VOLUME 2, NUMBER 1

Husson College Exceeds $6 Million Capital Campaign Goal

Leo Loiselle, Chairman of the Board of Trustees of Husson College

Remarks from Board of Trustees Chairman, Leo Loiselle '63, June 9, 2002 at the 3rd Annual Arboretum Tea Party

"In late 1998 we launched Husson's $6 million dollar Legacy of Leadership Capital Campaign. It was designed to enrich the academic and college life of future generations of Husson students.

It certainly has done that and more. Today I am pleased to officially announce that not only have we met our goal of $6 million dollars, we have exceeded it by almost $700,000!

The energy on campus is incredible and the level of generosity by alumni, friends, foundations, and businesses, along with the hard work of faculty, staff, and Husson students, is truly the means by which Husson can serve a new generation of students.

I want to especially thank and acknowledge Husson College President, William Beardsley, who is currently on a four-month sabbatical doing research in Maine forest management and strategic planning for Husson College.

The success of this campaign could not have been achieved without Bill's vision, leadership, and especially his passion for the students of Husson College. A leader takes people to a place they have never been before. Just look around you. During the past 15 years, under Bill's leadership, we have seen tremendous enhancement, expansion, and enrichment at Husson College.

I would also like to acknowledge Dr. Robert Smith who has been appointed acting president. Dr. Smith has been at Husson since 1981 and has been serving as Chief Academic Officer, and the Dean of Graduate Studies. The college is in good hands.

Today we celebrate not only the Arboretum and the success of the Legacy of Leadership Capital Campaign, but also the future of Husson College.

I would like to summarize the success of our Legacy of Leadership Capital Campaign:

- We have enhanced our scholarship endowment and with well over 80 percent of the traditional undergraduate student body receiving substantial financial assistance, Husson continues its time-honored mission of reaching out to students with limited means.
- The new Clara L. Swan Center - a health, sports, and rehabilitation facility that includes the Richard and Alice Trott Fitness Studios and the Kenduskeag Institute, a human performance laboratory.
- Our sports facilities claim professional quality athletic fields. They include the John Boucher Soccer Pitch, the John Winkin Baseball Complex and the Harold Alfond Diamond.
- The current renovation, expansion and renaming of our library, to the W. Tom and Bonnie Sawyer Library, will allow for a larger, more efficient floor plan and an increased collegiate study environment.
- Husson has been gifted a Steinway concert piano and a concert endowment fund by Trustee John E. Kilgore. Entering its third year of concerts, international pianists will

Clara Swan tests out one of the new pieces of equipment in the Trott Fitness Center.

Fitness Center Honors Alumna; Husson Facility Named for Clara Swan '33

By Ruth-Ellen Cohen. Reprinted with permission of the *Bangor Daily News.*

BANGOR - Adjusting her glasses, Clara Swan bent down to examine more closely the curious-looking contraption before her.

"Hmmm ... what do you do on this, I wonder?" she said.

Swan may not be familiar with the latest weight-training equipment in Husson College's new recreation center. But that doesn't diminish in the least her excitement that the building is to be named for her Sunday, on her 90th birthday.

"This is tremendous. I am really honored," Swan said earlier this week during a tour of the soon-to-be-opened facility. Vice President of Husson until she retired in 1973, Swan also served as business education teacher, academic dean and dean of women, as well as women's basketball coach.

Attached to the Newman Gymnasium, the $1 million Clara Swan Center is divided into two areas named for the project's

major donors, Richard Trott of Brewer, who graduated from Husson in 1965, and Hilda Hutchins McCollum of Bangor. Both serve on the school's board of trustees.

The 4,000-square-foot Richard and Alice Trott Fitness Center features cardiovascular, aerobic and weightlifting equipment.

Across the hall is The Kenduskeag Institute, which contains a clinical and research facility. McCollum named the institute after the stream that flows by her home, Husson President William Beardsley said.

Although she has been taking snapshots of the construction progress since groundbreaking last fall, Swan said this was her first chance to tour the inside of the building. She beamed as she looked around the huge, mirror-lined exercise room filled with treadmills, Stairmasters and other apparatus.

"This means that kids don't have to go downtown to pay to use equipment like this," she said.

With Swan, it's always the kids.

That's why naming the center after her seemed entirely natural, said Julie Green, director of public affairs.

"She had a tremendous impact on 30 years of alumni. She knew everybody and she was famous for going that extra mile," Green said.

If she heard through the grapevine that a student was considering dropping out, Swan would encourage him or her to stay, even loan money for tuition, Green said. No matter their problem, students knew the teacher, adviser and mentor was there for them.

"Go to Clara and she'll clarify it," Swan said kids would chant.

"I loved them all," she said. "If a kid's in trouble, it seems to me you've got to help them out."

With her trim, upright figure, close-cropped gray hair and blue eyes bright behind gold-rimmed glasses, Swan looks nowhere near her age. Born in Princeton in 1912, Swan was valedictorian at Brewer High School in 1930 and at Husson College, then known as the Maine School of Commerce, in 1933.

In 1939, after teaching business classes at Mexico High School and Foxcroft Academy, she returned to Husson where she worked for 34 years.

Swan, whose duties at Husson included teaching physical education two mornings a week at the YMCA in downtown Bangor, said calisthenics, balance beam exercises, tumbling, basketball and softball comprised most of the activities.

"There was nothing like this," she said, looking around the room in wonderment. "We never heard of this."

Swan still is promoting physical fitness. Twice a week she leads exercise classes at the Ross Home in Bangor. "You've got to keep these older people moving," she says, according to Richard Trott whose idea it was to name the center after Swan.

Swan has been inducted into the Bangor Daily News Sports Hall of Fame, the Husson College Sports Hall of Fame and Maine Sports Legends Hall of Honors. She received the Maine High School Coaching Association Award in 1992 and was named outstanding business education teacher in the state by the University of Maine.

Down the road, it is hoped that the fitness room will be open to the public, Green said.

Also rejoicing in the new building on Tuesday was physical therapy professor Ben Sidaway, who proudly showed off the Kenduskeag Institute's human performance lab.

The facility contains state-of-the-art equipment so health and physical therapy students and faculty can study the effects of rehabilitation techniques, measure movement and cardiovascular function, and analyze athletic skills.

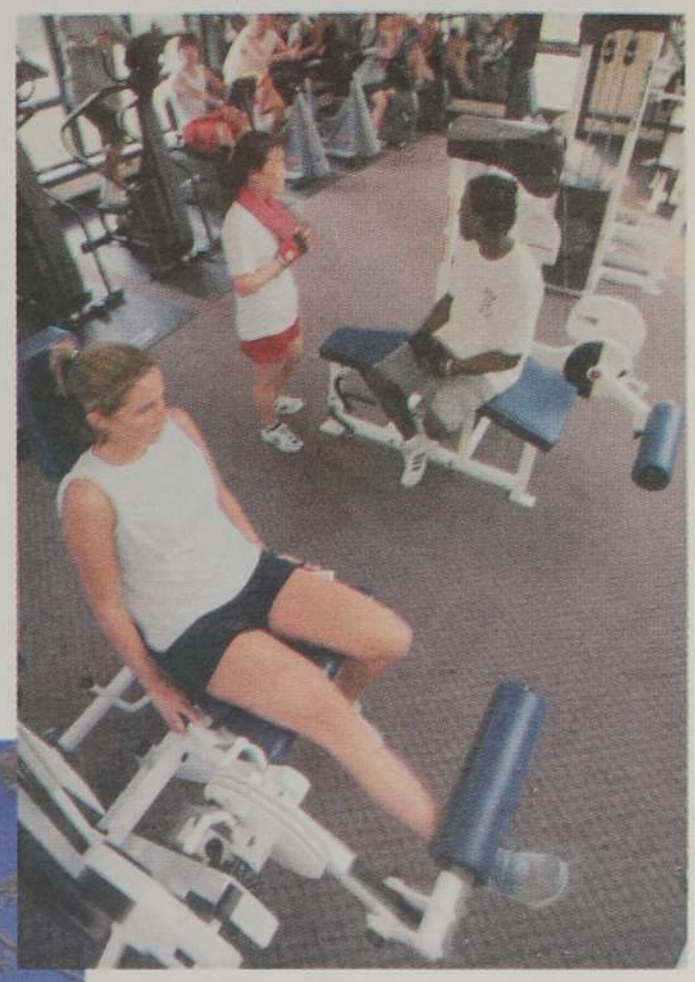

One piece of equipment can be used to help people with neurological damage, such as a stroke or a spinal cord injury, to relearn to walk.

The patient is supported in an upright position by a harness and then is lowered onto a treadmill. Recent research has shown that sensations of the moving treadmill can help the nervous system relearn the coordination necessary for walking, Sidaway said.

Future plans will allow for movement and cardiopulmonary assessment of patients in local hospitals and clinics, Sidaway said.

"There's nothing like this in northern New England," he said. Currently, area patients must travel to Boston or Connecticut for such advanced assessment techniques.

The ribbon cutting ceremony for the Clara Swan Center will be held at 2 p.m. Sunday, April 28.

(CAMPAIGN continued)

continue to provide quality performances for students and the community.

- Husson has established an on-campus genetics research lab and a small marine science education lab on the coast of Maine. In addition, the new human performance lab will provide Husson students with discovery-based learning and research into such diseases as Parkinson's, diabetes, and obesity.

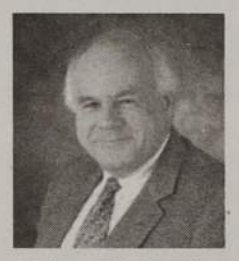

In conclusion, we will continue to build on tradition and invest in the future of our students by providing valuable, affordable education in a collegiate environment. Husson College will continue to prepare students for leadership roles in business, health, education, the sciences, and other professions.

As the largest private educator of Maine students, we are proud of our accomplishments. It is truly a wonderful day at Husson College. Thank you."

The President's Letter

HUSSON

PRESIDENT'S OFFICE
One College Circle • Bangor, Maine 04401-2999

Robert M. Smith
Acting President

Dear Alumni and Friends:

You could feel the excitement on the Husson campus this summer as one project after another came to completion – some of them long planned for, others that came to fruition quickly in the past few months. The campus is now home to a renovated and expanded Tom and Bonnie Sawyer Library, the John W. Winkin Baseball Complex with the Harold Alfond Diamond, the Clara Swan Center with the Richard and Alice Trott Fitness Studio and the Kenduskeag Institute for Human Performance, and a new practice field for Husson's first football team in nearly seventy years. These projects join the John P. Boucher Soccer Pitch and the George W. Wildey Communications Center, both completed in late 2001.

It is a remarkable list — a list of dreams-come-true for the extended Husson family.
Taken together, the new facilities and playing fields add immensely to the look, feel, and experience of the Husson campus. None of this would have come to pass, of course, without the gifts of benefactors, alumni, employees and friends of the College. And so we begin the new academic year — the College's 105th — proud of the past, excited about prospects for the future, and deeply grateful for your wonderful generosity.

2002-2003 promises to be a very good year for the College. This fall there are more students living on campus than at any time in recent memory. The investments in the campus and in campus life noted above are bearing fruit, as are the College's new and growing academic programs. It appears Husson's day school enrollment will be over 1000; and with New England School of Communications students, the total enrollment on campus will be over 1200. All of this is evidence that the value of a Husson education is strong, and for that we have to give full credit to a talented and committed faculty and staff.

Early in 2003, the College will submit a self-study to our regional accrediting body, the New England Association of Schools and Colleges; and a team will visit the campus in April for our decennial accreditation review. This opportunity to pause, examine and reflect on the College's performance will help us set priorities for the years ahead. That priority setting will be at the top of President Bill Beardsley's agenda when he returns from his sabbatical on October 1, 2002. The growth and development Husson has experienced over the past decade are very much the product of Bill's vision and leadership. It has been a privilege to serve in his place these past few months.

We look forward to a great year. If you haven't been to the campus for some time, this is the year to make a visit. You will be delighted with what you see.

