Dear Alumni and Friends:

These are exciting times at Husson. The new format for *The Ledger* reflects both the enduring qualities of the Husson tradition along with the dynamic transitions we experience as technology offers new opportunities and challenges.

Only a few years ago it would have been hard to imagine fingertip access to library catalogs across the nation from a dorm room, interactive video learning in the nursing learning laboratories, simultaneous translation of machine shorthand to grammatically correct printouts, and yet, such opportunities are becoming realities.

On another front, at a recent lecture in nursing, such terms as benefit/cost analysis, total quality management and strategic planning drove home the reality that our health and business programs are increasingly interdependent.

Yet, for all the changes, so much stays the same. The Bell Tower still chimes at noon and 5:00 PM, the students still take over the President's Office during Chief Week, the athletic teams continue their winning traditions and a fine teaching faculty still prepares students for careers in a changing world. The spirit lives on.

Sincerely,

William H. Beardsley

William H. Beardsley
President

Digital Phone Line Links Husson Nationwide

The computer undoubtedly has become the medium of the 21st century--the vehicle that will carry the messages of future generations. As Husson College looks ahead to the year 2000 and beyond, it has become essential that the College prepare its students, faculty and administrators to learn, teach, and work in what already has become the age of electronic information.

Husson took a small, but significant step in that direction this winter when it tied into the University of Maine System's fiber-optic computer network.

The new computer link, if used to its potential, could change the way Husson goes about the business of education, and also could provide students with valuable computer skills that will serve them well once they leave the College.

Discussions with representatives from the Chancellor's Office last fall outlined the various ways in which Husson could tie into the computer network and the equipment the College would need to purchase.

"Working with the Chancellor's Office on the network tie has been a real pleasure and is illustrative of the growing cooperation between Maine's public and private universities and colleges," said Husson President William H. Beardsley.

Dr. Julian Haynes, Husson's project coordinator, worked directly with UMS computer and data processing personnel. Initially, he said, the hookup with the University System's computer network will connect Husson to college libraries in Maine, throughout the United States and in 14 other countries around the world.

"That was our motivation," Haynes said. "We have a relatively small library concentrating on business and health. This will give the faculty and students the capability of searching the larger, more comprehensive libraries."

The actual hookup required very little in the way of equipment--just minor modifications to Husson's DEC Ethernet system, the lease of telephone lines between Husson and the University of Maine, and a router that connects the Husson computer to those lines. The College also installed the same equipment at its continuing education centers in Portland, Lewiston and Caribou.

Haynes said although linking the College with other libraries and its satellite campuses was the impetus to join the system, it was only "the tip of the iceberg" of what the College's capabilities will be.

"This gives us access to the University of Maine library and to other libraries," he said, "but it also gives us the capability of going further. There are all sorts of data bases available to us through this network."

Through the link with the University of Maine System, Husson can pay for access to a number of academic research networks that can put a whole world of information at the computer users' fingertips.

"We now have a great capability," he said. "All we need is the money to pay the fees for all these services. There are all sorts of information services we can purchase."

The new computer link has the potential, Haynes said, to change the way Husson students and faculty learn and teach.

"This makes it very easy for faculty to find out what sorts of information are available for their teaching and research and for students to find out what resources are available to them relative to their courses or papers and projects they are working on," he said. "This will make the student more aware of the extent of the resources available to them. There's a world of information on any subject. Through this system, the computer can also become a teaching tool, since students and faculty will become familiar with the use of computerized data bases. That's the kind of thing they're going to encounter in the work world."

Amy Averre, the Husson librarian, added that this familiarity with the computer and the ability to search a variety of data bases can help students to continue learning once they've left the College.

"In today's world, they have to keep learning in order to keep current in their profession, whether it's accounting or nursing or whatever," she said. "If they can learn now how to stay abreast of new developments in their fields, and if they can learn to integrate the computers into what they do, it'll make that process easier."

A key factor in that process, she stressed, will be faculty members. "It will be important for the faculty to learn about what is out there and what the access to all that information can do," she said. "There may be all types of different projects students could do using these computer capabilities. It has the potential to open up a whole new way of teaching and learning."

Potential is the key word, according to President Beardsley, who noted that tying into the fiber-optic network is only the first phase of implementation toward becoming a truly electronic college. He demonstrated two possible uses of the new technology shortly after the system became operational. Sitting in Peabody Hall, he scanned the computerized card catalog at Montana State University searching for books by economist Paul Samuelson. Then, he searched for articles about regulation of fish farms. In a matter of moments a list of possible sources from across the continent appeared on his monitor.

