Husson College

Founded in 1898 Husson College has evolved from a small, proprietary school to an accredited private institution offering Masters, Baccalaureate, and Associate degrees in Business, Health, and Professional Studies. The School of Business includes degree programs in Accounting, Business, Management Information Systems (computer applications in Business), and Professional Studies. Through the School of Nursing and Health Professions, Husson/EMMC offers a Baccalaureate Nursing program, a MS in Physical Therapy, and a MSN with a Nurse Practitioner focus.

Campus amenities include three modern residence halls with single and double rooms; an attractive dining commons that offers flexible meal plans, science, microcomputer, and language labs; library and conference rooms; and an athletic complex offering fitness and weight equipment and an Olympic-size pool.

Since Husson is located in the beautiful State of Maine, some of the finest recreational opportunities in the country are located nearby. Excellent skiing and hiking trails abound, and the campus is only one hour away from the Maine coast and Acadia National Park.

Husson Softball

An Overview

Husson is proud of its achievements and has been very competitive in the post-season tournament over the past several years. The team finished third in the NAIA District #5 (New England) last year. Several players received All-District, All-State and All-Conference honors.

Husson Softball competes in the Maine Athletic Conference and in the NAIA Northeast Region and is recognized as a top contender. The coaching staff has been involved with the program for many years. The team plays 25-30 games in its regular season.

Since Husson is an NAIA College it recognizes exceptionally talented athletes with athletic scholarships. This is an outstanding recruiting tool.

Academics are very important to the Softball program. There are daily study halls and bi-weekly individual academic meetings with the coach. The results speak for themselves as the team's grade point average is higher than that of the typical college student. The academic majors of the 1994-95 team are wide spread in the curriculum including teaching, nursing, business administration, management, marketing, and paralegal studies.

Northeast Region Tournament

Husson will make history this season as it has been selected to host the first ever Northeast regional NAIA playoffs. The best of the teams in the entire region extending from Maine to Virginia and west to Pennsylvania will compete in Bangor, Maine. The teams will be playing for a chance to represent the Northeast at the National NAIA softball tournament.

Florida Spring Training

The Husson Softball Team is among the "elite" in the State of Maine. It is the only team among the NAIA District #5 (New England) teams to raise funds to fly to Florida for a Spring Training trip. The trip has helped to bring the team to another dimension in terms of playing ability.

The experience is something the team plans for and looks forward to throughout the College year. The Husson squad flies out of Bangor during the "Spring Break." It practices and plays a number of games against good competition. The team has practice fields available throughout the day for its sole usage.

Husson stays in a local motel in the Fort Pierce area, practices and plays games on the city's fields. At least one night contest is played under the lights as well. In addition to the "work" portion of the trip, some fun is included. The team has opportunities to relax by the pool, go to the local beaches, and to engage in other pleasurable activities. It attends local professional baseball teams Spring Training games, and travels to Disney World, Epcot Center and Sea World among other attractions.

The "Florida experience" certainly plays a tremendous part in the success of the team when it returns to Maine for the regular season of play. The Northeast Region's weather is not conducive to early outside practices and without the Florida trip, the team would historically play its first game without the benefit of practicing in the out-of-doors.