Sincerely,

Robert M. Smith
Acting President

The Kenduskeag Institute - A Human Performance Lab

On the 28th of April the Kenduskeag Institute's Human Performance Lab was officially opened. A state-of-the-art research lab for the investigation of human performance has been a vision of Physical Therapy faculty members since the Physical Therapy department was established in 1995. And now, thanks to very generous donations from alumni and friends of Husson College, particularly that from Hilda Hutchins McCollum, Husson has one of the most advanced research labs in New England.

The Human Performance Lab contains very sophisticated equipment capable of precisely measuring many aspects of performance in both clinical and athletic populations. The centerpiece of the lab is a clinical-grade treadmill capable of reliably producing the very slow speeds (down to 0-1 mph) that are necessary to allow gait in neurological involved populations. Surrounding the treadmill is a body weight support system that incorporates a harness and a hydraulic lift that can raise a patient off the floor and gently lower him/her onto the treadmill. Using such apparatus, patients with neurological lesions, such as stroke, Parkinson's disease, cerebral palsy and Down syndrome along with orthopedic patients can practice walking in a very controlled and safe manner. In neurological patients the body weight support system prevents falls and allows patients to relearn the coordination necessary for independent walking without having to bear their full weight. Recent work in research labs throughout the country has established the effectiveness of body weight supported treadmill training in improving gait in patients with stroke and spinal cord injuries.

The benefit derived from treadmill training can be precisely quantified by another high-tech system in the lab. Three video cameras record the movement of the patient and then using sophisticated computer software, a three dimensional kinematic analysis is performed. This gives the researcher a complete description of the linear and angular displacement, velocity and acceleration of any joint or limb of the body. In this way the effect of treatment can be accurately and reliably measured. This motion analysis system has already been used by Physical Therapy faculty and students to study the effect of strengthening the calf muscles on the walking performance of a young boy with spastic cerebral palsy. It has also been used to study the possible improvements in gait of Parkinson's patients following a long-term exercise program with visual cues.

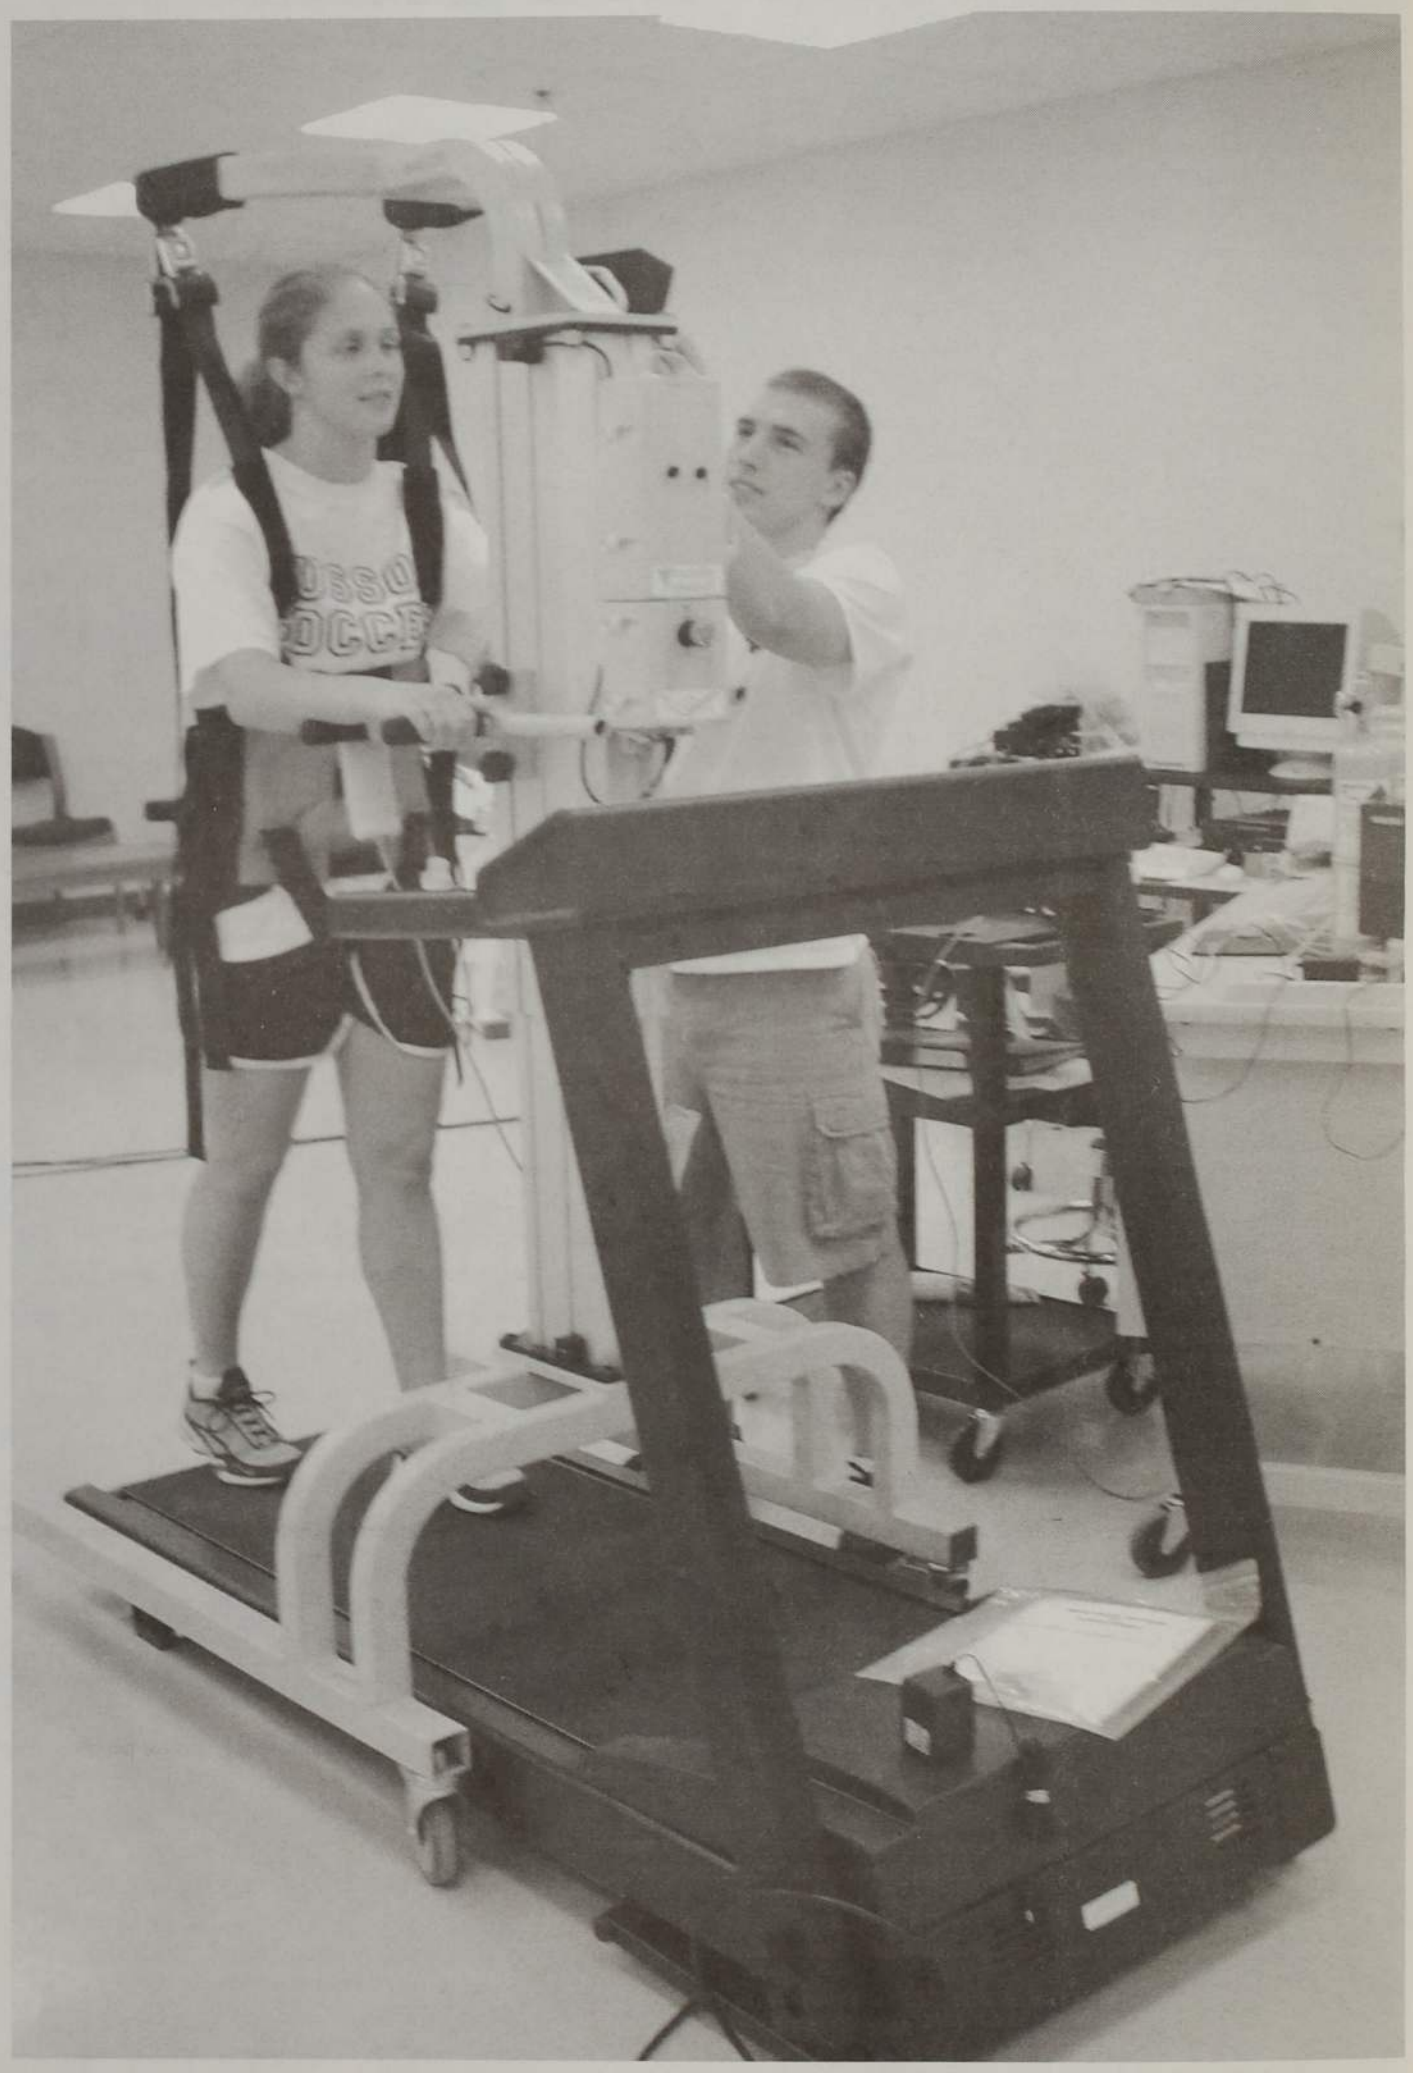

The 3D motion analysis system is also capable of quantifying movement in athletic populations. For example, such systems have been employed at the Olympics to analyze gymnasts and cross-country skiers. Novice and expert golf swings and baseball pitching have also been compared using such a system as is now in place in the Kenduskeag Institute.

To complement the motion analysis system, the Physical Therapy department has moved its electromyography machine down to the Human Performance Lab. This computerized system is capable of recording the minute electrical signals that spread to the skin as a muscle contracts. The system can record from nine different muscles at once. In this way researchers can quantify when and how hard a muscle is contracting. Such information is often vital in examining a patient or when comparing expert and novice athletes.

Thanks to the generous donations, the Human Performance Lab also now contains a very advanced gas analysis system. This is a small-computerized device that is worn on the chest by an athlete, or a patient with cardiopulmonary problems. A mouthpiece allows the system to record the amount of oxygen someone is using on each breath and how much carbon dioxide he or she is producing. In this way the aerobic fitness and metabolism of a patient or an athlete can be carefully measured. The system is also capable of a very sophisticated analysis of the breathing mechanics of patients with pulmonary diseases such as chronic obstructive pulmonary disease (COPD). In addition, since the system is lightweight, it can be worn as the patient performs his or her normal daily activities. Such a system was even worn by an athlete while running the Boston marathon. In addition, the device provides a means by which the effect of an exercise program on a person's level of fitness can be precisely determined.