There are other possible uses, he said. The potential exists to connect a prospective student sitting at the Husson CED center in Portland via the computer system to a transcript evaluation program in Bangor which would give him or her information about transferring credits into Husson. The potential exists to put information from libraries and industries around the world as well as from U.S. government data bases, at the fingertips of Husson faculty and students as they sit in their offices or dorm rooms.

"These uses will not occur overnight," Beardsley said. "They will require expenditures for hardware, software and licenses, and above all, education and planning. But the network has moved each concept closer to reality. The next major step will be to seek outside funding to help make those potentials a reality."

Taking another step toward that reality, the College is investigating the possibility of making the new system available in every classroom, office and dormitory on campus. Haynes said the university system can be accessed through any terminal or PC that is attached to the College's DEC Ethernet system. At this point only 15 or 20 stations have access to the system. That will increase in the very near future.

In February, the College issued a request for proposals for the installation of voice, video and data cable that would link all areas of the campus to the College's DEC Ethernet system.

"Such a campus network, when coupled with the statewide digital system, offers communications, and academic and management capabilities which previously were unavailable to the College," Beardsley said. "The new computer link will significantly improve communications and information flow to and from our students and faculty."

In April, the Board of Trustees approved purchase of the NYNEX Meridian System with the voice component fully installed in the Fall of 1993.

Nursing Department Sports Interactive Computer

The Scene: *Outside a city hospital.*

The Action: *A car pulls up to the curb. Inside, an elderly man clutches his chest in obvious pain. His wife, the driver, rushes to get help. Attendants arrive on the scene and help the man into a wheelchair as he moans, complaining of chest pains and shortness of breath. The attendants wheel him inside the hospital, into an examination room where he is met by a nurse. She speaks to him briefly and then pauses, waiting to decide what to do.*

This could be an opening shot for "Emergency" or "Rescue 911." But actually, it is a scene from an interactive laser disc that's getting a lot of play these days in the Husson College Nursing Department's Resource Learning Center. And it won't be the on-screen nurse who decides what actions to take. It will be a Husson student who makes those decisions. The student will

Dana Moretti (standing) and Joan Gould examine a video patient using the new interactive computer program at the Nursing Resource Learning Center.

be sitting at one of the new interactive computer stations recently installed at the Learning Center. Simply by touching the appropriate areas on the computer monitor, the student will interact with the patient, ask questions about his health history, learn more about his condition, take vital signs and, eventually, decide what type of treatment or medication should be administered. The computer responds immediately, letting the student know if he or she has skipped an important step or chosen an incorrect treatment.

"It's like seeing it happen in life," said junior Kathleen Siering of Brewer. "You can see changes come about that you could never see in a book. You can see the signs of respiratory distress. You can get a picture in a book, but that can't give you what the video gives you."

The interactive system was purchased and installed during the past several months using a $26,755 grant from the Helene Fuld Health Trust for nursing education. The grant allowed the nursing department to add four new IBM computer stations to the Learning Center, including two interactive stations hooked to laser disc players. The disc players provide the video and audio components that allow students to interact in real-life nursing situations that appear on the computer screen. The monitors are touch-sensitive, so students can request information and respond to questions simply by touching the computer screen.

"It's so easy to use," Siering said. "It's a wonderful resource for quality review. It reinforces what we've already covered in the classroom."

"I like playing video games," added junior Russell Kahl of Orono. "And this is kind of like a game. I'm learning and testing my knowledge at the same time. It makes learning fun. You don't want to leave."

Dr. Elizabeth Burns, the Dean of Health Professions and Nursing at Husson, said the interactive video promotes independent learning with the use of realistic life-like scenarios.

"It assists faculty to help students to visualize actual nursing care situations and also permits students to learn in a modular format" she said.

In addition to allowing students to work at their own pace and on their own time schedule, the interactive video also encourages decision making and critical thinking in a safe format, according to Dana Moretti, the director of the Resource Learning Center.

"The students can gain skills by observing," Moretti said. "One of the attractive features of the interactive programs is that the same instructional program can be used for all different levels of students. Newer students can simply observe the communication that goes on and the role of the nurse in each situation. Senior students, meanwhile, can become more involved in a number of procedures, like assessing blood gases. There are a lot of different options."

The next step, she said, is to let everyone, including the faculty members, know what is available. She said they want to introduce the new system to all faculty members so they will be able to include it into their program curriculum "for effective student learning." While it will never replace the existing course of study nor the classroom experience, students agree that it is a very effective reinforcement tool.

Committee Completes Update of Long-Range Plan

Husson's Strategic Planning Committee has completed a draft update of the College's 1991 long-range plan that lays out specific goals for the College, including renovations and improvements to the 25-year-old buildings, updating the use of technology, planning for program review and faculty development, and fine-tuning finance and maintenance operations.

