in positions at hospitals as they prepare for the future health care system. But all indications are that by the year 2000, we could have a worse shortage of nurses than we did in 1988. And there are still areas today where there is a great demand for registered nurses.

In the area of Physical Therapy, there is a great demand projected for the next several years. The elderly make up the fastest growing segment of the population. As that population continues to grow, they are going to need people to care for them. Physical therapists provide that kind of care.

We also expect there to be a continued demand for nurse practitioners. The future health care system will emphasize wellness and health maintenance, which involves a strong emphasis on health education. As the trend in health care is moving away from long hospital stays whenever possible, much of the health care will be delivered in the home or in community settings. Nurse practitioners have the ability to meet those future demands for health education and health care delivered in the community and we expect there to be employment opportunities available well into the next century.

Jenner: Graduates who want work can find a job. Jobs are being created in this country at least as fast as they are being eliminated. People with initiative and energy can find jobs. Now, they may have to be open-minded about where they go to find them. And if they are reluctant to move from a certain area, then they are going to have to be flexible about what jobs they take. It's no longer a selling market for graduates.

John Boucher, '66 KΔΦ, used to make a living putting tigers in people's tanks. On occasion, they were real tigers.

As the regional manager for Exxon in New England, John often arranged for live tigers to be on display at the openings of new, company owned gas stations.

"That was an exciting time for me," he said. "We were a proving ground for new promotions."

Boucher brings that "tiger in your tank" attitude to all aspects of his life, including his role as a Husson alumnus.

Boucher came to Husson in 1962, a "22-year-old freshman," right out of the service.

"I studied my butt off that first year," he said. " I knew that that was what I needed to do to succeed."

Boucher said one of the most important aspects of his Husson education was the relationships with his professors.

"I remember their caring and their commitment to produce good quality students," he said. "That's stayed with me over the years. My professors cared, and through that caring we received additional knowledge. It was a good feeling to know that I was ready for the corporate world. I was up against kids from colleges throughout the U.S. and I know I fared very well. I had the knowledge and the tools to become successful. Husson gave me that."

Upon graduation in 1966, Boucher joined the Exxon Corporation, a relationship that has lasted almost 30 years.

He worked directly for Exxon for 16 years, starting in sales and working his way up in the corporation, becoming the regional manager for the 36 company owned stores in the northeast, and in 1980, the Operations Fleet Supervisor in charge of all the Exxon products that were delivered in New England. His next promotion would have taken him to corporate headquarters in Houston, but he and his wife Judy wanted to raise their two daughters in New England. So in 1982, he left Exxon to open his own service stations.

The business has grown into a chain of Exxon gas station/convenience stores throughout southern New Hampshire. He has received Exxon's Commitment to Excellence Gold Service Award, one of only two dealers in the country to receive the award 11 years in a row.

Boucher has been active in his community, and is now the president of the Granite State Women's Soccer League, which has grown to include 100 teams providing competitive soccer opportunities for more than 2000 girls. He's coached teams for the past nine years, and has taken one team to the final round of the regional championships in New Jersey.

"I played soccer for 4 years at Husson, and I played with some very good soccer players," he said. "When I started my own business, and came into a community, I felt that I wanted to give something back to the community in areas where I had some expertise."

John Boucher '66

Boucher also has channelled his efforts toward building a collection of fine wines. His wine cellar - the key architectural component when the Bouchers built their home - now holds more than 2000 bottles of wine, including fine California Cabernets and a variety of wines from France.

Boucher has been an active alumnus over the years and now serves on the Board of Trustees. He is the co-chair of Husson's Capital Campaign and has been a dedicated supporter of student activities at the college.

"I try to see what opportunities are there for me without being asked. That's just my make up. I had a wonderful experience at Husson. So anytime I have an opportunity to help out and make that experience a little better for the students today, I do. And I hope that when they've completed their time here and had a positive experience, they'll look for ways to give back to the college."

ALUMNI
Profile

Ray Page, '63 ΜΣΧ, never planned to go to college. He was content after high school, to go to work at Sears in his native Presque Isle.

But one of his teachers, Laurence Richard, '56 ΚΔΦ, was a Husson grad, and kept pushing him to enroll at Husson.

"Finally, I told him that if I could find a job in Bangor, that I would go to Husson," Page said. "We were both working for Sears that summer, and Larry talked to the manager at Sears in Presque Isle and arranged for me to be transferred to the Sears in Bangor. They guaranteed me 30 hours a week. So I enrolled at Husson, found a place to live on Essex Street, and I was off to school in September."

Husson classes were small, he recalls, and it was easy to get to know the other students. It wasn't long, he said, before small study groups had formed.

"I had to do all my studying at night because I was working," he said. " A lot of the guys would stay up at night. Usually, we'd wind up playing Hearts all hours of the night after studying."

During his last year at Husson, Page worked for the Isreal Laeger accounting firm in Bangor. Upon graduation, he landed a job with the Arthur Young Accounting Firm, one of the Big Eight accounting firms in the country. With the exception of a stint in the U.S. Army, where he worked as an Audit Specialist, Page remained with Arthur Young from 1963 until 1971, when he left to start his own accounting firm in Acton, Mass.

By that time he was married--he and his wife, Anita, were married in 1966--and had three children, all boys.

"We were working on audits, and in those days we would work just as many hours as we could stay awake. Finally, I had a Sunday off. The twins were about one year old and they were walking. I realized that I had missed their crawling stage. I knew that I couldn't keep that up."

Page ran his own CPA firm until 1991 when he sold the practice. He now works as a consultant, helping companies that are in financial trouble.

"Now I'm only as busy as I want to be," he said.

Over the years, Page has also been active in his community. He's a past chair of the Community Water District in Acton, and a past president of the Acton Lions Club. He's also chair of Board of Trustees of the Middlesex Savings Bank, the third largest mutual savings bank in Massachusetts with assets of more than $1 billion.

Page also continued his education, earning a master's degree from Bentley College. He also is a recipient of the Husson College Alumni Award for Excellence in Accounting.

Now that he's sold his practice, he has a lot more time to get back to Presque Isle where he likes to spend some time, hunting and especially fishing.

Ray Page '63

Page said some of his strongest memories of Husson center around one of his professors--Bill Donahue. He said Donahue's dedication to teaching helped prepare him for his life as a CPA.

"He approached the class with the idea that you were going to become a CPA, and he channelled all his teaching to that end. And because of that, the other professors would channel their efforts the same way. All his tests were old CPA exams."

He said Donahue helped his students to develop a certain discipline that people were not getting in other colleges.

"Discipline. Setting parameters. Defining problems and finding the answers. Problem solving. That's probably the biggest thing I got out of Husson."

"There's no question that I couldn't have done what I've done without my experience at Husson," he said. "Without that degree, I never would have gotten the job at Arthur Young, or any other firm. I would not be where I am today in any way, shape or form. That education gave me the opportunity to get where I am today."

Renovations At Bell Hall

For the first time in a decade and a half, Husson College is preparing to utilize all three of its residence hall buildings next year.

With the departure of Job Corps, which had leased Bell Hall for the past 14 years, the college will move back into portions of the building next fall. Work on renovating the building began almost immediately after Job Corps moved out, according to Ben Pratt, the director of operations at Husson, who is in charge of the renovation project.

The renovation has been divided into several phases. Pratt said the current phase involves preparing one wing for use as a student residence hall and renovating one floor of another wing into office space.

Pratt said the office space, which will house the Business and Development Offices, including Alumni Affairs and Public Relations, will be ready to be occupied by mid-July. The student residential wing, he said, will be completed in time for the start of classes in the fall. Installation of an elevator, which will make all levels of the residence wing accessible to handicapped students, will be completed by the end of September, he said.

Much of the preparation work for this phase of the project has been done by a crew of work-study students from Husson. Pratt said that once professional crews had removed asbestos tiles from portions of the building, the students went to work.

"They got rid of everything in the building that we couldn't use and then got the building ready so we could renovate it."