Finally, the lab also has the latest research bicycle ergometer that enable researchers to carefully monitor the work and power output of athletes and patients performing aerobic and anaerobic exercise tests.

Clearly, Husson College is very fortunate to have such a high-tech lab on campus. The level of measurement sophistication capable of being performed in the Kenduskeag Institute's Human Performance Lab puts Husson College on the map as a regional site of research excellence in human performance. For more information about the Human Performance Lab, please contact Dr. Ben Sidaway sidawayb@husson.edu.

Two Physical Therapy students demonstrate how a patient will be supported in an upright position by the harness and then lowered onto the treadmill.

Husson College Joins With The Thomas M. Teague Biotechnology Center of Maine in Building Jobs for Tomorrow

In November 2001 Husson College entered into a business-building partnership with The Thomas M. Teague Biotechnology Center of Maine in Fairfield. The recently constructed Teague Center is the brainchild of Fairfield Economic and Community Development planners and represents an ambitious and well-directed goal to turn around a gloomy economic picture in Somerset County, which currently has an unemployment rate of 6% and a low per capita income level of $17,000.

The Teague Center is a biotechnology "business incubator" which helps fledgling biotech businesses with low-cost office and lab space, administrative support, grant-seeking assistance, business plan development, market-entry planning, and further assists such companies in seeking support for business expansion and "to market" activities.

Biotechnology has been targeted by the State as a critical sector for expansion in Maine's overall economic development strategy. Lead agency responsibility is assigned to the Center for Innovation in Biomedical Technology (CIBT) and the Biotechnology Association of Maine (BAM). The formulation of a biotechnology industry consensus vision and strategy was initiated in 1990 by CIBT, providing ten years of information and experience as a basis for strategic planning.

Further development was spurred in February 1998 when the 118th Legislature's Joint Select Committee on Research and Development issued Joint Order S.P. 669 identifying biotechnology (among others) as a target for State development. Initial funding for the project included $950,000 received as part of legislation initiated by State Senator Paul Tessier. With the help of U.S. Senator Susan Collins and U.S. Representative John Baldacci, the U.S. Economic Development Administration also provided $642,000. Other sources of support included the Maine Department of Economic and Community Development ($200,000) and local taxpayers.

The common ground between the biotechnology community and Husson is the College's long history as a business education center and its growing strength in health science and supporting science disciplines. The points of connection with Teague are through the Husson Research Institute and the Dyke Center for Family Business.

Additionally, **Dr. James T. Kenny**, Dean of Science and Humanities is a member of the Teague Board of Trustees and is presently helping Teague-associated biotech firms in business planning, grant-writing, and venture capital searches. The Dean reports, "Husson and Teague share a commitment to the growth of biotech and technology commercialization through the cost-effective sharing of resources." He further states, "Maine people and institutions and people must volunteer their time as an investment in tomorrow's jobs and our State's future."

The Teague-Husson memorandum of agreement signed by President William H. Beardsley and Fairfield officials is renewable. The Teague Center officially opened its doors on June 21, 2002. According to Clyde Dyar, Fairfield's Economic and Community Development Director, city officials began construction in August 2001 on the 15,000 square foot laboratory/business incubator building, which is listed as a 501(c) 3 non-profit entity.

As a biotechnology incubator, Teague provides business clients with reception service, express mail/UPS/U.S. mail services, clerical services, office supplies, FAX, tenant access to common areas, parking, janitorial services, building maintenance, security, and public relations services.

Husson will provide Teague Park's commercial tenants with information on business start-up, development planning, business plan preparation, marketing planning, technical support, occupational therapy consultation, and other pertinent data to assist in technology transfer and the long-term commercial viability of Teague Park's incubating, science-based businesses.

British Official Tours Teague Biotech Park

by DOUG HARLOW, reprinted with permission of the *Central Maine Morning Sentinel*

FAIRFIELD--The United Kingdom joined a list of potential partners in biotechnological research Monday with a tour of the Thomas M. Teague park by a member of the British consulate.

Marguerite Meyer, of the consulate's Boston headquarters visited sites in Maine courtesy of the Maine International Trade Center, said Fairfield's economic and community development director Clyde E. Dyar.

"She has been very interested in our biotechnology and with working with us in the United Kingdom," Dyar said. "We'll be providing her with a package to take back with her."

The idea said Dyar, is to add to the list of potential associates in what he called the "incubator" at the Teague park. So far, agreements have been signed or proposed with medical and biotechnological research parks in Quebec, Switzerland and Northern Ireland.

As a so-called business incubator, the teague park will provide lab space for research and development of new products in the biotechnology field, according to Dyar. Once fully operational, facilities in Fairfield will allow research companies to run training programs for people working in various research fields.

"An incubator brings businesses in to do research, be it cancer research or other medical research," Dyar said of the concept. "We offer lab space for them to do their research in. They use the lab to test for everything including a cure for cancer."

Clients also will learn how to set up production and sales and how to run a new business in the global economy, he said.

Jackson Laboratories of Bar Harbor was the first to sign up with the Fairfield park. They began paying rent -- $30,000 per year -- on July 1.

Dyar said there is room for office and lab space for six additional research companies. He said he expects space to be filled within 18 months.

These emerging companies will be instructed in Fairfield by professionals Husson College, the University of Maine system and the Small Business Administration.

Fairfield officials said the hope associated with such an incubator is that the emerging companies will build and settle in the Fairfield area with their new business.

Dyar said Fairfield has set aside 20 acres for such development.

The Town Council voted in April to authorize borrowing and acceptance of $800,000 for the new biotechnology park. Town officials said the money is the final installment of a $2 million bond package approved by voters last fall for construction at the park on Western Avenue next to Kennebec Valley Technical College.

The building is owned by the Fairfield Economic Development Corp.

State Rep. Paul Tessier, D-Fairfield, is president of the corporation. Former Town Council William Hagerty is vice president.

Both were on hand for the tour Monday.

Teague Park will provide research opportunities for Husson students and faculty in the biological and health sciences and practicum opportunities for the College's business students. Teague Park will also provide Husson office space and office equipment, receptionist support, and a teleconferencing capability.

Jointly, Husson and Teague Park will develop a center for technology commercialization. The goal of the center will be to provide knowledgeable professionals capable of acquisition and integration of advanced science and technology into viable businesses. The team will offer perspectives on business strategic planning, market research and opportunity assessment. Objectives will include accessing federally funded technologies i.e., the human genome project, NASA and federal laboratories and technology transfer opportunities from universities and industry. Good laboratory practice labs (such as DNA recombinant requirements) will be provided by the Husson Research Institute.

ZF LEMFORDER: Where One Familiar Road Leads

by Dean Lawrence Lunt

Sometimes the road to senior management runs through unexpected places. For managers at the ZF Lemforder plant in Brewer, the road has passed through such places as the potato fields of Aroostook County, the grocery aisles of Shop 'n Save and a general store in Glenburn. And for some, it also had one common stop — Husson College.

Four top managers and executives — Jim Stacey '77, Albert Allen '86, Kevin Kenny '83 and Larry LeVasseur '87 — earned degrees at Husson before embarking on successful career paths that led them to ZF Lemforder Corp., part of the powerful Germany-based ZF Group, one of the world's largest independent suppliers of automotive components. The Brewer plant manufacturers ball joints and stabilizers for the nation's leading automakers.

But the Husson connection does not end at the corner office. At least nine other people at the Brewer plant are either Husson graduates or are attending Husson, including Michelle West, Christine Knapp '98, John Williams, Kathy Williams, David Sluka '79, Charity Frey '98, Rick Smith and Robbie Beaton '95.

"I feel if I did not have the education I had [at Husson], I would not be in the position I am in now," said Robbie Beaton, class of 1995, the plant's training coordinator.

Kevin Kenny, plant manager

Running the show at the Brewer plant is **Kevin Kenny '83.**

Kevin Kenny walks the plant floor like the uncle at a family reunion, shaking a few hands, yelling out a few "how you doing's" and smiling a lot. Part of his — and ZF Lemforder's — philosophy includes a high regard for employees. Kenny believes employees are "stakeholders" and should be treated as such. He also believes that the manufacturing industry in general needs to institute a broader definition of "customer service" to encompass employees as well as external customers. Meaning, that if everyone is treated like an important customer, internal service and respect improve throughout the organization.

While standing on the floor, Kenny turns to one equipment operator and asks her: "You are a customer, right?"

"Yes," she says, with a smile.

Kenny's broad definition of customer service is not surprising given his winding route to the corner office.

Kenny was born and raised in New York. Unsure about college and not having any other plans, he joined the United States Air Force in 1975. He was stationed in Texas, Oregon and Charleston, Maine, working on a small team maintaining generators at radar installations.

He left the Air Force as a Sargeant in 1979. By this time, he was married and his first daughter was soon on the way. He also set a new goal: a college degree.

He decided to attend a vocational school for two years and then head to Husson. "I liked Husson because of its reputation and the fact that my credits were transferable," Kenny said. "It was also a smaller school that didn't have lecture halls with 300-plus people. I enjoyed the head-to-head, the direct interaction with professors. '

Like many at Husson, Kenny was a nontraditional student. He lived in Bangor with his young family, attended school full-time and worked 35 hours or so a week at the local Shop 'n Save. He and his wife, Vicki, managed their schedules to make ends meet and achieve their goals.

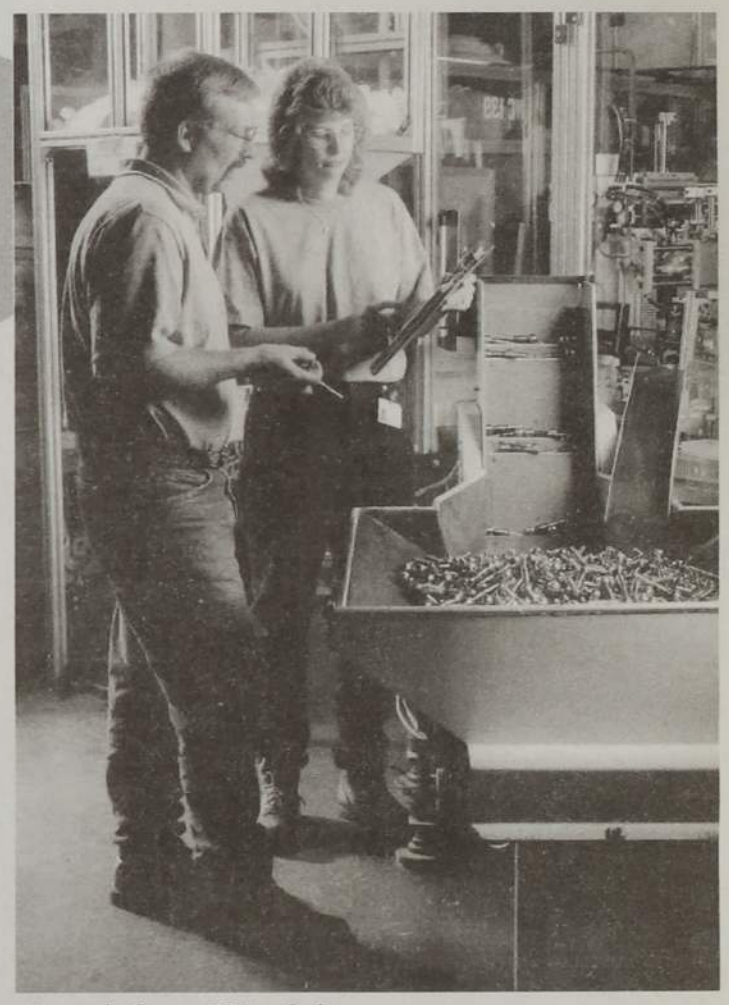

"Looking back, it wasn't painful at all," he said. "We were both committed and we did what we had to do to make it work."