The committee, which consisted of representatives from the trustees, administration, faculty and staff, has spent the past year reviewing the broad statements of goals in the long-range plan and developing a set of specific actions needed to implement the plan. Those specific actions will allow the College to respond to requirements of the New England Association of Schools and Colleges, Husson's accreditation association, and will provide a benchmark document by which the College can assess how well it's doing its job.

Dr. Kathleen Wall, a member of the Planning Committee, said the draft plan was a guide for the college's future.

"This will allow us to direct a course that will carry us into the future." Wall said. "It's like a road map that shows us how to get there."

The list of goals and recommendations in the plan is lengthy, but includes some major projects including a multi-year capital campaign, expansion of Peabody Hall to provide additional classroom and faculty office space and a new campus center, comprehensive improvements to Hart and Carlisle Halls such as installation of wiring for contemporary communications, including voice, video and data, and refurbishing of bathrooms, lounges and study areas; developing plans for Bell dormitory when it becomes vacant next year, and renovations and improvements to the Dining Commons and the Athletic Complex. Other goals include expanding faculty and increasing staff development efforts, establishing several new master's degree programs and laying the groundwork to add a doctoral program by the end of the decade, developing a curriculum review process and a procedure for adding new programs to the curriculum.

The committee members stressed that the proposed plan is a draft and that before they can prepare the final version for presentation to the Board of Trustees, they need to have input from all members of the Husson community. Copies of the draft proposal have been distributed among the community for comment and input. Once approved by the Trustees the plan will provide a guiding framework for setting annual operating and capital budget priorities as well as for capital campaign projects.

Meanwhile, the Nursing Department began its own strategic planning process in March with a day-long meeting on the campus.

Dr. Elizabeth Burns, the dean of Health Professions and Nursing at Husson, said it was time to take a look at the 10-year-old program and to determine what needs to be done to prepare it for the future.

"Our job will be to explore where the school has been, where it is now, and where it needs to go in the future," she said. "We have a very important mission here in preparing college-educated nurses for the local area and for the state of Maine. There have been tremendous changes in relation to health care and we need to change to meet the needs of the coming health care system."

The committee is comprised of members of the Husson-EMMC faculty, representatives from area hospitals, nursing students and members of the community who are involved in health care.

The nursing committee will meet regularly throughout the spring and, by summer, develop a set of specific goals that will serve as guidelines for development of the program in the future.

Campus News

Assistant Professor **Nancy Grover,** MSN, RN, CS, and Associate Professor **Teresa Steele**, MSN, RN, CS, who both teach psychiatric nursing at Husson, have collaborated in the writing of two chapters for a new edition of *Emergency Nursing: Principles and Practice*, a widely-used textbook in the field of emergency nursing

According to Steele, they adapted conceptual models they use in the classrooms at Husson, and case studies drawn from their clinical work at the Community Health and Counseling Center in Bangor.

The first chapter, "Psychosocial and Mental Health Assessment," reviews the two popular models for crisis intervention, and discusses how they can be combined and adapted to develop a realistic approach to treating mental health patients of all age groups in the emergency room.

The second chapter, "Psychiatric Emergencies: Biopsychosocial Stressors," relates those crisis intervention models to specific cases ranging from domestic violence and abuse to a variety of anxiety disorders and mental disorders.

Coach **D. Bruce MacGregor** was honored at the NAIA Annual Awards Night in March, in recognition of his 500th win at Husson College.

Among others honored during the evening with Coach MacGregor were such national college basketball luminaries as Denny Crum of Louisville and Eddie Sutton of Oklahoma State, both of whom reached the 500-win milestone; and Bobby Knight of Indiana and Lou Henson of Illinois, who were honored for attaining their 600th win.

The Husson community also honored Coach MacGregor at a special dinner where he received congratulations from friends, colleagues, coaches and former players. The chicken wasn't the only thing that was roasted that night.

Dr. Charles Sullivan, professor and chair of the Business Department, was elected to the Bangor City Council in the November elections.

A long-time member of the Bangor School Board, Sullivan won the seat on the Council vacated by his wife, Mary, who was elected to the Maine House of Representatives from Bangor. His bright yellow signs were a familiar sight on campus during the weeks leading up to the election, and Sullivan got active support from some faculty members and students.

Roberta Winchell, the director of nursing program admissions and public relations at Husson College, has been elected to serve as the chairperson of the Advisory Board for the local chapter of the Salvation Army.

Winchell is only the second woman to hold that position during the 50 years the local chapter has been in existence She is also the youngest person to be elected as chairperson.

Husson President **Dr. William H. Beardsley** has been appointed to the Maine Economic Growth Council. Beardsley also serves on the Maine Education Assistance Board and the board of the Finance Authority of Maine, and was the chair of the visiting team reviewing the Ph.D. candidacy for the Research Institute of Semiological Mathematics.