The work has been varied, anything from patching and painting walls to tearing apart bathrooms. Although professional construction workers have been contracted to work on the building as well, Pratt said the work-study crew had done much of the prep work before those crews went to work.

"Most of the students hadn't done anything of this nature before," Pratt said. "So it's been a learning experience for them as well as for me, dealing with 18- and 19-year-olds again."

Despite their inexperience, Pratt said, the student crews have done a good job working on the building.

"They're all hard workers," he said. "They do what they're told to do and they do the best job they can. And if they have a problem, they come and ask what to do. I wouldn't trade them for anything."

The residence portion of the building has been designated as an Honors Hall, according to John Rubino, the dean of student affairs. Rubino said students had to apply for a room in the Honors Hall and were chosen based on a set criteria which included past academic performance and involvement in campus life.

"We at Husson value academic achievement and participation in the social and community aspects of college life," he said. "If we truly value that, we felt we ought to try to recognize it in some way. This is one way of doing that."

Rubino said he hoped the concept of an Honors Hall would stimulate more discussion and interaction among students.

"We're hoping that this will result in more social interaction among students in the hall," he said, "and become a positive factor in their college experience."

All of the 48 rooms in the renovated wing will be single rooms and all areas will be accessible to handicapped students, Rubino said. Some are situated so that students in adjoining rooms could turn them into suites. All the rooms are wired to the college's telephone system and all have access to the Husson computer network.

Once the summer construction phase of the Bell Hall renovation is completed, crews will begin working on the second phase. That project will include renovating one wing for use by the School of Nursing and Health Professions. The wing will house office space for faculty, laboratories and classrooms for the new Physical Therapy program. The project also will include installation of a second elevator to make other levels of the building accessible to handicapped individuals.

Work will continue on that portion of the project throughout the 1994-95 academic year. Pratt said that wing should be ready before the beginning of classes in the fall of 1995.

Once that phase of the project is completed, there will still be two floors left to refurbish. Administrators are still discussing how best to use those sections of the building.

Employee Recognition Banquet

***PRESIDENT WILLIAM H. BEARDSLEY**, right, and Ken Vogt present Gail Gross with a Husson College desk lamp commemorating her 35 years of service at the college.*

Honored at the Husson Annual Employee Recognition Banquet recently this spring were:

25 years

Jane Goodwin '61 ETE, Helen Griffin, Pam Hennessey and Lambros Karris;

15 years

Bob Caswell and Edna Kustner;

10 years

Jesse Baker, Monica Collins, Tammy Overlock-Curtis, Laurene Grendell '84, Barbara Higgins, Janice Mudge '94, Sonja Spring '80 and Anne Turner '84;

5 years

Lorrie Allen, Dorothy Bates, Steve Belyea, Leanne Bourgeois '90, John DeRoche, Dawn Horten, Linda Labin, Trudy McLeod, Paul Mirra, Leah Perrigo '92, Shirley Sibley, Andrew Stinson and Arnold Upham.

***SALLY WEBSTER** tries out the Husson College commemorative chair that was presented to her during a reception held in her honor this spring, marking her retirement after 26 years at Husson.*

Husson students this spring elected **Dr. Paul Curtis,** professor of science, as the Teacher of the Year.

"I'm really very gratified," Curtis said of the honor. "It's always nice to know that your work is appreciated."

In his classes, he said, he strives to instill students with self-confidence.

"What I really try to do is to help students learn to have confidence in their own reasoning power," he said.

A combat veteran of the Korean War, he earned a B.S. degree at The College of Wooster and an M.S. and Ph.D. from Ohio State University. Born and raised in India, Curtis said his international background often is in evidence in the classroom.

"I try to introduce foreign cultures and often use examples from other countries," he said. "I think it's important that students, especially Maine students, get some idea about what the rest of the world is like."

A microbiologist, Curtis teaches a variety of science courses at Husson. He also has taught at Eisenhower College, American University and Rochester Institute of Technology.

Pam Hennessey has been elected chair of the NAIA's Northeast Region, making her the senior administrator for the 50 colleges in the region which stretches from Maine to Florida.

Hennessey will serve a three-year term as chair of the Northeast Region, which was created when the NAIA restructured earlier this year. Although her term does not begin officially until August, Pam said she will be working throughout the spring and summer in order to prepare for the shift in NAIA structure from 31 divisions to nine regions around the country.

As chair, Pam also will sit on several NAIA committees, including the regional Coordinating Committee and the Council of Athletic Administrators, a national committee which has policy-making powers for the national NAIA organization. She is the sole athletic administrator from the Northeast Region to sit on that committee.

Husson baseball coach **John Kolasinski** was named the NAIA District V Coach of the Year for 1994.

Kolasinski led the Braves to a 21-10 record this season, the best record ever for a Husson baseball team. The team also was ranked 38th in the nation, the highest NAIA national ranking for the Braves.

Kolasinski said he appreciated the honor, but pointed out that he could not have achieved this year's successes without his players.

"If you don't have players that are playing well, you don't get named 'Coach of the Year," he said. "I think the award probably should be "Team of the Year."

"Coach of the Year" is selected by all of the coaches in District V.

Accounting professor **Dewey Martin** helped make the wedding bells ring this spring for a Husson alumnae.

A notary public, Martin is licensed to perform marriage ceremonies, and on May 21 he officiated at the wedding of Barbara Martin, '90 and Michael Trussell in Cascade Park in Bangor. Barbara was Martin's student and advisee while she was at Husson, and after graduation, she worked in Martin's accounting practice for a little while.

Although Dewey has been a notary public since 1988, he said this was the first wedding he's ever done. Inexperience didn't matter though, as it was a bright, sunny day, perfect for a wedding.

Sally Webster, a mathematics professor at Husson for more than 26 years, retired at the end of the spring semester this year.

"I really have enjoyed it all," she said. "But I'm ready for retirement."

Webster came to teach at Husson when her husband Al, a professor here, asked her to fill in for someone for a month.

"I said 'no way,'" she recalled. "That was 27 years ago and I've been here ever since."

While she admits that 26 years is a long time to teach one subject, she says there was one thing that kept her going -- the students.

"They are the ones that kept my morale up," she said.

She added with no little pride that during the 26 years she has been here, students have elected her "Teacher of the Year" 14 times.

"It's always nice to hear that you're appreciated," she said. "And when it comes from the students, it's even nicer. I'm very proud to have received that award that many times."

Webster said she and her husband, who retired last year, plan to spend time between homes in the Carrabassett Valley near Sugarloaf and on Green Lake.

Dr. Phil Grant is putting the finishing touches on a new book that will be published later this year.

Grant said the book will be a compilation of most of the major innovations in management theory and technique that he has developed over the years. The final draft of the book was delayed, he said, because he was completing work on his most recent innovation which he wanted to include in the book.

This winter and spring he completed work on two theories, "Integrating the Theory of the Firm and the Theory of Individual Behavior," and "Hysterias Phenomena to Explain Revenue and Cost Trajectories Under Economic Decline," and a new management technique, "Using Queuing Models in the Design of Administrative Structures."

Grant said he considers himself a teacher, consultant and writer, but, most of all, an inventor of management theories and techniques. Like most inventors, he said, he's found enjoyment in the "development of the new."

Dr. Pamela Warford, associate professor of English at Husson, delivered papers on Zona Gale, a "forgotten" American writer, at two national conferences this spring.

Warford spoke at meetings of the Twentieth Century Literature Association and The Popular Culture Association. She also presented the paper "Reclaiming Zona Gale: Putting A Lost American Writer In Her Place" as part of Husson's "Voices of Women in Public and Prose" series.

According to Warford, Zona Gale was a popular American writer during the early part of this century, winning a Pulitzer Prize for drama in 1921. She published 34 books between 1906 and 1939, including volumes of essays, poetry, short story collections, plays and novels. She is virtually unknown today and only two of the 34 volumes of her work have been reprinted.

Warford said she hopes to reclaim Gale's work as an important American writer. She is currently collaborating with another scholar on a biography of the writer.