After graduating with high distinction, Kenny headed north to Great Northern Paper Company to work as a financial analyst, learning such skills as return on investment analysis.

He returned to Bangor in 1986 to work at a smaller company, allowing him to develop broader skills and take on more management-type duties.

Then in 1991, he made an even more dramatic switch — he bought a general store in Glenburn.

Over the next seven years, he and Vicki doubled Village Variety sales to about $2 million and employed 16 people.

Out on the floor at ZF Lemforder

"I really enjoyed it a lot," he said. "It was a neat experience, especially if you like to meet people and talk to people. I was almost like the mayor; I think I knew everyone."

But by 1998, he and Vicki had taken the store as far as they could without taking the next step — adding more convenience stores. Yes, he had established a structure that allowed him to reduce his original 60 to 70 hour work weeks, but he didn't want to expand further. Instead, while he would miss working with his wife, he wanted a job with less direct responsibility. He sold the store.

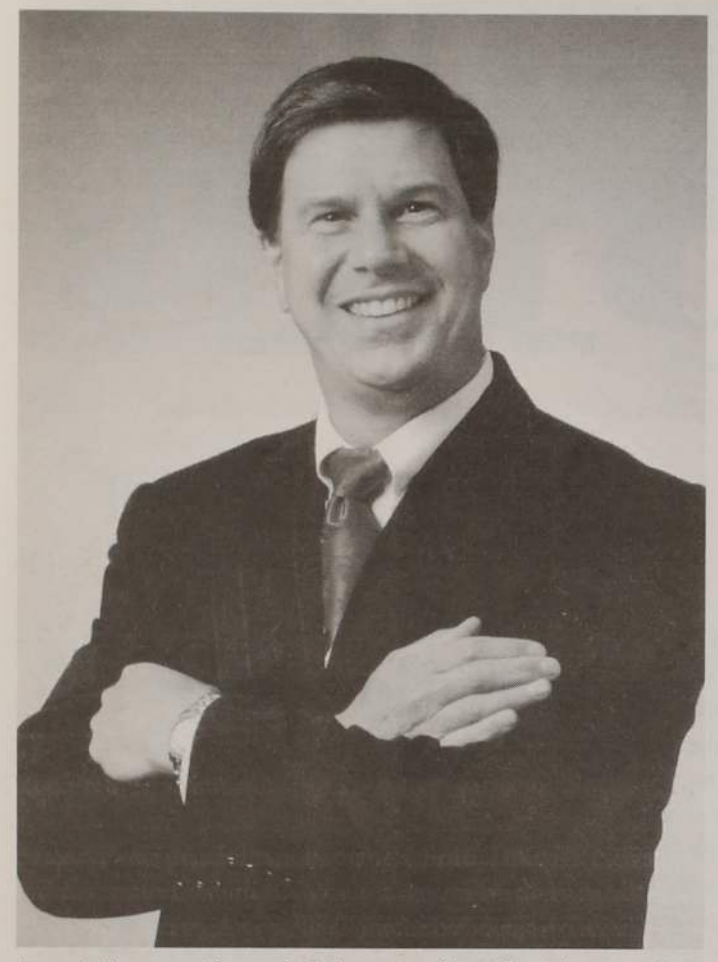

About a month later, in June of 1998, he started at ZF Lemforder as a cost accountant; a job that seemed to offer what he wanted — a good company and no ownership pressure. That didn't last long. By January of 2000 he became plant manager, assuming responsibility for the plant's operation, including profits and losses.

He had moved from chatting with customers buying a newspaper and milk to devising strategy for a international company, but he still employed a vision of customer service shaped at the general store.

"It has been good," he said. "I feel very fortunate to have had the experiences I have had."

THE BREWER PLANT basically makes ball joints and stabilizers for major automotive makers and makes plastic pieces using an injection molding system. The plant, part of the ZF Group North American Operations, Chassis Division, employs about 350 people and generates sales of nearly $100 million.

The interior is brighter than the stereotypical manufacturing plant, with blue, red, green and yellow pipes and beams providing a splash of color high above the high-tech machinery. At one machine, Margot Higgins monitors the automated process of making a stabilizer. The machine takes a housing (a metal rod with two closed loops at each end) and uses robotic arms and other methods to move it through several manufacturing steps — inserting a ball stud, attaching a plastic race, applying grease, attaching a sealing boot and applying clamping rings — to make a stabilizer that will end up in a Dodge Caravan. No human hand touches the part until Higgins takes the piece and preps it for shipping. Similar scenes play out across the floor, 24 hours per day, five days per week. The 110,000-square-foot plant produces an average of 80,000 parts per day.

James A. Stacey, president and chief operating officer, North American Chassis Division

Preceding Kenny as plant manager was Maine born and bred **Jim Stacey** '77, now president and chief operating officer of the Chassis Technology Division. Stacey oversees nine manufacturing plants, including Brewer, and approximately 1,750 people who generate sales of nearly $850 million. Stacey recently moved from Maine to Michigan, closer to the heart of the nation's automotive industry. Like Kenny, Stacey took a long route to the executive chair.

Stacey was born on a dairy farm in the tiny Waldo County farming town of Jackson, although his farm days ended at 7 when his father sold the dairy herd and became a long-haul trucker.

"It was very rural, it was hard work and we had no money," Stacey said. "But the neighbors didn't either."

Stacey was always a hard worker and not overly interested in school. As a kid, he cleaned chicken coops for 50 to 75 cents per hour. At 15, he worked at a factory in Brooks that made steel farm equipment.

After an aborted attempt at becoming a commercial pilot left him with no plans, an expired draft deferment and a low draft lottery number, he joined the Air Force in 1972.

The Vietnam War ended a short-time later, and Stacey spent his tour at Okinawa and Japan doing communications intercept work.

When he got out in 1975, he looked into Husson.

"Husson had a very good reputation," said Stacey, whose brother had attended the college. "Husson was considered more hands on with a more practical approach that would be more applicable to an everyday job, whereas [other universities] were more theoretical by reputation. I have always been a hands-on, practical guy and that appealed to me."

It wouldn't be easy. Stacey drove from Jackson to Husson each day and worked at a full-time job.

"I was married with two kids at home and I worked a full-time job," he said. "I worked the third shift at a fertilizer plant in Brooks. I would work that shift from 11 at night to 7 in the morning, go home take a quick shower and then drive the 45 minutes or so to Bangor to take classes. I would then drive home to sleep for a couple of hours and go back to work at the plant."

It was a long grind, but worth the effort.

"Graduation Day was a very emotional day," he said. "I remember standing there in the building at Husson and getting the cap and gown on and all the people were standing around and all the parents and all the family was making a big fuss of everyone. This photographer, probably for the *Husson Ledger*, took a photo and when it appeared, the caption under it said something like, 'I finally made it!' And that is how I felt. It had been a long road."

Armed with a college degree and graduating with high honors, Stacey went to work at a smoke detector manufacturer in Brewer. After that plant closed, he took a job in Belfast and finally landed at Lemforder in 1987 as materials manager. Among other duties, he was in charge of finding American suppliers. He then began to rise through the ranks.

He was named plant manager in 1995, and after several more promotions became president and chief operating officer in 2001.

Despite subsequent success, his first major promotion still stands out.

"The promotion to plant manager was probably the most exciting promotion I have ever had," he said. "Growing up and going through school, I never even dreamed of having that level of job for a global company with 40,000 employees. That was just not something I saw."

Maine blood runs thick in **Albert Allen** '86.

Albert Allen, vice president and chief financial officer, North American Chassis Division

He was born and raised on the legendary potato fields of Aroostook County — "a good honest living" — and worked on a farm that has been in his family for four generations. His parents still live there.

Leaving Maine — at least for very long — was not on the agenda. Staying close to his family guided his college decision and ultimately his career.

"I am here because I want to be," he said. "And it is all because of the family. I do hunt and fish and all that, but if you had to get down to the root of it all, it is because of the family."

However, the family farm was not part of his future. He graduated from Presque Isle High School in 1981, and was faced with the need "to do something productive." He attended a vocational school before transferring to Husson College his junior year. He graduated with highest distinction and took a job at Arthur Andersen in Boston for five years.

"Husson provided a strong technical business education," he said. "That sound technical side helped me enormously and helped me live up to the expectations of the people who hired me — people who typically hired from colleges like BC and Notre Dame and those types of places."

Still, he never planned to stay in Boston.

"We (he and his wife, Denise) had a blast while we were down there, but we didn't have any intention of staying," he said. "From the beginning the plan was to come home and raise a family."

That move came in 1991 when he accepted a job with an Auburn-based plastics company. He commuted from Bangor to Auburn, which wasn't too bad until his son was born, "then it got old."

He took another job in the Bangor area before being recruited to work at ZF Lemforder as plant controller in 1994. He eventually became vice president and chief financial officer of the North American chassis division in January 2000.

ZF Lemforder has allowed him to stay in Maine with a great job and at a company with an exciting future: "We are in a very, very substantial growth mode."

And he remains proud of his home state.

"We think the people are what brings the success here in Brewer as much as anything," he said. "Yankee ingenuity has really helped drive this place."

Also helping drive ZF Lemforder is **Larry LeVasseur** '87. Like Albert Allen, LeVasseur was raised in The County, learning the same values and fundamental lessons of hard work.

Larry LeVasseur, plant controller

LeVasseur's father managed three service stations for the Maine Potato Growers and his mother worked as a nurse in Presque Isle. LeVasseur worked at his father's service stations, but unlike some of his executive co-workers, he decided early that reaching his goals would require a college education. LeVasseur was a good student with a natural mathematical ability who pulled down good grades at Presque Isle High School. He wanted a career to capitalize on those skills. His guidance counselors and local mentors recommended Husson College.

"Husson was a small school and the school was more one-on-one with teachers: they were very accessible," he said.

The one potential obstacle LeVasseur faced was money. So, starting in high school he worked 35 hours per week at the local Shop 'n Save to bankroll his education.

While attending technical school for two years he often worked split shifts sandwiched around the school day. At Husson, he continued to self-fund his education, typically working four nights a week, from 10 p.m. to 6 a.m., and then eating breakfast before heading off to classes.

It all paid off. Before graduating, he received six job offers and eventually started at a local accounting firm.

"Husson was very instrumental in bringing businesses to the school to meet the students; they certainly were very helpful to the students in getting jobs," he said. "I think everyone in my class had a job before actually graduating."

Albert Allen recruited LeVasseur to ZF Lemforder in 1996.

LeVasseur also spent a few years at Brewer Automotive Components, a ZF Lemforder joint venture company, before returning to ZF Lemforder in 2000 as plant controller. Like Allen, he expects to stay in Maine and is planning to build a new house in Glenburn with his wife, Lynn.

Clearly, Kenny, Stacey, Albert, LeVasseur and their fellow Husson graduates all followed different roads to success. But for all these men and women, whether they started out in the chicken coops of Waldo County or the potato fields of Aroostook County, Husson College provided the educational tools to help them reach a world class destination — ZF Lemforder.

"The company is top notch," said Robbie Beaton, the training coordinator. "And as far as competitiveness, we are the best."

Campus Achievements & Events

Snowe and Collins Announce $680,872 Grant to Husson College to Relieve Nursing Shortage

WASHINGTON, DC - Senators Olympia Snowe and Susan Collins today announced Husson College in Bangor will receive $680,872 over three years in funding from the Department of Health and Human Services (DHHS) to encourage training in nursing. The grant will be used to fund Husson's Distance Education Rural Primary Care Program. The funding comes as part of a $30 million initiative announced by Secratary of Health and Human Services Tommy G. Thompson, part of a concerted Administration effort to ease the nation's nursing shortage.

"We are very pleased that Secretary Thompson and the Administration are making this crucial investment in nursing training. There is a pronounced shortage of nurses throughout the nation. The funding accounced today will be used to provide the access and encouragement qualified students need to pursue careers in nursing, where they can make a difference one life at a time," said Senators Snowe and Collins in a joint statement. "Husson College is committed to this important field, making them a clear choice for this grant. Through Husson's distance education program, all of Maine will benefit from this funding."