Nancy Grover, M.S., N.C.S., an associate professor in Husson's School of Nursing and Health Professions, recently participated in a three-day course titled "A Cancer Pain Management Course for Nurse Educators," at the City of Hope National Medical Center, in Duarte California.

Sponsored by a grant from the National Cancer Institute, the course brought 44 competitively selected nurse educators from 35 states to the City of Hope campus. The primary goal of the program was to improve undergraduate nursing faculty knowledge of pain management and to get the most up-to-date information on pain content into nursing curricula.

The course format provided the participants with written materials and access to resources to help them integrate the information into undergraduate curricula. In addition, they had an opportunity to establish contacts with some of the top pain experts in the country as well as others interested in promoting effective pain management. Topics covered in the course included assessment, pharmacologic and non-pharmacologic interventions, ethics and spirituality.

Sportsmanship still alive and well

Not all athletes are obnoxious, self-centered, no-role-model jerks

(Reprinted with permission of the *Central Maine Morning Sentinel*)

The Husson College baseball team came to Waterville this week and won a game against Colby College.

The Braves also picked up a couple of fans without having to swing a bat or catch a ball.

But let me digress.

A story about handshakes made national headlines this week. It was not an uplifting story. Instead, it detailed a California high school athletic conference's decision to ban postgame handshakes after sports events.

The step was taken so as to help avoid the verbal abuse, fist fights and general ill-mannered behavior--such as players spitting on their hands before shaking--that happened repeatedly during the traditional handshakes between players after a game.

For many people, the story is yet another example of the moral degradation of our society and especially of our younger generations. Teenagers and young adults don't have a good image these days. They often are seen as disrespectful and intimidating, particularly the male gender, and in many respects the image is justified.

For some reason, it's become cool to be a tough-looking muscular dude dressed in a hooded sweat shirt or L.A. Raiders jacket, and this sometimes is true even of nice young people who mean nobody harm.

Basketball star Charles Barkley says he doesn't care to be a role model, but that's exactly what he is. He is the tough, street-wise, speaks-his-mind hero young people seem to crave and certainly emulate these days. The day of pristine role models such as Lou Gehrig and Tom Seaver are part of the distant past.

In fact, the idea of pristine athletes in general is an absurd one these days. Athletes are mercenaries in the 1990's. Sports is a business and ball players are opportunists looking for the biggest payoff. This is the age of the pampered athlete, the guy who thinks me first, me second and me third.

Colin Hickey
Observations

Athletes have the power to show that a tough, muscular-looking dude in an athletic outfit can be engaging rather than intimidating and that the guidelines they follow when playing ball--team work, sacrifice, hustle--can and should be applied to everyday life.

Sports Illustrated has a regular item in its scorecard column entitled This Week's Sign the Apocalypse is Upon Us. More often than not the quotes or tidbits stem from professional sports and professional athletes.

Its purpose is to bring a laugh, but behind the chuckles and the grins lies a disturbing reality, a realization that traditional values have withered and crumbled, that how you play the game is of no consequence because the bottom line is that winning brings fame and fortune and what better goal can there be than these.

It makes for a disillusioning world, especially since sports and athletes have so much potential to set good examples, to make children see hard work, discipline and team work can bring success.

And given the popularity of sports, the athlete himself--or herself-- is in a position to influence greatly and positively those who follow the game. They have the power to show that a tough, muscular-looking dude in an athletic outfit can be engaging rather than intimidating and that the guidelines they follow when playing ball--team work, sacrifice, hustle--can and should be applied to everyday life.

And this brings me back to the Husson baseball team. After their victory against Colby, the happy and hungry Braves visited one of the local McDonald's in town. They arrived in several vans and quickly filled the area in front of the cash registers.

For a mom and her 3-year-old, it was rather intimidating standing behind so many big, muscular young men dressed in uniform. It was the first time the 3-year-old had seen real ball players at such a close vantage point.

"These are ball players," his mom explained among other things.

One of the Husson players overheard the conversation and turned around to say hi. Before he long, he was in animated conversation with the mom and the 3-year-old, introducing some of his teammates as well as proudly noting he had his first collegiate hit that day.

It was then that another Husson player asked the rest of the squad to step aside so the 3-year-old could go first and get the Happy Meal he had been eagerly anticipating. His teammates couldn't have been more happy to do so.

That act of courtesy didn't appear in the write-up or line score of the Husson baseball victory the next day and it won't help them win a division title or make them a higher seed in the playoffs.

But the Husson baseball team's small act of kindness, and the interest it took in a 3-year-old just discovering the world of athletics and athletes, made the Braves winners in a much larger sense.

They showed sportsmanship can be applied off the field as well as on and whatever their final record may be they can be sure they accomplished something important this season.

Colin Hickey of Waterville is a columnist and sports writer.

fraternity brothers rolled out the barrel forMaine Special Olympics this year. The brothers rolled a barrel about 65 miles from Waterville to Bangor to raise more than $1000 for MSO.

Husson Students Can Aid Local Small Businesses

Local small business in the Bangor area may benefit from the efforts of a group of Husson College students.

The students, members of Students in Free Enterprise, are preparing a brochure that will focus on the marketing of a business and how to develop a marketing plan on little or no money. Julie Brasslett of Old Town, a 1994 graduate who worked on the project, said the brochure was the team's outreach project for the year.

"Working in the community is an important part of a SIFE team," she said. "And we hope that the community will pick up on us."

SIFE is a not-for profit corporation sponsored by individuals, foundations and corporations around the country. It's mission is to create a better understanding and appreciation for the free enterprise system through student-generated projects.

Dr. Jesse Baker, a member of the Husson faculty, was awarded a SIFE Fellowship last fall to establish the team.

"It's a golden opportunity to gain a greater awareness of American business," Baker said. "Being part of a SIFE team gives them a chance to learn from experience. The experience can become another ingredient in making them more employable.

It's value added to their educational endeavors."

In addition, the members of a SIFE team also can gain valuable contacts with business leaders in the local community and throughout the country. Husson's SIFE team is currently building a team of local business leaders who will serve as a board of directors for the local organization.

If the brochure is well-received once it's distributed, the team plans to develop a workshop based on the brochure that would be open to area business owners.

TEP Brothers Are Tutors

Members of the Tau Epsilon Phi fraternity at Husson played the dual roles of students and teachers this year, helping young women to earn their high school diplomas.

Throughout the year, the TEΦ brothers worked as tutors at the Good Samaritan Center in Bangor. The center offers high school diploma classes for young, single mothers in the area. During the year, the TEΦ brothers worked with teachers in those classes tutoring the students in a variety of subjects.

"We work right in the classroom with the teacher and give them extra help in whatever subject they're studying," said Jim Mahoney, the president of TEΦ. "Actually, we learn quite a bit too."

Mahoney said the tutoring experience has been rewarding for the young women as well as for the young men who are tutoring.

"We feel like we're doing something to help someone," Mahoney said, "and it seems to have made a difference. When we first started, the women seemed real negative about themselves. Now their attitude is more positive. They seem to have a lot more self-esteem. They talk to us about college and two of them even want to go on to college after they get their (high school) diploma. It's kind of touching to see that they haven't given up."

The TEΦ brothers also organized a special T-Shirt day as a fund-raising event to help purchase new books for the center.

Coach Kissy Walker and Sharon Siebert '91 hold Siebert's number 20 basketball jersey after ceremonies at Newman Gym. Siebert became the first woman athlete at Husson to have her jersey retired.

Sharon Siebert's Number Retired

Compiled from *The Spectator*, *Bangor Daily News*, and *The Ellsworth American*.

At Husson College, the number 20 will always stand for Sharon Siebert.

Siebert wore the number 20 during the four years she played basketball for Husson, and this spring the college made it permanent. During a brief courtside ceremony between games, Siebert became the first female basketball player ever to have her number retired at Husson.

"It's a great honor and one I'll always treasure," Siebert told the crowd.

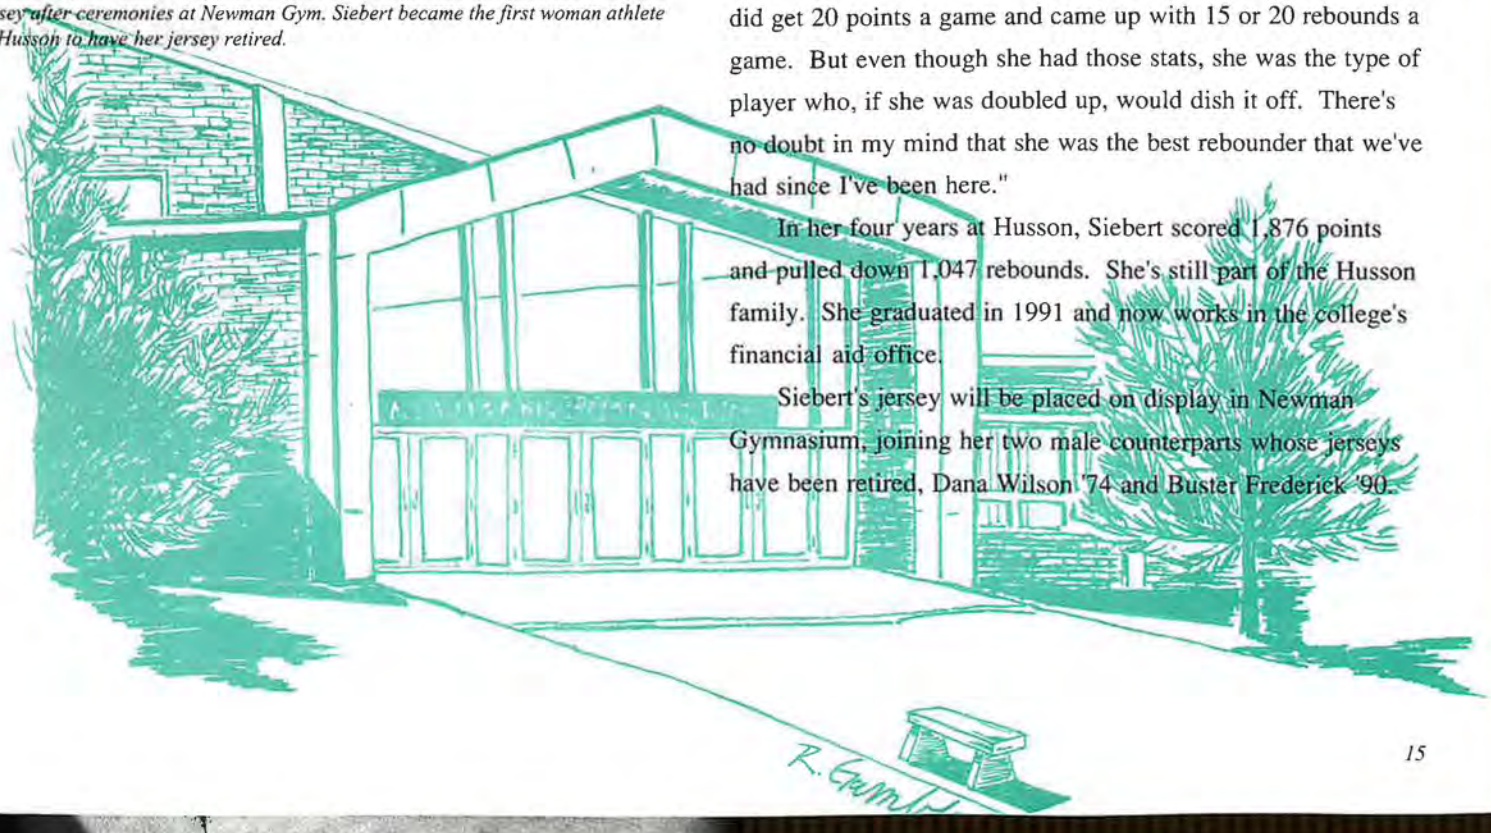

She also credited her teammates and her coaches, noting that she could not have achieved what she did without their support.

Siebert is the all-time leading scorer and rebounder in women's basketball at Husson, and, according to coach Kissy Walker, helped bring the women's program "to another level."

"She was the type of player who just didn't expect to ever miss," Walker said. "That's one of the things that made her a great player. She was one of those go-to players because she did get 20 points a game and came up with 15 or 20 rebounds a game. But even though she had those stats, she was the type of player who, if she was doubled up, would dish it off. There's no doubt in my mind that she was the best rebounder that we've had since I've been here."

In her four years at Husson, Siebert scored 1,876 points and pulled down 1,047 rebounds. She's still part of the Husson family. She graduated in 1991 and now works in the college's financial aid office.

Siebert's jersey will be placed on display in Newman Gymnasium, joining her two male counterparts whose jerseys have been retired, Dana Wilson '74 and Buster Frederick '90.

Alley Sets New Scoring Record

Compiled from *The Spectator, Bangor Daily News,* and *The Ellsworth American.*

Raymond Alley became Husson's all-time leading scorer in men's basketball this season, breaking Dana Wilson's record that had stood for 20 years.

The senior guard tossed in 688 points this season and ended his career with 2657, 184 more than the record set by Wilson during the 1970-74 seasons.

The record-setting shot came during a game against Thomas College at Newman Gymnasium.

Alley "...took a pass from Obadiah Johnson, pulled up beyond the 3-point line, squared up, and let the ball fly," wrote sports writer Larry Mahoney of the Bangor Daily News.

"It's a great honor," Alley said. "Dana was obviously a great athlete. Breaking the record hasn't really set in yet. My biggest goal is to win the district, after that it may set in."

Wilson was at courtside for the game, and when play stopped, he presented the game ball to Alley.

"Being around sports--all sports--all your life, you know that records are meant to be broken," Wilson said. "I feel really fortunate that it took 20 years to break my record. Ray deserved to break it. He's shown that he can do more than put the ball in the hoop, he's a complete, all-around player."

Alley ended his career just 21 points short of the all-time Maine scoring record.

Coach Bruce MacGregor and Dana Wilson congratulate Ray Alley after the game in which he broke Wilson's 20-year-old scoring record.

Arthur Irving, center, the head of Irving Oil, presents the Golden Ball Tournament trophy to the Husson Braves coaching staff after the Braves had won the tournament in New Brunswick for the third year in a row. Pictured with Irving are Victor Garay '94, Bruce MacGregor, Warren Caruso '84 and Marcelle Whitney.

1993/1994 Season Wrap-ups

Women's Basketball

Inexperience and injuries were key factors that kept Husson's women's basketball team from making a repeat trip to the national tournament this year.

"This was a building year," Walker said. "We had no seniors. We were a really young team."

She added that nagging injuries to key players had plagued the team throughout the season.

Nonetheless, the team had a winning season, with a 16-10 record on the year.

"Toward the end of the year the players had improved a lot," Walker said. "And they all got a pretty good amount of playing time."

That experience will help them next year, Walker said. Most of those players will be returning and will form a strong nucleus for the Braves. In addition, Becky Mulholland, the NAIA's top rebounder a year ago, has transferred to Husson and will be eligible to play, along with a strong group of recruits.

Softball

Coach Shannon Whiting's Braves finished the softball season with a 17-12 record, which earned them a #3 ranking in the NAIA's New England division.

Their season record earned them a trip to the district tournament where they advanced to the semifinals.

"We had a young team this year with only one senior and two juniors," Whiting said. "But they played well together and did a nice job."

Several team members earned district and conference honors at the end of the season. Michelle Cogan, Laurie Yanush, Chris Longtin, Marianne Lampart, Denise Schrier and Amanda Pomerleau were named to the All-District NAIA team. Cogan, Yanush, Longtin, Lampart and Pomerleau also were named to the MAIAW All-Star Team. Husson's MAIAW All-Stars were joined by Amy Dyer on the MAC All-Star Team. Pomerleau was named MAIAW co-Rookie of the Year and became the first Husson player to be named the MAC Rookie of the Year.