George L. Case, MSN and FNP-C at Husson, expressed to the Senators the college's reaction to notice of this funding. "We at Husson are excited about the opportunities this provides for improved access to primary care services in rural Maine communities and access to graduate education for nursing professionals, without the cost and time commitments of travel. This grant demonstrates Husson's continued commitment to innovate and initiate programs that meet the needs of not only our students, but the Maine communities that they come from and return to."

The funding will be used to plan, implement, and evaluate distance education curriculum, which would increase the number of advanced practice nurses providing primary care in the state of Maine. Maine has a significant rural environment, presenting barriers both for residents to access primary health care and for nurses to access graduate, primary care nursing education. Husson will graduate a minimum of 12 FNPs a year with at least 8 practicing in rural, medically underserved Maine communities. Increasing the number of graduates will be achieved by converting from exclusively using the traditional classroom mode of teaching to a system of integrating interactive video and distance education methods.

Husson "Home" to 2002 Senior Little League World Series Teams

Husson College housed and fed nine Senior Little League World Series teams for the 2002 SLL World Series held here in Bangor from August 11 - 17. The nine teams were from Moscow, Russia, the Philippines, Curacao, Ontario, Canada, Spring Hill, Texas, Boynton Beach, Florida, San Pedro, California, South Bend, Indiana, and a team from New Jersey. A total of 170 players and coaches participated in the World Series. The players and coaches all lived in Carlisle Hall for the week and enjoyed practicing in the new indoor hitting tunnels and used the pool to cool off during the heat wave that was here that week.

Congressional Candidates' Forum Held at Husson

By Jeff Tuttle Reprinted with permission of the *Bangor Daily News*

BANGOR - Losing the coin toss to determine who would begin Wednesday's candidates forum sponsored by the Bangor Region of Chamber of Commerce likely came as no surprise to 2nd Congressional District hopeful Mike Michaud.

The East Millinocket Democrat and labor union candidate already knew that just after the morning forum, the U.S. Chamber of Commerce would hold a news conference to endorse his opponent, Republican Kevin Raye.

The pending endorsement didn't stop Michaud from using the local forum to release his economic development plan for the district, where workers have been put at a disadvantage by trade agreements that favor lower-cost manufacturers outside the United States, he said.

"Anyone who has watched their neighbors who have lost their jobs, load up a U-Haul and move their families out of Maine as I have done, knows when it comes to trade our congressman must insist ... that the rules of the game must be fair," said Michaud, who blasted Congress for granting President Bush fast-track authority to negotiate international trade agreements without congressional revision.

Raye, a former chief of staff to U.S. Sen. Olympia Snowe, said - contrary to Michaud's claims - the presidential authority was necessary to improve and expedite trade deals.

"It is crucial for the future of America for our president to have the ability to negotiate agreements," said Raye, noting that Congress must still approve or reject any trade deal.

Raye and Michaud will face off on Nov. 5 to replace U.S. Rep. John Baldacci, who is running for governor.

Both candidates had their share of supporters at the morning forum, which drew about 120 people to the Dyke Center for Family Business at Husson College.

Raye told those in attendance that his top priority was creating jobs in the district. That means improving its transportation and telecommunications infrastructure, he said.

"If we are not connected, our economy will not be corrected," said Raye, who lives in the small Washington County town of Perry.

Raye also said he would be like a "dog on a pant leg" to attract more federal funding for research and development at the state's universities, hospitals and laboratories.

Michaud's plan called for a U.S. Transportation Department study of an east-west highway extending from Montreal through upstate New York, northern New England and to Halifax, Nova Scotia.

The plan also called for extension of I-95 and an expansion of Amtrak passenger rail service to Lewiston and the western mountains.

After the forum, about a half-dozen copies of Michaud's 10-page plan were left behind on the empty seats, and local Chamber officials weren't picking a winner.

"I don't think the people in the 2nd District can go wrong," said Nelson Durgin, a member of the Bangor Chamber's board of directors.

Officials with the U.S. Chamber of Commerce apparently felt differently, later vowing to back Raye, whom they said would be "an effective legislator who will vigorously support businesses ... on critical issues like taxes, health care and legal reform."

At the endorsement event at the Bangor Letter Shop, Raye took Michaud to task for his record in the Legislature, which Raye said must shoulder the blame for many of the state's economic woes.

"[Michaud] has had an opportunity to show leadership in these areas, but he hasn't chosen to do that," Raye said.

Michaud defended his tenure in Augusta, and said he wasn't surprised that Raye received the U.S. chamber's nod.

"He wants support from other Washington insiders, that's fine," Michaud said later in an editorial board meeting at the Bangor Daily News. "I'll win support from Maine businesses and Maine people."

Enrollments for NESCom

The New England School of Communications will enroll over 200 students for its Fall Semester. This will be the 2nd full year in the new Communications Center. One hundred entering freshmen will be seeing a lot of new "state-of-the-art" equipment added during the summer.

NESCom begins its 21st year with students majoring in radio, television, sound recording, multimedia and advertising/public relations. Internships, an integral part of the program have placed students all over the state in a variety of career options. This has become a great stepping stone for future employment.

Summer camps

Although the students left in May, the campus was extremely busy this summer with our 2002 Summer Camps. From May 31 to August 20 over 20 camps, conventions and institutes were held including, Rainbow Girls, Girls State, Health Camp, Team Basketball, Cheering, Maine Media, Baseball, Soccer, All Sports, American Field Service, Senior Little League World Series, School Nurses Institute, Basketball and the Unorganized Terrirories Education Conference.

Poster presentation (international meeting)

VASSILAKOPOULOS T, G. DECHMAN, M. KEBBEWAR, and SNA HUSSAIN. Regulation of muscle nitric oxide synthase expression and activity during chronic exercise training. American Thoracic Society Meeting Atlanta, May 2002.

Coach **John (JK) Kolasinski** of Husson College has been named the NAIA Region X (Northeast) Baseball Coach of the Year. He had previously received the same honor following his 1994 season. Kolasinski is also a finalist for the NAIA National Coach of the Year.

Husson's LaMarche Attends National Human Genome Research Institute

Dr. Paul Henri LaMarche, M.D., Executive Director of Husson's Science Research Institute was invited to attend the recent National Human Genome Research Institute at the National Institutes of Health in Bethesda, Maryland. The annual Institute updates college faculty on the latest developments in genetic technology, medical genetics, gene therapy, as well as ethics and grant writing skills.

Participants also were able to experience the latest laboratory genetic technologies and research. "The Institute is significant in that one attends by invitation only and this year the faculty were allowed to bring one student from the college and Elizabeth Sherwood from Hampden accompanied me," said Dr. LaMarche.

Ben Sidaway PhD has had a paper published in the European Journal of Applied Physiology, 2002, Vol. 86, 428-434.

The title of the paper was: "Acute effects of stretching on the neuromechanical properties of the triceps surae muscle complex."

Co-authors were Dr. Andrew Cornwell and Dr. Arnold Nelson. Dr. Cornwell is at UCLA while Dr. Nelson is at Louisiana State University.

Sidaway is currently working on four experiments with students from the Physical Therapy department:

"The influence of varying frequencies of verbal and visual feedback on motor skill learning."

"The long-term effects of visual cues on the walking ability of patients with Parkinson's disease."

"Whether or not the length of a cane influences the accuracy of the estimation of step height."

"Can the strength of the ankle dorsiflexors be increased with mental practice?"

Hello, or Bula from Fiji;

I have just returned from Fiji, Australia and Hawaii. I have taken some additional photographs for our Business and Culture website. The purpose of this website is for use in classes and presents the interrelationship between business and culture. It is imperative for students to be familiar with cultural norms in order to do business in those cultures. The website currently has information on the history, economy, and business of Fiji and Australia.

I have also finished a chapter of a book which will be published in January-February titled: *Culture, Gender and Nutrition*. I am first author. Dr. Richard Cook is second author (the nutrition part). Best regards, **Cristanna Cook**

In 1966, Clara Swan hired **Bill Read** to teach business at Husson. This fall, he begins his 37th year as a faculty member. Bill and **Professor Kenneth Johnson** have the distinction of being the only two current faculty members who began their careers at the downtown campus at 157 Park Street. As Bill puts it, "I have known all the Presidents!"

In 1968, Bill approached President Chesley Husson with a proposal. He was a member of the North Atlantic Regional Business Law Association and he asked Chief to consider publishing a journal. He had discussed it in detail with the leadership of the organization and they were excited about the possibility. "It was the easiest sale I ever made" says Bill. "Chief gave me carte blanche."

Dr. Ronald Anderson, a professor of Law and Government at Drexel University and a renowned figure in Business Law circles agreed, at Bill's behest, to write the first article for *The Business Law Review*. His participation lent credibility to the publication in the beginning. Bill is currently working on Volume 35!

As Editor in Chief, Bill receives a number of submissions from lawyers and professors throughout the United States. He reviews them for publication and submits the most promising to his editorial board. The board members, who are on the faculties of such schools as Bentley, Boston College and the University of Connecticut, approve the final selections for publication. It is a "refereed and indexed journal" and as such is an important publication for professors on the "tenure track."

The Business Law Review is printed by the Western Newspaper Publishing Company of Indianapolis, Indiana; a firm specializing in law publications. It has a circulation of 660 in the United States and Canada; made up mostly of Law Libraries, Judges, Professors and Lawyers. The 80 or so members of the North Atlantic Regional Business Law Association receive the publication as part of their membership benefits.

The Business Law Review is a well respected publication and Professor Read receives many requests for permission to quote articles in major law texts. It is a benefit to Husson College as it gives us recognition nationally in the field of Business Law. It also helps in the accreditation process to be one of the sponsors of this prestigious publication.

Bill Read's goals for the publication are the same as his goals in the classroom: excellence. To be the best. To make a serious contribution to his chosen profession.

Website Offers Husson Alumni Options For Job Seekers

The Husson College Office for Career Development & Employer Relations has recently developed a full service relationship with MonsterTRAK.com. MonsterTRAK is the nation's largest job posting website for college students and alumni. Instead of looking for jobs in the career center's job book or on the bulletin board, alumni and students can now search and apply online for jobs. To register as a job seeker you need to select Husson College from a list and enter our password, which is "husson" [without the quotes.]

For Employers

If you need to hire college students or graduates, MonsterTRAK is a great resource. For only $25 you may post jobs to recruit Husson students exclusively. There are 21 Maine colleges using MonsterTRAK and you can post your job openings to all of them for $195. Jobs posted to more than 1300 MonsterTRAK colleges nationally will cost you only $395. Full time job postings remain online for 28 days. These fees are extremely reasonable when compared with print media, and they specifically target college students and graduates. When Husson College is listed as the referring school, a small portion of the fee comes back to Husson College to improve our services to you and our students. Some non-profit internships and education jobs are free to post online. Jobs may be called or faxed in toll-free: by phone 800-999-8725; by fax 877-999-8725.

Be a Mentor to a Student

MonsterTRAK also has a great feature for alumni who want to help current students get past the confusion surrounding career choices. They call it "Career Contact & Alumni Network." If you are willing to be a mentor, browse the website at www.monstertrak.com or give me a call to ask for more specific directions. For any career help you may contact me at:

Bud Vassey
vasseyb@husson.edu
207-941-7104

Richard E. Dyke '58 flew in to speak at the May 23rd Dyke Center for Family Business Luncheon Series. His presentation was "The Three Most Important Things for Any Business: Cash Flow, Cash Flow, Cash Flow."

NEASC ACCREDITATION ANNOUNCEMENT TO THE HUSSON COMMUNITY

Husson College will undergo a comprehensive evaluation visit April 6-9, 2003, by a team representing the Commission on Institutions of Higher Education of the New England Association of Schools and Colleges.

The Commission on Institutions of Higher Education is one of eight accrediting commissions in the United States that provide institutional accreditation on a regional basis. Accreditation is voluntary and applies to the institution as a whole. The Commission, which is recognized by the U.S. Department of Education, accredits approximately 200 institutions in the six-state New England region.

Husson College has been accredited by the Commission since 1974 and was last reviewed in 1993. Its accreditation by the New England Association encompasses the entire institution.

For the past year, Husson College has been engaged in a process of self-study, addressing the Commission's Standards for Accreditation. An evaluation team will visit the institution to gather evidence that the self-study is thorough and accurate. The team will recommend to the Commission a continuing status for the institution; following a review process, the Commission itself will take the final action.