Despite the loss of senior Chris Longtin, Whiting says she has a strong team returning and an exciting class of recruits coming in next year.

Tennis

The Husson College Athletic Department this spring began offering Tennis as a varsity sport for men and women.

Athletic Director Pam Hennessey said the decision came as part of an effort to offer more individual, lifelong sport opportunities for Husson students.

"We've done well developing team sports here," she said. "We're looking to develop other sports that are individual sports and that have some lifetime carry over."

Tennis was offered as a co-ed sport, Hennessey added.

"It's a sport where the student athletes can compete at their own levels of ability."

A dozen students played on the team, competing in both singles and doubles matches.

Baseball

The Husson Braves baseball team continued its strong district play this year to post a 21-10 record, the best record ever at Husson.

The Braves were ranked 38th in the nation, the highest ranking ever at Husson, and were the top-seeded team going into the NAIA District V playoffs. Two first-round losses, however, eliminated them from the tournament.

"The only day we didn't play well was the first day of the playoffs," Coach John Kolasinski said. "That's not the day you want to play poorly, but, that's baseball."

Nineteen members of this year's team will be returning next year, along with what Kolasinski calls the "best recruiting class I've had."

"We'll see what we can do."

Five members of the team, Lance Bean, Jamie Peete, Troy Martin, Sandy McCuaig and Matt Eastman, were named to the NAIA All-New England Team.

Men's Basketball

"This was one of our most successful seasons ever," said Coach Bruce MacGregor.

The Braves rolled up a 28-3 record over the course of the season, which was broken up by a trip to Europe where the team played against some top European club teams.

Among the victories were wins in all six of the regular-season tournaments they played including the MAC conference championship. That win earned them a trip to the NAIA District II national championship, their fourth trip to the nationals in the past six years.

In Idaho, the Braves ran into the red-hot Crusaders from Northwest Nazarene College, who handed the Braves a 114-84 lose in the opening round which eliminated them from the tournament.

Despite the loss of key players, Coach MacGregor said he has a strong team returning next year along with a good group of recruits.

Ray Alley was named an NAIA first-team All-American for the second year in a row.

Paul Husson International Scholarship Established

Husson College has established the Paul Husson International Scholarship to honor Paul and his many years of devotion to international education at Husson and to the international students who have been a part of the college.

The endowed fund will be permanently invested by the college, with the annual revenue to be used to provide financial aid to a deserving international student.

"Paul has been a true friend and advocate for all international students," said Husson President William H. Beardsley. "This scholarship is a way for the college to honor those efforts and for Paul's friends and associates to participate in that honor."

The announcement of the Husson Scholarship came shortly after Paul had returned from a three-week recruiting trip to Southeast Asia, where he met with potential students. He said he was honored and excited about the opportunities the new scholarship would provide for international students.

"There are a lot of talented students from overseas and, up until now, there hasn't been any financial aid for them," he said. "It will be nice to be able to help some deserving students from overseas."

In today's world, he added, international education is essential, both for international students at Husson and their American counterparts.

"I think it's just as important for American students to know students from abroad as it is for them to know us," he said. "There are a lot of kids from around here that have never had the opportunity to meet people from other cultures."

Contributions to the Paul Husson International Scholarship can be sent to the college in care of the Development Office.

How To Establish A Scholarship

You, too, can establish an endowed scholarship fund that will help future Husson students obtain an education, and, at the same time, honor an individual, an organization or a corporation.

It's not difficult. You can start an endowed fund at almost any amount. A $7,000 initial investment, for example, will provide an annual grant of about $500 for a student. You can also endow a fund over time, which allows the fund to grow in a way that's financially comfortable for you. One of the college's existing scholarship funds began with an initial investment of $2,500. Over the past 10 years, that fund has grown to $12,000 and now provides a $1,000 grant to a deserving student each year.

The trustees will invest all donations to your endowed scholarship fund in perpetuity and will carefully manage those funds to ensure the most secure and substantial returns possible. In most cases, they recommend that only 80 percent of the annual earnings be awarded each year. The remaining interest can then be reinvested with the principle so the funds will continue to grow to keep pace with inflation.

Establishing the criteria for awarding a scholarship is an important part of the process. Administrators at Husson recommend that all scholarships be awarded based on need, and will work with you to determine any other desired criteria for your scholarship.

Frank Shaw's idea when he established a business school almost 100 years ago was that every individual should have an opportunity to develop skills needed to provide a better way of life and that "no student should be denied such an opportunity because of financial straits." Your gift to establish a scholarship fund could provide a student with that opportunity. If you are interested contact the Development Office at Husson, 207-941-7073.

Annual Fund Update

Alumni and friends of the college donated $55,000 to the Annual Fund this year, $5,000 more than its goal for the year, according to Annual Fund Director Mitchell Ellisen. In addition, donors earmarked another $65,000 in donations for specific endowments and scholarships.

This year, the Class of 1970 had the highest number of donors to the Annual Fund, 21. The Class of 1966 donated the most money and had the highest overall ranking of all the donating classes.

Most of those funds were raised through contacts with alumni by Class Agents, according to Ellisen. This group of alumni helped with the Annual Fund by writing to their former classmates, encouraging them to donate to the College.

"Much of the credit for our success goes to those people who did so much work," Ellisen said. "It's been a great opportunity for me to work with such professional people. I'm looking forward to next year's campaign."

There are two Councils which alumni can join based on the amount of their donation to the Annual Fund, Ellisen said. The President's Council acknowledges those alumni who have donated $1,000 or more to the Annual Fund campaign. The Century Council is open to those donors who have given between $100 and $999. Greg Vermette '74 ΚΔΦ, has served as the Chair of the President's Council this year. Ray Page, '63 ΜΣΧ, will chair the President's Council during the 1994-95 academic year.

According to Ellisen, the President's Council is comprised of three clubs: The President's Club, for donors who give $1,000; The Bell Tower Club, for those who donate $3,000; and the Trustees Club, for $5,000 donors. The Century Council also is comprised of three clubs: The Kenduskeag Club, $100 donations; The Penobscot Club, $250; and the Husson Club, $500.

Ellisen said that next year the college plans to alter its fund-raising efforts to make this a true Annual Fund.

"In the past, Husson has combined all aspects of fund raising under the Annual Fund banner," Ellisen said. "Next year, the Annual Fund will focus only on raising money to go to budget relief. That means the college will use those Annual Fund dollars at its discretion for the operation of the college."

Ellisen added that this does not eliminate other forms of giving. Friends of the college will still have the opportunity to donate to endowed funds and/or scholarships.

The college already is planning for the 1994-95 Annual Fund campaign and Ellisen said he has a number of people in place to help the Annual Fund exceed this year's totals. He is, however, looking for additional Class Agents. Ellisen said he needs Class Agents for the years: '43, '45, '51, '52, '53, '55, '60, '80, '85, '86, '87, '88, '89, '90, '93. Anyone who would like to serve as a Class Agent or who wants more information about the Annual Fund can call Ellisen at 207-941-7024.

Husson Honors Two of Its Own at 1994 Commencement

Husson College honored two members of the college family during the 1994 commencement ceremony on May 14 at the Newman Gymnasium.

The college awarded honorary degrees to 1969 Husson graduate Brigadier General Wilfred Hessert '69, the Wing Commander of the Air National Guard's 101st Air Refueling Wing in Bangor, and to Husson Trustee Constance H. Carlson, the former president of the University of Maine at Presque Isle. General Hessert also delivered the commencement address.

Clutching their caps and gowns against the blustery spring breezes, 427 graduate and undergraduate students marched into the gymnasium for the ceremony led by bagpiper Richard Trott '65 ΜΣΧ. The college presented 100 associate degrees, 271 bachelor's degrees and 56 master's degrees. The graduates included students who had completed their degree requirements at sites in Portland, Lewiston and Caribou as well as those who had studied at the Bangor campus.