The public is invited to submit comments regarding the institution to:

Public Comment on Husson College
Commission on Institutions of Higher Education
New England Association of Schools and Colleges
209 Burlington Road
Bedford, MA 01730-1433
E-mail: cihe@neasc.org

Comments must address substantive matters related to the quality of the institution. Comments will not be treated as confidential.

Written, signed comments must be received by April 9, 2003. The Commission cannot guarantee that comments received after that due date will be considered. Comments should include the name, address, and telephone number of the person providing the comments.

The commission cannot settle disputes between individuals and institutions, whether those involve faculty, students, administrators, or members of other groups. Individuals considering submitting complaints against an affiliated institution should request the separate Policy and Procedures for the Consideration of Complaints Made Against Affiliated Institutions from the Commission Office.

Husson Officially Joins NCAA

by Pete Warner
Reprinted with permission of the *Bangor Daily News*

Husson College of Bangor, which for the last four years has been a provisional member of the NCAA Division III ranks, has been granted active membership status effective September 1.

BANGOR DAILY NEWS PHOTO BY GABOR DEGRE
Receivers on the Husson College football team perform ball-handling exercises Thursday during the team's first practice session on the Bangor campus. The Braves have resurrected football, but won't play any games until 2003.

Beginning this academic year, Husson will be eligible to participate in NCAA Championships. Membership also enables Husson to have a vote at the annual NCAA Convention.

"I am extremely excited for Husson because this opens up opportunities for our students and the school which we didn't have in a single affiliation," said Husson athletic director Pam Hennessey.

Husson also is a Division II member of the NAIA and will retain dual membership in both organizations.

"It is particularly important for football and field hockey [to be an NCAA member] because competition [in those sports] in the Northeast is not available in NAIA," Hennessey explained.

Husson, which plans to field its first varsity football team in more than 50 years next year, began practicing Thursday afternoon under head coach Gabby Price.

PART 3 クリエイティブな練習

第12章 最大限有効な室内練習

ジョン・ウィンキン

JOHN WINKIN／監督歴42年。コルビー大（1954～74年）、メイン州大（74～96年）で通算943勝670敗、65年コーチ・オブ・ザ・イヤー、86年レフティー・ゴメス賞受賞、全米野球コーチ協会殿堂を含む3つの殿堂に名を連ねる。ハッソン大スポーツリーダーシップ研究会評議委員。

私は50年以上、コーチを務めてきました。その経験を基に、プレシーズンの室内トレーニングの進め方を説明します。プレシーズンは天候の影響もあり、室内での練習がメインになります。私たちの最初のゲームは、春休みの遠征試合です。既に数試合実戦を重ねてきたチームと、着いたその日にすぐゲームをしたこともあります。遠征から戻ると、グラウンドや天候の関係で、再び室内でのトレーニングを続けるということも珍しくありませんでした。

室内練習場はフットボールチームなど他のクラブも使用するので、使用時間が限られています。また、練習時間は一定ではなく、90分、120分、時には6時間ということもあります。そのため、練習のプランニングが難しく、コーチは常にプライオリティー（優先順）を考えなければなりません。練習の一つひとつが最大の効果を発揮するよう、目的を明確にします。そして、練習を、プランニング、オーガナイズ（編成）し、実施するのです。

時間の制約のほかに、スペースの制約もあります。目的を達成するには、スペースを有効に利用しなければなりません。私が常に心掛けているのは、次の3点です。

1．チームを向上させるためのプライオリティーを確認する
2．練習をうまくオーガナイズする
3．スペースを有効に利用する

プレシーズンに備え、室内練習をプランニングするとき、いつも二つのことが心配になります。一つは、室内練習がレギュラー獲得のためのトライアウトの機会になっているか、ということです。以前は、大学ではトライアウトは秋のシーズンが最適だと考えていたので、そのように思わなかったのです（高校では、優秀な選手は他のスポーツにも参加して

Husson Sports Fellow and Assistant Baseball Coach John Winkin has received word that his most recent book is being published in Japan. Coach Winkin and Jerry Kendall are the editors of *The Baseball Coaching Bible* which is in its second printing in the United States.

The Japanese publication, *Baseball Clinic*, is publishing an article from the book in each issue. *Baseball Clinic* is a highly respected journal circulated throughout Japan.

Class Notes & Missing Alumni

'38

Mary Rolerson Grinnell '38 recently wrote a letter to **Clara Swan'33 ETE** congratulating her on the new Fitness Center at Husson. In it, she recalled her school days at the Maine School of Commerce on Columbia Street; classes with **Millard "Bud" Foss '40 ΜΣΧ** and Clara, memories of the famous downtown "shoot-out" with the Brady gang, and her friends and classmates, **Lurlene Folsom Lanton '38, Madeline Kiah Jones '38, Clair Sanders '38, Paul McKinney '38** and others.

Mary is retired and resides in Rockport.

'48

Carold Leland '48 ΜΣΧ was recently awarded a Purple Heart and a Combat Action Ribbon for extraordinary service during World War II. The event took place at the American Legion Post in Bangor with family and friends in attendance.

Carold served as a pharmacist's mate third class in the South Pacific during the invasion of Guam in 1944. Under heavy mortar fire he and corpsman Robert Lawler of Mansfield, Louisiana saved the life a marine by amputating his leg in a foxhole during the advance on Mount Alifan, Guam. He received the Purple Heard for wounds suffered a year later when a jeep he had been driving was blown off the road in Okinawa.

Representative John Baldacci and Darnell Savage of Lincoln's American Legion Post were instrumental in securing his awards.

Charlotte Reynolds Ross '48 ETE writes that she has retired and has lived in Hermon since 1957. Charlotte worked, "for a Bangor physician for 15 years and then worked with her husband (now deceased) in a used car, used parts business until her retirement."

Charlotte has a daughter, Julie Ross Carver and two grand daughters, Rebecca and Rachelle.

'49

Dr. Jack (Baxter) Bates '49 writes that his wife **Hazel Page Bates '59** died February 4, 2001 in Georgia.

'51

Waldo Gilpatrick '51 was a candidate in the June 11th Democratic Primary in Maine House District 82 (Farmingdale, Litchfield and West Gardiner).

'56

Roland Martin '56 ΜΣΧ and his wife Betty were honored by the town of Frenchville as Citizens of the Year. Roland and Betty opened and have operated the Frenchville Airport since 1974. Through the years, they started Valley Airlines, Aroostook Aviation and Pine State Airlines. They have also operated three decades of charter service and air ambulance service.

Roland retired from the Maine Army National Guard in 1992 as a command sergeant major with 34 years of service. He served as a member of the Frenchville Budget Committee, SAD 27 School board and on the Board of Directors of Northern Maine Medical Center. He was a member of the Ft. Kent Rotary Club, the Knights of Columbus and the Aircraft Owners and Pilots Association. Roland was also active with the local Boy Scouts and served as a safety director for the Federal Aviation Administration. Betty was also honored for her work with the Roman Catholic Parish of St. Luce at Frenchville.

'60

Pauline "Polly" Noyes Saba '60 writes that she turned 85 in October. Say hello to **Gail (Gross) '56** for me.

Polly is retired and resides in Zephyrhills, Florida.

'62

Nancy Randall Clark '62 ETE writes, "Regret most sincerely that I shall be unable to attend the grand opening and ribbon cutting ceremony of the Clara L Swan Center at Husson College… There is no person in the Husson family more deserving to be honored in such an appropriate significant manner than Clara Swan… she is much admired and loved and a four star woman indeed!"

Nancy is former Maine Senate Majority Leader and life long educator in Freeport.

Herbert Hodgkins '62 was the subject of a feature article in Working Waterfront, May 2002 edition. Herb a life-long lobsterman was a founding member of the Maine Lobster Pound Association in 1984, and served as president until 1994.

He has worked very closely with researchers in the development of vaccines and feeds for lobster pounds, and has served on the board of the Maine Lobster Institute and the Maine Lobster Promotion Council. He has successfully operated several lobster pounds.

Herb is married to **Patricia (Bailey) Hodgkins '62 ETE**. They reside in Hancock.

'66

Arthur "Archie" Verow '66 was honored for 35 years of service to the City of Brewer as City Clerk. During his tenure, Archie oversaw the introduction of voting machines, served as President of the Maine Town and City Clerks Association and on several occasions as interim city manager.

Archie has served on the State Animal Welfare Advisory Committee, the Governor's Municipal Advisory Committee, the board of Directors of the Bangor Humane Society and the Brewer Credit Union. He is a member of the Bangor Breakfast Kiwanis Club.

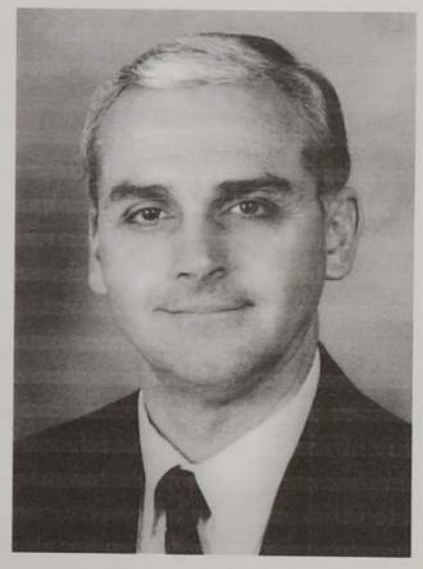

He will continue as City Clerk.

'71

Gary Furlotte '71 ΚΔΦ writes that he is employed as Marine Superintendent Exxon Mobil at Sea River Maritime, Inc. Baton Rouge, Lousiana. "Sorry I showed up in "Lost and Found' but now I'm found."

'73

Russell Gardner '73 has been named assistant vice president in the Commercial Loan Review Department at Banknorth Group in Portland.

A senior loan review analyst, he will continue to review complex commercial loans and portfolios to ensure that acceptable credit standards are maintained and that loans conform to acceptable company policy.

Paul Roberts '73 has been nominated by the Republican Party as their candidate in House District 44. Democrats have no candidate in this traditionally republican district. He will face Dick Woodbury an independent candidate in the November election.

Paul owns a private investigation firm and has served on the Yarmouth Town Council.

Stephen R. Crabbe '73 is employed by SWP Industries, Inc. in St. Stephen, New Brunswick.

Chusak Yangprecha '73 is managing director at Chuporn Palm Oil Industry Public Co., Ltd. Chuporn Palm Oil was listed by Forbes Magazine as one of the 300 best small companies in the world. Anyone wishing more information about the company can find it at www.cpith.com.

'78

David "Hollywood" Figueroa '78 writes from California, "Thank you for the Husson magazine and for keeping me connected to the school. I am currently an area recruiter for Ernst and Young and travel to some of our local colleges to recruit accounting graduates. I am really grateful for the opportunity and experience I received from Husson and I want to give back to the institution in anyway that I can".

Greetings and best wishes to all the Husson family, including **Del Merrill '48**, Coach Bruce MacGregor and Pam Hennessey and congratulations to **Tim Murphy '76** on being inducted into the Husson Sports Hall of Fame."

My e-mail address is david.Figueroa@ey.com for anyone wishing to get in touch.

'81

Byron Haining III '81 was in to visit in June. He is the owner of a payroll services firm in Camden and also works with the Camden School

Department. Byron said that he would enjoy hearing from classmates.

'83

Dr. Adel Al Alawi PhD '83 has been named chairman of the College of Information Technology at the University of Bahrain. His son Mishal Al Alawi will be a student at Husson College in the fall.

'85

Pamela J. Dow '85 KΛ and Robert Hale were married May 4, 2002 in Bangor. Pamela is employed by Medical Transcribers, Inc. of Bangor. Robert is employed by Pinkerton Security of Bangor.

The couple reside in Bangor.

Naohiko Takeuchi '85 is in the construction business in Tokyo. He writes, "The school year in Japan starts in April. Major companies end their fiscal year at the end of March. The result is everyone who needs to relocate does so at the end of March for the children's sake. We need to complete new condominium construction to be available in March for new comers. It drives me crazy!"

Nao heads up the Japanese alumni association and with the help of other alumni such as **Koichiro Kaneko '93**, he arranged for this year's Japanese alumni reunion aboard ship in Tokyo bay.

'86

Yuki Takahashi '86 is a Senior Consultant with Human Associates, Inc.; an executive search firm in Tokyo.

Linda Wildes Watkins '86 has been hired by Maine Public Broadcasting in Lewiston as an accounts receivable specialist. Before joining Maine Public Broadcasting, Linda worked for Grinnell Fire Protection.

'87

Sandra Bois Colbert '87 writes, "I'm not missing!" Sandra is employed by Pricewaterhouse Coopers in Boston and resides in Malden, Massachusetts.

'89

Ann Withee-Heald '89 writes that she finished her degree in Business at Thomas College, and went on to earn a certificate in Special Education at the University of Maine Farmington. In 1996, "I married a local man and have a 2-year-old son and am currently a happy, stay-at-home mom".

Ann and her family reside in Madison.

Martha Nickerson '89 MSB is an associate broker with Town and Country in Ellsworth. Martha earned her bachelor's degree at Boston University and resides in Hancock.

Julie Richardson-Ryder '89 is pleased to announce the birth of a son Cody born December 20, 2001. Julie works as a photo technician for Hannaford Brothers in Yarmouth.

'90

Denise Flenner White '90 is currently Accounting Manager at PSBA Insurance Trust in New Cumberland, Pennsylvania.

'91

Kelly Gray Hall '91 ETE and her husband Jamie welcomed the birth of their new daughter Jacqueline on September 14, 2001.

Kelly, Jamie, Sophie (4) and Jacqueline reside in Owls Head. Kelly is a Marketing Manager for MBNA in Camden.

Richard Bansley III '91 has been promoted to information systems officer at Bar Harbor Banking and Trust. Richard was a chief petty officer in the Navy until his retirement in 1995. He joined the bank in 2000 as information system manager.

Donald J. Poisson '92 Manager of Retail Lending of Bangor Savings Bank has been promoted to Senior Vice President. Don has 32 years of experience in banking.

Valerie Tefts '92 has received a promotion at Irving Oil Corporation. She is in the retail marketing sector and travels extensively in Eastern Canada.

Valerie resides in Portsmouth, New Hampshire.

'93

Kim Tate Gilroy '93 ΔΣΔ and her husband Craig are pleased to announce the birth of their son John "TJ" Gilroy born March 15, 2002.

Kim and her family reside in Rochester, New Hampshire.

Lisa Marie Hunt '93 and Michael Walter Glidden are engaged. Lisa is employed as a national account executive by I-many Inc. Michael is an account executive with Net 2 Press Inc.

The couple plan a January 4, 2003 wedding.

Koichiro Kaneko '93 has been named President and Representative Director of Kanack Planning Corporation in Tokyo, Japan.

Greg Morrill '93 and **Allison Clifford Morrill '93** write that they have moved to Wharton, New Jersey. Greg has been promoted to Assistant to the Regional Manager for the Pfizer Powers RX division. Greg and Allison have a son, Max.

Diane Robinson Perry '93 has been appointed Director of Purchasing at Dragon Cement and Concrete, Maine's largest concrete supplier and New England's only cement manufacturer. Diane will manage purchasing and stores at Dragon's Thomaston plant which produces 450,000 metric tons of cement each year.

Diane has more than eight years of purchasing experience, most recently as a senior buyer in the stadium seating division of Hussey Seating Company in North Berwick, Maine. She began her career at Great Northern Paper Company in Millinocket when she procured $40 million in commodities annually for the major paper manufacturer.

Diane earned an MBA from the University of Maine in 2000.

Tina Marie Grant Smith '93 writes that she has published her first romantic suspense novel *At First Sight* in April of 2001. Her second novel, *Manning's Honor* will be out sometime in 2003.

Tina is employed by Dr. Margaret L. Blom, M.D. and resides in Franklin.

'94

Sarah Sheriden Hulsey '94 ΔΣΔ and **Michael Hulsey '92 ΜΣΧ** are pleased to announce the birth of their daughter, Jordyn Kathern Hulsey born January 30, 2002.

The Hulsey's reside in South Portland.

Ann-Marie Williams Knowles '94 writes that she "will be celebrating a 3rd year anniversary within the care management department at Eastern Maine Medical Center in November 2002." She is the nurse care manager of the inpatient Hematology/Oncology patients.

Ann-Marie and husband Randy and daughter Morgan Lea reside in Glenburn.

'95

Joanne McIntyre Dichard '95 '98 MSB '00 has been named Executive Recruiter for Work Source Staffing Services in Bangor. This new service will assist businesses and organizations in eastern and central Maine in recruiting qualified top-level executives and professionals.

Motohiko Kimura '95 and Yukari Dougo were married May 4, 2002 in Osako, Japan. Moto continues to be employed by Elekta K.K. in Kobe, Japan.

Moto and Yukari reside in Osaka, Japan.

'96

Lori J. Shields '96 '97 MSB has been promoted to Vice President at Peoples Heritage Bank. She will continue to manage business development and sales at the Ellsworth Banking Center.

Lori joined Peoples in 1998 and has 19 years experience in banking.

Debora Cross Strout '96 writes that she currently resides in Portland with her two sons; "now 14 and 16 to any of you who remember how young they were when I entered Husson in 1992. In aspiring to do film set still photography, I decided to pursue a BFA in photography at the Creative Photographic Art Center in Lewiston through the University of Maine Augusta. Additionally, I am a freelance photographer and employed with New England Casting.com —a dot.com company matching actors and performers with work in the film industry. You may reach me at KRORPR96@aol.com

I took back my maiden name Debora Strout when I moved to Portland three years ago."

'97

Maher Al Mahfoodh '97 '99 MSB writes that he is Marketing Manager for Ashrafs W.L.L. in Manama, Bahrain. Ashrafs are the agents for more than 28 brands including, Sony and Kodak. "I am applying some of my studies at Husson in my work place."

"My best regards to all the faculty and staff at Husson."

Janet Leture '97 has been employed as Office Manager for the Winterport Boot Shop.

Rattaya Nopakun '97 MSB is Manager, Business Services Division of Advance Avionics and Aviation Co., LTD of Bangkok, Thailand.

Amanda Pomerleau '97, former Husson College basketball and softball player, was recently selected as the head girl's basketball coach at Bowie High School in Bowie, Maryland. Pomerleau, a standout at Skowhegan High School, played at Husson from 1993-1997. Her senior year she led the team in 3-point shooting and was the team's top free throw shooter at 88%.

Jarrod Williams '97 and Jody Littlefield are engaged. Jarrod is the owner of Williams Roofing Company. Jody is employed by the Ground Round Restaurant in Bangor.

The couple plan an October 19, 2002 wedding.

'98

Michael Whitten '98 has been appointed Controller at Franklin Community Health Network (FCHN) in Farmington. Mike will be responsible for managing the network's financials, including the accounting, reporting and control functions as well as overseeing the accounting department.

Prior to joining FCHN, he was a senior accountant in the Audit Department at Baker, Newman and Noyes in Portland. Mike lives in New Vineyard and enjoys the outdoors and fishing, hunting and skiing.

Alexander McCuaig '98 and his wife Lynn are pleased to announce the birth of their daughter Brianna, born June 8, 2002. Sandy is with Fidelity Investments and resides in Nashua, New Hampshire.

Junna Iwata '98 writes that she is finishing her Nursing degree at Kitasato University in Kanagawa, Japan. She will sit for her RN examination on February 24th.

Kirk D. Bloomer, Esq. '98 was admitted to the Maine State Bar on May 14, 2002. He has joined the Largay Law Offices, P.A. of Bangor as an associate attorney. Kirk will practice business, corporate and real

estate law with emphasis in both transactions and trials. He graduated from Vermont Law School.

Terrance Robinson II '98 and Danielle Pelletier are engaged. Terrance is employed by Wells Fargo Home Mortgage. Danielle is with WBRC Architects/Engineers. An August 2, 2003 wedding is planned.

Edward Sleeper '98 was promoted to captain at a ceremony at the ROTC department of the University of Maine. Ed has returned from a three year tour of duty in Germany where he served as an officer in the Transportation Corps. Previously, he served six years in the Marine Corps, including duty on the front lines in Iraq. Next he will begin additional training at Ft. Lee, Virginia.

'01

Ben Haskell '01 MSB has been named dean of communications at the New England School of Communications. Ben has been director of education at NESCom since 1988.

Tanya Marie Clukey '01 and Brad Ronco are engaged. Tanya is employed by Community Health and Counseling in Hermon. Brad is employed by Hampden Electrical in Bangor.

A July 20, 2002 wedding is planned

Staff Sergeant Douglas Franklin '01 was recently selected as Guardmember of the Month at the 101st Air Refueling Wing in Bangor. Doug is a graduate of the Air Mobility Command's (AMC) Phoenix Raven School which qualifies security forces personnel to perform as members of a force protection team assigned to deployed AMC aircraft. He is also the 101st Air Refueling Wing's Combat Arms instructor.

He is employed by the Maine State Police. Doug and his wife reside in Newport.

Pedro Olcina '01 writes that he is working in his hometown of Alicante, Spain as a manager of a national company in his area. The company specializes building artificial grass facilities, soccer fields, tennis courts and also deals in equipment and sporting goods. "I am having fun while working which is good and using many things that I learned at Husson College."

Mashiro Inada '01 BS/MSB is an executive trainee for the Japanese company Mistua in Edgewater, New Jersey.

Masahiro resides in Yonkers, New York.

Darby Smiley '01 and Shane Goodreau were married March 16, 2002 in Guilford. Darby is employed by West Street Beach Tanning Salon, Beaufort, South Carolina. Shane is a drill instructor in the Marine Corps stationed in Parris Island, South Carolina.

Darby and Shane reside in Beaufort, South Carolina.

Jennifer Lee Roberts '01 ΚΛ M.P.T. and **Christopher Howard Cowing '02** are engaged. Jennifer is employed by Coastal Orthopedics & Sports Medicine as a director of physical therapy services, Christopher is employed by SAD 17 in Oxford Hills as a physical education teacher and coach.

An October 12, 2002 wedding is planned.

'02

John McGlinn '02 became engaged to Kiera Dorr in March 2002. In July 2002 he accepted the position of Director for Network Development with the Professional Logging Contractors of Maine. He also is the new Assistant Baseball Coach at Husson College.

Lamoine Woman Named Husson College Valedictorian

Kari A. Graceland of Lamoine, Maine, has been named the valedictorian of the Class of 2002 of Husson College. Graceland received her Master's degree in Physical Therapy at the commencement ceremony held in Bangor on Saturday, May 11, 2002. Melinda J. Way of Belfast, Maine, who received a B.S. in Accounting and an M.S. in Business was named salutatorian.

President Beardsley congratulates Kari Graceland upon her being named Valedictorian.

President William Beardsley, Trustee Board Chairman Leo Loiselle, Class President Sarah Cosme, Honorary Degree Recipients Simone Levesque and Anthony di Bonaventura, and Commencement Speaker A. Mark Woodward.

The College awarded degrees to more than 300 students from the Schools of Business, Health, Science and Humanities, and Education. A. Mark Woodward, Executive Editor of the *Bangor Daily News* delivered the commencement address. The College awarded two honorary doctorates. Anthony diBonaventura, who has been acclaimed as one of the finest pianists of the 20th century received a Doctor of Fine Arts degree, and Simone Levesque, received a Doctor of Public Service. Ms. Levesque, who is a graduate of Husson, taught for 29 years at Fort Kent High School, and for 25 years served as the Chair of the Business Department. She has spent her lifetime as a civic leader and volunteer in the St. John Valley.

FINALLY!!!

Welcome to our newest alumni!

IN MEMORIAM

Esther Davenport Spellman '28 died June 27, 2002 in Bangor. Esther ran the Eggemoggin Inn on Little Deer Isle in the 1970's. She also enjoyed traveling and visited Ireland, Greece and throughout the United States. She enjoyed the water and beaches of Florida, gardening, crafting, caring for her wild birds and walking her dog. Esther was a descendent of Sarah Franklin Davenport, sister to Benjamin Franklin and also a descendent of Jonathan Davenport, founder of Hallowell.