The 1994 valedictorian was Kathy Bouchard Chamberland who earned a B.S. in Nursing. The salutatorian this year was Lisa Marie White, who earned a B.S. in Accounting.

A Bangor native, Hessert worked his way through Husson, graduating with a B.S. Degree in Accounting from Husson and later earned a Master's Degree in Business Administration from Auburn University. His military education includes Air Command and Staff College and Air War College where he was a Distinguished Graduate in 1982.

Hessert began his military career in 1960 as a HAWK missile radar repairman with the U.S. Army. After three years of active duty, he joined the Maine Air National Guard. He received a direct commission in 1965 to enter Undergraduate Pilot Training at Laredo AFB, and then attended Fighter Interceptor School at Perrin AFB. He returned to Maine when he was assigned as an Interceptor Pilot with the 132 Fighter Interceptor Squadron Maine AirNG. During the past three decades, Hessert has risen through the ranks of the Maine Air National Guard serving as Squadron Commander, Deputy Commander of Maintenance, and Wing Deputy Command for Operations. In 1987 he was promoted to Vice Wing Commander and assumed his current post as Wing Commander in 1991. He was promoted to Brigadier General on July 1, 1993.

The General's military decorations include the Meritorious Service Medal with oak leaf cluster, Air Force Commendation Medal, Kuwait Liberation Medal, and Southwest Asia Service Medal. His civic affiliations include the National Guard Association of the United States, The Air Force Association, Maine Military Historical Society, Lions International, and Hope House, Board of Directors.

The college awarded General Hessert the Doctor of Business Administration degree.

Brigadier General Wilfred Hessert

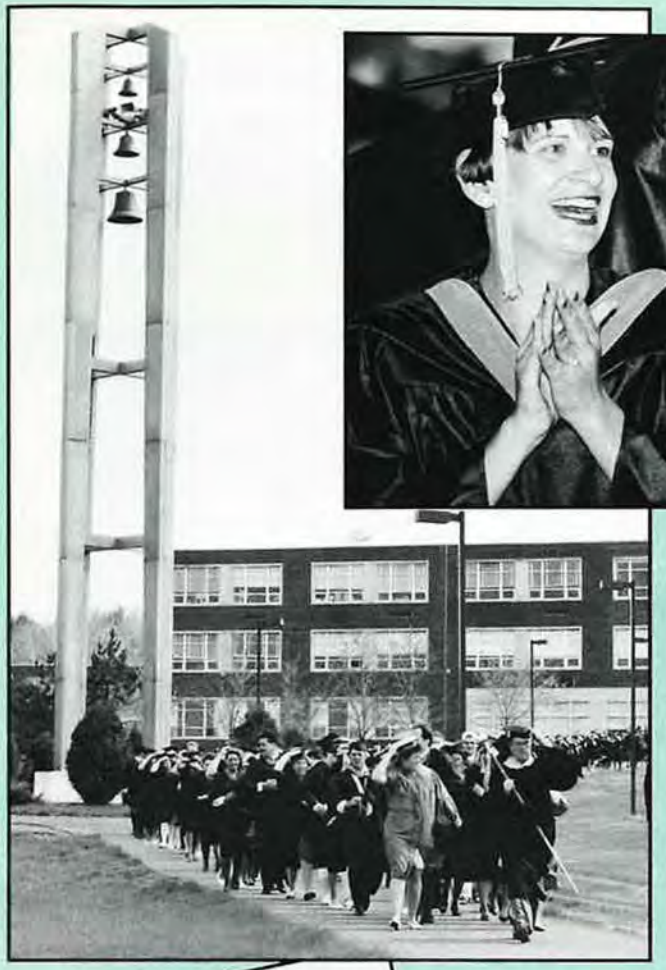

Husson Trustee Constance H. Carlson

A product of the Bangor school system, Carlson received her undergraduate education at Vassar College and a Master's Degree at the University of Maine. She earned her Ph.D. at Brown University. Her love of literature and her commitment to the humanities has marked her career as a teacher and as an administrator.

Carlson has been, and remains, a role model for the advancement of women in leadership positions in the state. She chaired the first Task Force on Women at the University of Maine and was the first woman to serve as an Academic Dean at the University. As dean of Bangor Community

A 1994 Commencement Scrapbook

College, she worked to make the college an integral part of the University of Maine, Orono. She became the first woman chief executive in the University of Maine System, serving as President of the University of Maine at Presque Isle. A longtime trustee at Husson, she was the first woman to serve as Chair of the college's Board of Trustees.

She has served on the Maine Commission on Women, the Maine Commission on Aging and the Maine Community Foundation, as well as many other associations. She also has served as president of the Bangor Public Library Board of Managers.

Carlson has been honored repeatedly during her career, most recently with the Maryann Hartman Award for Distinguished Women.

Husson awarded Carlson the Doctor of Letters degree.

Husson Travels To Southeast Asia

Hundreds of high school students throughout Southeast Asia learned about Husson College this spring thanks to Paul Husson's barnstorming recruitment tour of the area.

Husson travelled with a group of 23 college representatives and visited schools and students in Indonesia, Singapore, Malaysia, Thailand, Hong Kong, Taiwan and Japan.

"We put on college programs in hotels and at college fairs, and we visited as many schools in each area as we could," he said. "There was a lot of interest in the college there. I had a couple of hundred leads when I returned, and I've already received two completed applications."

Husson said he relied on alumni living in some of the countries for assistance during his visits. Although his schedule was full, he did manage to meet with alumni and to attend some alumni get-togethers in Japan and in Thailand.

Paul Husson joined an alumni meeting in Bangkok, Thailand, during his recruiting tour of Southeast Asia this spring. Pictured are Pornimit (Bo) Mettaprasert, '89, MSB, Puchong (Burt) Phornphiboon, KΔΦ '68, Paul Husson, Thaviwat Saksri '85 MSB, and Bumchai Saksri ICLS '89.

Alumni Pornimit (Bo) Mettaprasert '89 MSB and Sunee (Ta) Honglawan Mettaprasert '90 MSB, and their young son Pete, were among the alumni who helped during college fairs during Paul Husson's recruiting trip this spring. They worked with Husson at a college fair in Bangkok.

"Our alumni overseas are always very helpful," he said. "They help to make arrangements for me in advance, and, often, they'll introduce me to prospective students."

Although Husson has a growing number of international students, the college is interested in attracting more students from a variety of countries, he said. Husson pointed out that developing an international awareness among students was one of the goals set during a faculty/staff retreat last year. The college is actively searching for ways to meet that goal.

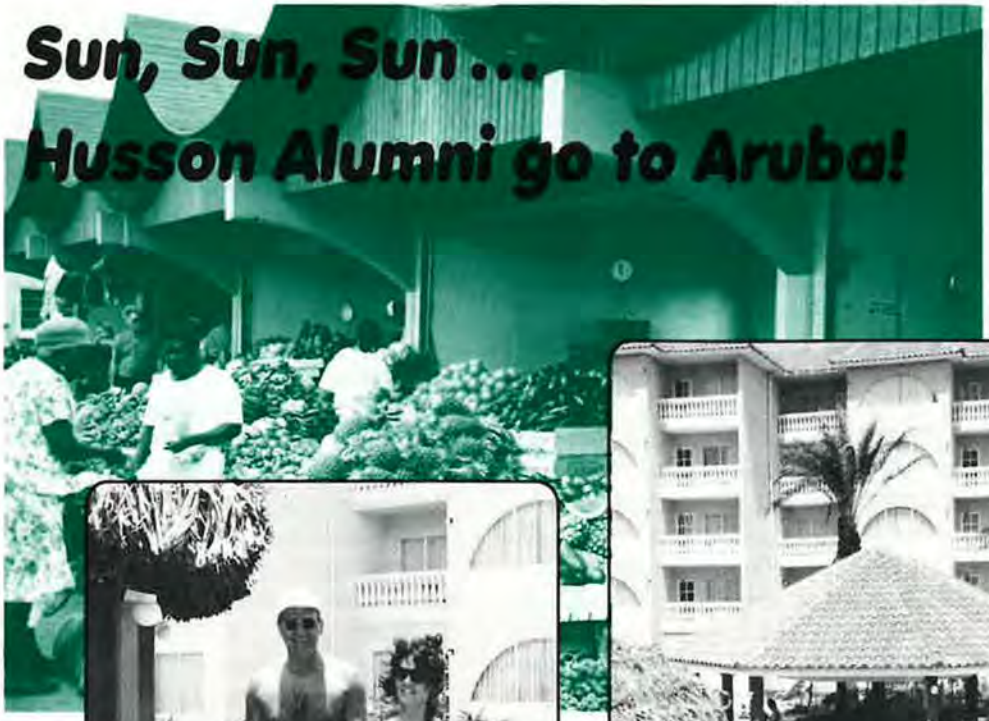

"We now have 86 students from 26 different countries, and we're trying to open up some new areas," he said. "Academically, I think it's a sound objective. It's important for students to develop international relationships now, especially in the kind of world we live in where businesses have to be aware of foreign markets. There has to be an international presence on campus.