Survivors include her five children, Daniel, Sharon Folster, Charlotte Present, Paulette Jones and Michaeleen Bohan and their families.

Esther Moore Trask '34 '60 of Bass Harbor died April 11, 2002 in Bar Harbor. She also earned a Bachelor's and a Master's degree from the University of Maine. She taught at Southwest Harbor, Auburn and Mt. Desert before her marriage to C. Orville Trask. She was elected tax assessor for the Town of Tremont from 1971 to 1991 and chaired the board of assessors from 1980 to 1991.

She is survived by her five children, Muriel Davisson, George Trask, Brian Trask, Emily Trask-Eaton and Philip Trask and their families.

Letitia Smith Clay '34 '56 ETE died March 22, 2002 at her home in Lincoln. Letitia and her husband Wilber established the Clay Funeral Home in Lincoln. She was active in the business until her death. She was a founding member of Epsilon Tau Epsilon sorority at Husson College and was present at the 50th anniversary celebration. Letitia was a member of the Order of Eastern Star, Orion Club, Harmony Club, Pilgrim Daughters and the First Congregational Church of Lincoln. She was very active in the operation of the annual Riverdriver's supper in Lincoln.

Survivors include her son Hervey and daughter Kathleen Clifford and their families.

Margaret Leighton Badger '35 ETE of Sangerville died June 2, 2002 in Dover-Foxcroft. Margaret worked for many years for the Guilford Trust Company, now Key Bank. She played the piano for the Methodist Church in Sangerville. She was a member of OES and attended Grace Bible Church in Sangerville. Margaret and her husband Ken spent many summers vacationing in Winter Harbor.

She is survived by her husband of 65 years, Kenneth.

Lillian Dorr Hatch '36 ETE of Brewer died June 12, 2002 in Bangor. Lillian was a secretary for several area insurance companies before retiring. She was a member of the First Congregational Church of Brewer, the Paul Caron Hand bell Choir, the King's Daughters and the Pythian Sisters. She enjoyed watching the Boston Red Sox and the Celtics.

Survivors include her daughter Nancy Annas and her family. She was predeceased by her husband Virgil.

Barbara Schoppe Dorr '37 ETE of Franklin died April 9, 2002 in Blue Hill. She belonged to the Franklin Baptist Church, the Ladies Guild, Schoodic Grange and Pomona Grange, the Franklin Garden Club, the Franklin Women's Club and the Franklin Historical Society. She enjoyed gardening, her friends and feeding the birds.

Survivors include her daughter and best friend Judith Goodwin, daughter Marie and their families.

Helena Zwicker Tenney RN '39 EMGH died April 4, 2002 in Bangor. Helena practiced nursing in the community until her retirement in 1982. She was a member of the EMGH/EMMC Alumni, an American Red Cross Nurse, Sunshine Club for Crippled Children and a member of the First United Church of Bangor. She was an avid golfer.

Survivors include sons Dennis and Rodney and their families.

Dalton Coffin '40 of Millinocket died April 28, 2002 in Bangor. He served his country in World War II as a member of the 12th Regiment of the 4th Infrantry Division. He landed on Utah Beach in the early morning hours of D-Day, receiving a Bronze Star. He fought at Hurtgen Forest, the Battle of the Bulge and the Campaign in Germany.

Dalton was an excellent athlete and played basketball and baseball at Husson. He was employed by Great Northern Paper for 32 years, retiring in 1983. Dalton was a lifetime member of the American Legion and the Veteran's of Foreign Wars. He was also a Mason and a member of the Anah Temple Shrine

Survivors include his wife Theresa, four children, Christine, Mary Lee, Stephen and Karen and their families.

Elizabeth Arlyne 'Bunny' Spague '40 died April 8, 2002 in Holden. She was married in 1942 to Ernie Sprague and together they embarked on a 25 year Army career. She lived and traveled in Europe and the Far East and throughout the United States. When her husband retired, they returned to Maine and built their home in Holden. They enjoyed snowmobiling, fishing, and camping along the rivers and lakes of Maine and Canada.

Survivors include her daughter Sherry Cowan and her family.

Muriel Elizabeth Strout Devoe '41 died May 25, 2002 in Falmouth. After Husson, Muriel was a secretary for a local insurance company before her marriage to Donald Devoe. The family lived in Bangor, Rochester, New York, Urbana, Illinois, Arlington, Stoneham and Sudbury, Massachusetts.

She loved music and was a pianist. She was involved in many community and church activities as a volunteer.

Survivors include her husband Donald, daughters Barbara Cary and Judith Haggerty and sons James and David and their families.

Virginia Wells Goodyke Clark '44 ETE of Farmington died March 28, 2002. Virginia was employed for 43 years by Weber Insurance Company in Farmington. She was a woman of great faith and was a member of Beans Corner Baptist Church in Jay and the Western Maine Child Evangelism Fellowship committee. She was also treasurer of the Camp Good News Committee. Virginia enjoyed gardening and working around her home.

She is survived by her husband Rev. Clyde Park of Farmington. She was predeceased by her first husband Henry Goodyke.

Margaret Burrill Hempstead RN '44 EMGH of Sun City, Florida died May 14, 2002 in Yarmouth. After graduating from Eastern Maine General Hospital, she earned her Bachelor's at the University of Maine and a Master's in Maternal and Child Health Nursing and Nursing Education at Boston University in 1972. She held nursing positions in Bangor, Seattle, Washington and Cincinnati, Ohio. She served as a professor of Nursing Education in the Massachusetts Community College System and held the position of Nursing Program Director at Bunker Hill Community College. She was a member of several professional Nursing organizations. After retirement she and her husband David lived in Sun City, Florida, and summered at Onawa Lake. Margaret was active in her church and enjoyed theater, music and travel. She played the violin in The Sarasota Pops Orchestra for nine years.

Survivors include her son David and daughter Judith Anne Hempstead Rick and their families.

Louise Grace Dobbins Conrady '45 died at her home in Stockton Springs on July 27, 2002. Louise worked for Honeywell in Minnesota before returning to Maine to raise her family.

Survivors include her sister Catherine Curtis, four children, Janis Tague, Mark Conrady, Emma Howard and Donna Conrady and their families.

Helen Rennebu Haney RN '45 EMGH died April 9, 2002 in Bangor. She was employed for many years as charge nurse at the Eastern Maine Medical Center Emergency department. She also served as a public health nurse for the City of Bangor and a school nurse at St John's School retiring in 1984. She was voted "Nurse of the Year" in 1984 by the Maine State Nurse's Association. Helen was a member of the Maine State Nursing Association and St. Mary's Catholic Church of Bangor.

Survivors include her husband, Richard Sr., sons Richard Jr., Joel, Michael, Terrance and their families.

Mary Ranney Edgecomb, RN '45 of Hermon died March 18, 2002 in Bangor. Mary was active in scouting and served as a Den Mother and Girl Scout Leader. She was a member of Downeast Bridge Club of Bangor and the Amercian Contract Bridge League as an advanced senior master. Mary enjoyed travel and her family.

She is survived by her five children, Walther, Steven,Sr., Carlton, Jeffrey and June and eight grandchildren including **Steven Edgecomb Jr., '92**, and **Paula Edgecomb Cota '99.**

Charlotte Evelyn Hutchinson Conary '48 of Deer Isle and Ellsworth died June 10, 2002 in Blue Hill. In 1985, Charlotte earned a Bachelor's degree in Human Services from the University of Maine. She worked as a secretary at Deer Isle Elementary School, Deer Isle High School and the Island Medical Center. She worked at Brooklin School with children living with multiple handicaps and assisted the elderly through the Senior Companion Plan. She enjoyed crafts.

Survivors include her four children, Karen Dunn, David Conary, Beverly Smith and Gardiner Conary and their families.

Leo James Violette '48 died April 2, 2002 in Van Buren. Leo served his country in the US Army during World War II and was the recipient of two Bronze Stars and the Purple Heart. He was a member of the American Legion and the National Association of Postmasters. Leo was employed for 17 years as a rural mail carrier in Van Buren and then became postmaster of St. David for more than 14 years. He also worked for a number years at Fongemie Ford Sales in Van Buren.

Survivors include his wife Rosalie, three sons Charles, Michael and Richard and their families.

Percy D. Clifford '51 of Harborside died in December 11, 2001 shortly before his 70th birthday.

Survivors include his wife Jane and three children, Cindy, Joel and Aaron.

Donna Haslam Barrows '53 of Portland died July 23, 2002 at her summer residence on Molasses Pond. She worked as a library assistant at the Lyman Moore Middle School for 20 years retiring in 1990. She took great joy in her family.

Survivors include her husband John, son Gregory, daughters Deborah Barrows and Diann Jordan and their families.

Jeanette Muise Webber '55 ETE of Oakhurst, New Jersey died April 8, 2002 in Long Branch, New Jersey. Jeanette was a computer analyst for CECOM at Ft. Monmouth before retiring in 2000.

Survivors include her husband Hurley, mother Minnie Muise, son Richard and stepdaughter Janice Hardten and their families.

Hazel Page Bates '59 died February 4, 2001 in Decatur, Georgia.

Survivors include her husband **Dr. Jack (Baxter) Bates Ph.D. '49**

He was a peer counselor for Alpha One and was an owner of Para-Quad Enterprises, a design company specializing in wheelchair ramps and accessibility accommodations for the physically challenged. Richard was a sales manager in the men's department at Porteous. He was a member of the Jehovah's Witness.

Survivors include his wife Priscilla.

Matthew Jay Eastman '94 died unexpectedly, July 20, 2002, as a result of a plane crash off the Bahamas. Matt was employed by Ibis Reserve in West Palm Beach, Florida as an assistant pro golf instructor.

Survivors include his bride Evelyn, parents Reginald and Yvonne, brothers Rodney, **Steve '82**, Gary, Mark, Dan, sisters Kim Veilleux and Heidi Eastman and their families.

Donald W. Perkins, former Husson trustee, died April 23, 2002 in Cape Elizabeth, Maine. Don was an attorney who practiced in Portland. He endowed the Walker-Perkins Scholarship Fund at Husson.

Eleanor Bolston Harris, Director of the International Center for Language Studies at Husson College, died May 27, 2002 in Bangor. Eleanor had an extensive career in International Education serving in numerous programs in many countries, promoting education and cultural understanding. She and her husband Peter lived in Jamaica and made their home in Costa Rica for 17 years.

Eleanor enjoyed reading, travel, gardening and was an enthusiastic tennis player.

She is survived by her husband, Peter, son Daniel and daughter Marian and granddaughter Ariel.

William C.Viner, Honorary Doctorate in Business Administration 1971, died in Belfast at the age of 96. Mr. Viner was President of Viner Shoe Company in Bangor for many years and an owner of Viner Music. He was a noted civic leader. He believed strongly in the advantages of having Husson College in Bangor and was instrumental in helping us acquire the land for the current campus. A wing of Carlisle Hall is named for him.

Survivors include his son Tom, daughters Catherine Viner and Barbara Lavine and their families.

G. Merrill Thomas II, former Husson faculty member in Portland, died April 5, 2002 in Portland.

Wesley Jordan, former Husson faculty member, died February 26, 2002. Wes was a noted athlete and Head Athletic Trainer at the University of Maine for over thirty years.

THE CHESLEY H. HUSSON, SR. SOCIETY

The Chesley H. Husson, Sr. Society recognizes those generous donors who remember Husson College in their will and/or through any one of numerous planned giving instruments. The Society provides continuing recognition to those who obviously care about Husson's future financial strength, and membership in the Society is listed annually. The Husson Society also recognizes individuals or families who have established named, endowed scholarship funds to carry on their legacy of generosity to Husson College students.

The Society's name honors the man who gave Husson both his name and its nonprofit independent status. It is especially appropriate when you consider that Chief's own planned gift made it all possible. This Society continues to give focus and on-going attention to all forms of planned giving as important means of supporting the College.

In order to be recognized as a member of the Society, donors need to notify the College of completed arrangements which include Husson in their will or which provide for the college via a planned gift (a trust, IRA beneficiary, insurance beneficiary, an annuity, gift of real estate, etc.). For information about the Society or details concerning various options, donors may phone the Husson Development Office at 207-973-1036.