Past efforts, including regular recruiting trips, have been helpful in attracting students, he said

"We have a good reputation in Japan now," he said. "People there know about Husson and we have established ongoing relationships with several schools and individuals."

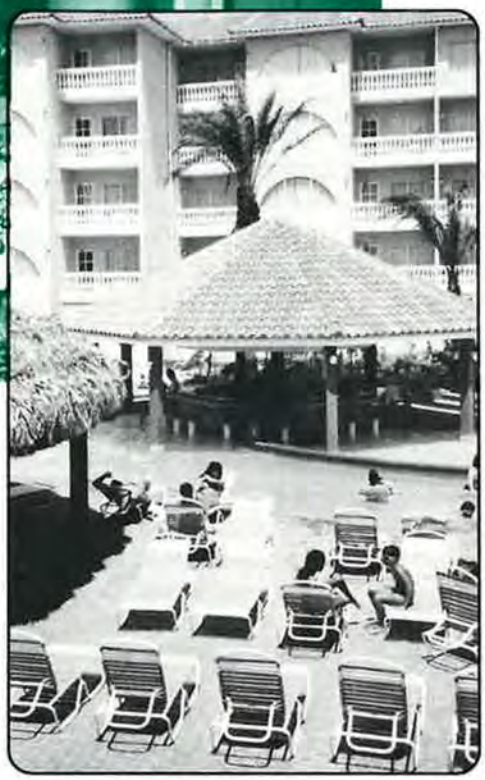

He said he hopes recruitment tours like this one will generate the same kind of interest in countries all around the world.

Sun, Sun, Sun... Husson Alumni go to Aruba!

Newlyweds *Paul Baillargeon '59, and his wife Linda, spent part of their honeymoon on the tour.*

In Memoriam

Laura Clark Chase, Shaw Alumna, died February 3, 1994 at Laguna Hills, California. She was predeceased by her husband Abel in 1948. She moved to California with her family in 1954 where she reentered college and earned her teaching degree. She taught elementary school for 25 years in Glen Avon, California.

She is survived by her four sons, Andrew, Abel, Merle and Robert, two daughters, Jane Doble, and Linda Swalling Chase and her step daughter, Alice Chase Veno.

Wilfred McReavy, Shaw Alumnus, died February 10, 1994. He was a resident of Whitneyville. Mr. McReavy retired from the Maine Central Railroad in 1964.

Survivors include his sons Paul and Ralph and daughters Doris Mawhinney and Olive Peters.

Elsie Hurd '25 EMGH died February 18, 1994 in Hampden. She was a registered nurse and worked at the Castine Hospital and retired from the Eastern Maine Medical Center after many years of service.

Survivors include half-brother, Ambrose Farnum, half-sister, Fannie Johnson, and stepsister, Barbara Farnum.

Frances Hopper West '34 *RN, EMGH*, died May 17, 1994 in Norwich, Connecticut. She was employed as a nurse in Maine for most of her career. Frances was a member of the Eastern Maine General Hospital School of Nursing Alumni. Her first husband, Donald R. Robinson, died in 1966. On June 28, 1970 she married William West who died May 15, 1978.

Survivors include her son, John, three sisters, Dorothy, Kathleen and Margaret, a brother, Donald, and four grandchildren.

Shirley Drew Madden '40 ETE died April 18, 1994. She was a resident of Old Town. Shirley taught business in Winter Harbor and Old Town. She also worked for 15 years at Pat's Variety in Old Town and as a bookkeeper at Goldsmith's Sporting Goods for several years. She enjoyed basketball throughout her life.

Survivors include her husband, Lawrence; sister, Beverly; three sons, Richard, Michael and Keith; and grandchildren.

Elizabeth Faloon Brown '41 died April 10, 1994 at Calais. She was active in the United Methodist Church of Calais, the Calais Benevolent Society, the St. Croix International Garden Club and was an honorary trustee of the Calais Regional Hospital.

Survivors include her husband, Francis and daughters, Catherine and Barbara.

Eleanor Simmons Heald '42 died February 27, 1994 at Union. During World War II, Eleanor worked for the U. S. Government in Washington, D. C. and New York City. She and her late husband, Robert, operated the Union Country Club.

Survivors include her two brothers, Donald and Henry, and sister, ***Priscilla Burrill '48 ETE***.

Roland Hobbs '48 ΜΣΧ died November 17th at his home in Eddington. He served in the U.S. Army during the Korean War. Roland retired from the Maine National Bank and at the time of his death he was employed by Sears.

Survivors include his wife, Eleanor, four daughters, Peggy, Catherine, Beverly and Rebecca and two grandchildren.

Reginald Locke '48 died November 21, 1993 in Bangor. He served in the U.S. Army in World War II. Reggie retired from the Bangor Daily News.

He is survived by his wife Mary, Director of the International Center for Language Studies at Husson College, two daughters, Mary Sarah Locke, and Marie Locke-Bushe, a son John, and two grandchildren. He is also survived by his brother ***John '48*** and sister Alice.

Milton Barnes '49 ΜΣΧ died June 1, 1994 at Houlton. Milton retired from Madison High School in 1988 where he was a guidance counselor. He served in the U. S. Army in World War II and retired from the Army Reserve with the rank of captain.

Milton is survived by five brothers, Delmar, Donald, Earl, Raymond and Carlton.

Galen Libby '51 ΜΣΧ died April 17, 1994. He was a resident of Brewer. He served in the U. S. Navy in World War II and participated in several Pacific Theatre invasions including Tarawa, Kwajalein Atoll, and Enewetak.

Galen held several accounting and personnel positions during 18 years of employment at Eastern Corporation in Brewer, Standard Packaging and Lincoln Pulp and Paper. He retired in 1985 after fifteen years of service with the State of Maine Audit Department.

He was a member of the American Legion, the Air National Guard of Maine, and the U. S. Air Force Reserves. He was a 32nd Degree Scottish Rite Mason.

Survivors include his wife, Joy, his mother, Olla; son, John, daughter, Judy; and grandchildren.

Parker Edward Cook '59 ΜΣΧ died December 29, 1993 in Waterville. He was employed by Forster Manufacturing in Farmington for three years. He then joined the Maine State Bureau of Taxation where he worked until his retirement.

Parker taught a course in property tax assessment for twenty years at Kennebec Valley Technical College. He was active in town affairs, his church and in professional organizations.

He is survived by his wife, Joanne; son, Kenneth; daughters, Laurie and Pamela, and three grandchildren.

Joseph Perry '62 died May 15, 1994 after a long illness. He was proprietor of Perry's Restaurant in Bangor and later worked at Bangor Paint and Wallpaper. Joe was a member of the Knights of Columbus and the Hampden Historical Society.

Survivors include his son, Joseph, Jr.; daughters, Catherine, Jeanne, Jacqueline, Joanne, and Martha and their families; sisters, Sylvia and Ellen; and his brother, Michael.

Thomas England, Sr. '62 died January 19, 1994 at Biddeford. Thomas was a 32nd Degree Scottish Rite Mason and a lifetime supporter of the DeMolay. He was active in community affairs, serving as past chairman of the Brewer School Board, a member of the Elks and the Lions Club. He was employed as controller for Donovan and Donovan Food Service of Saco.

He is survived by wife, Linda, and sons, Thomas II and William.

Robert Soucie '70 died February 14, 1994 in Boston. He taught business law and computers at Bangor High School. Robert enjoyed horses and was a talented artist. After earning his Bachelor's degree at Husson he went on to earn a Master's in Education at the University of Maine.

Survivors include his mother Edith, sister, Carol Ann Galli, and his special friend, Roland Guerin of Orono.

Gordon Arthur Halpern, Husson Faculty 1967-1972, died December 15, 1993 in Bellingham, Washington. Gordon taught Sociology. After leaving Husson, he became Executive Director of the Maine Children's Home. He oversaw its transition to the Hilltop School, a facility providing high quality education and care to young children. Gordon was very active in the community and had a great love for nature and outdoor sports.

He is survived by sons, Gregory and Andrew, a daughter, Robin, sister, Helen Raffel and a close companion, Priscilla Kutcher.

Ralph "Rick" Leonard '74 ΜΣΧ died December 21, 1993 in Bangor. Rick was employed in the family business, Central Equipment Company of Stillwater. He was active in the United Methodist Church of Old Town. He enjoyed sports and supported area teams.

Rick is survived by his parents, Ralph and Anita Leonard, three sisters, Lynda, Kerri Ellison, Lauri Reichel and a brother, Kent. He is also survived by his grandmother, Mrs. Joseph Leonard and grandparents, Mr. and Mrs. Herbert Sargent.

Dale R. Winslow '78 died in North Berwick at his residence of a heart attack on March 31, 1991. Dale served in Vietnam as a member of the U.S. Army. For the past ten years he was Cash Accounting Manager for the Bailey Corporation at Seabrook, New Hampshire. His wife Jacqueline writes, "Dale was a kind and gentle man - well loved by his family and respected and held in high regard by all who knew and worked with him."

In addition to his wife, Dale is survived by two sons, Earl and Eric, and his mother and two brothers.

David Gardner '79 died March 16, 1994 in Westbrook after a 2 1/2 year battle with cancer.

Survivors include his wife, Doris.

Joan Nason Dimond '80 died November 6, 1993 in Portland. Joan was a resident of North Windham. She was employed by Aetna Life and Casualty in Portland as a Commercial Insurance Underwriter, senior information technology analyst and since 1989 as information technology superintendent.

Survivors include her mother and father, Charles and Phyllis Nason, husband William, daughter Justine, son Benjamin and three brothers and two sisters.

William Stinson Jr. '93 died October 30, 1993 from injuries sustained in an automobile accident in Owls Head. He loved sports and was working in the Pro Shop at the Somerset Resort at the time of his death.

Survivors include his parents, William and Mary.

It's a kindness to all...

When you remember Husson in your will, you not only help ensure the future of higher education, you also ease the financial obligations of loved ones who survive you.

A special way of giving

By including a bequest in your will, you can make a significant contribution to a nonprofit institution such as Husson– the sort of contribution you might not be able to make during your lifetime. In addition, the federal government allows an estate-tax charitable deduction for the full value of your gift, reducing your family's expenses.

A custom-made expression of caring

You can shape your bequest specifically to suit your needs and wishes. You may choose to give all or part of what you own, or give specific items, stocks, bonds, or a gift in trust. Similarly, you may specify a dollar amount you wish to give, or a percentage of your estate. However you choose to give, your bequest will be a memorable act of generosity to Husson and to your heirs.

If you'd like to know more about bequests, let's talk.
We'd be happy to show you the rewards of giving by will.
Call us today at Husson College 207-941-7073.

1920s

Laurence Smith '29 and his wife Marion celebrated their sixtieth anniversary on February 6, 1994. Laurence has retired from a 44 year career with Merrill Bank Company (now Fleet Bank).

He and Marion reside in Jonesport.

1930s

Frances Banks Colpitts '39 and her husband, Keith, celebrated their 50th wedding anniversary in November.

The Colpitts reside in Bangor.

1940s

Emmaleen Willey Lynch '48 '75ETE writes that she retired from teaching at Northern Maine Technical College in May of 1992.

She and her husband Paul reside in Presque Isle.

Norman Powell '48 writes that he and his wife Ruth "celebrated their 40th Wedding Anniversary at a party hosted by their four adult children at the Holiday Inn on Odlin Road in Bangor." The Powells were married April 18, 1953 in Peacham, Vermont.

Norman has retired and lives in Carmel in the house in which he was born.

1950s

Stephen Naas '51 ΜΣΧ and **Rebecca Gould Naas '38** write that they "recently traveled to the Hawaiian Islands to celebrate our 50th wedding anniversary. We were on a Delta Airline tour which called for five nights in Hawaii. This completed our tour of all 50 states."

Stephen and Rebecca were married November 27, 1943 in Savannah, Georgia. He was stationed at Chatham Field, --a pilot in the U.S. Army Air Force.

Clayton Rogers '52 presented a concert recently at the East Winthrop Baptist Church. Clayton is a baritone soloist, organist and pianist. He has retired from teaching business at Brewer High School.

Lucille Kilton Branche '55 ETE writes that she has retired after 21 years as Sales Support Assistant for Metropolitan Life of Rumford, Maine. Her husband Charles has also retired. They spend their summers camping at Cathedral Pines in Eustis, Maine.

Dorothy Abbott '57 ETE retired from Travelers Insurance Company in Syracuse, New York after 28 years of service.

Mary Lou Moran Alley '57 ETE retired August 1, 1993 as Director of Medical Records at Mt. Desert Island Hospital in Bar Harbor, Maine.

Last October, **Penny Day Cassidy '58** and **Eleanor Griffin Heinz '58**, took a two-week tour of several European countries. One of the highlights of their trip was when they visited the former East German village of Wernigerode in the Harz Mountains of Germany. They also visited the former East Berlin along with small towns in Switzerland, Liechtenstein, Austria, Germany and France.

Richard S. Douglas '58 ΜΣΧ has joined the staff of Bar Harbor Banking and Trust. Richard, as Vice President and Trust Officer, will be responsible for the administration of trust and investment accounts for Bangor area clients. He will also manage the trust services office in Bangor.

Richard and his wife Geraldine reside in Milford.

1960s

J. Paul Curtis '60 has joined Bangor Savings Bank as a branch commercial loan officer in the bank's Dover-Foxcroft office.

Harrison Hahn '61 ΜΣΧ was featured in an October 9, 1993 article in the Lewiston Sun Journal. Harrison is the President and Chief Executive Officer at Stephens Memorial Hospital in Norway, Maine. He has been at Stephens for 25 years and has the "longest tenure of any hospital CEO in Maine."

In addition to his professional duties, he has found time to coach little league and to serve as President of the Chamber of Commerce and on the boards of the Oxford Hills Area Development Corporation and the Norway Savings Bank.

Harrison and his wife Bonnie have two children, Charles and Nancy.

John Edgerly '62 ΜΣΧ has announced that he will run for Franklin County treasurer as a Republican. There are two other candidates seeking the republican nomination. John has recently joined Alltown Realty Associates as an agent.

John and his family reside in Farmington.

Kenneth Logan '62 writes from his retirement in West Columbia, South Carolina, that, "I have many fond memories of Husson and hope I can attend Homecoming this year."

Ken retired from the USAF in 1963. After finishing Husson, he taught high school math until his second retirement in 1976.

Gary McEntee '63 ΜΣΧ is employed by the Administrative Office of the U.S. Courts in Washington D.C. He and his wife Donna reside in Fredericksburg, Virginia.

Rod Boutot '66 is a general manager for Prudential Insurance Company. He is responsible for three offices in Queensbury, Saranac Lake and Johnstown, New York.