Pam Hennessey, the athletic director at Husson College, was honored recently for her many contributions to girl's and women's sports.

Hennessey was one of eight women in Maine to receive the National Association of Girl's and Women's Sports annual award during a ceremony with Governor John R. McKernan at the Blaine House on National Girls and Women in Sports Day. She was cited for her leadership in girl's and women's sports as an administrator, educator, coach, and official.

Dr. Barbara Higgins, an associate professor in the Nursing Department, is scheduled to begin studies in a post-masters Nurse-Practitioner program this summer.

Dr. Higgins will take classes from June through August at the State University of New York at Stony brook. She has been granted a sabbatical for the fall semester to complete the 450 hours of clinical practice required by the course. Higgins will do the clinical portion of the course working with local obstetricians and clinics in Bangor. The course will prepare her to sit for a national nurse-practitioner certification exam.

Mike San Antonio, the director of Dining Services at Husson, working with Jon Lewis of the University of Maine and Mary Kennedy of Bowdoin, co-hosted the annual conference of the National Association of College and University Food Services held in Portland in March.

San Antonio was the program chair for the conference and was responsible for all programming for the four-day conference. Among his duties was arranging for the conference speakers which included Michael Berry of Harvard University, Pierre Napolitano of Dartmouth University, Michael Cunningham of Boston College, Fred Hutchinson of the University of Maine and our own Dr. William Beardsley, who spoke about the role of the dining service on campus.

San Antonio, who is the advisor for Student Government on campus, also served as the Master of Ceremonies for the conference.

Cathy Kessenich, RN, MSN, an assistant professor in the Husson/Eastern Maine Medical Center Baccalaureate Nursing Program, has had two articles printed in nursing journals.

The first article, "Nursing Research: Challenge to Excellence," was printed in September in the *National Journal of Student Nurses*. It examined the importance of research for the student nurse and how those research skills can benefit the nurse once he or she begins practicing. "Curriculum Counterrevolution," published in the *Journal of Nursing Education* in October, argued that although current trends in the nursing profession and in the general focus of health care require ongoing evaluation of nursing curriculum, they do not necessarily mandate a complete overhaul of the instructor's role in the classroom.

Linda Jenkins, RNC, the head of Husson College Health Services, has passed the American Nursing Association certificate exam and is now certified in college health nursing.

In addition to her duties at Husson, Linda currently serves as the president of the Maine College Health Association.

Dr. Kenneth Johnson, a professor in the arts and humanities department, is completing work on his latest book on ethics, *Moral Discernment, Moral Judgement*.

The text, which will deal specifically with social policy issues and business ethics, is planned for use during the 1993-94 academic year.

Dr. Kathleen Wall, chair of the Division of Arts and Sciences, has been selected as an alternate for an American Council on Education Fellowship for leadership development.

As a finalist for the highly competitive fellowship, Dr. Wall traveled to Washington, D.C., this winter for interviews. The fellowship would allow the recipient to travel to another institution to study leadership development techniques.

Dr. Wall is also completing a text on nursing research.

Dr. James Lowe, an instructor in the English Department, has completed work on his book *The Unresolved Matter of James Agee's Metapoetics*.

The book, which will analyze elements in Agee's creative process, is scheduled to be published by the Louisiana State University Press later this year. A copy will be donated to the Husson Library.

Commencement '93 Honors

Robert E. White, '65

Sister Mary Norberta Malinowski, CSSF

Her Worship Elsie E. Wayne

Senator George J. Mitchell

Husson College honored one of its own during the 1993 commencement ceremonies on May 15 when it awarded an honorary degree to alumnus Robert E. White, '65.

White received an honorary doctorate in business administration during the ceremonies. Also honored with honorary degrees were Sister Mary Norberta Malinowski, CSSF, the president of St. Joseph Healthcare Foundation and St. Joseph Hospital in Bangor, and Her Worship Elsie E. Wayne, LL.D., the mayor of Saint John, New Brunswick. Sister Norberta received an honorary doctorate in business administration. Mayor Wayne was awarded an honorary doctorate in public administration. Senate Majority Leader George Mitchell was the guest speaker for this year's graduation.

White, who grew up in Hampden, earned his B.S. in Accounting from Husson in 1965 and went on to a distinguished career with such firms as Avon Products and Parke-Davis, before joining Warner-Lambert, the Fortune 100 company where he has risen to his present position of Vice President, Corporate Internal Audit. In this capacity he oversees the corporate audit functions for the well-known pharmaceutical corporation.

White also has served his profession with distinction and is currently the Senior Vice Chairman of the Board of the Institute of Internal Auditors (IIA), a 50,000-member professional association representing internal auditors in business, industry, government and education in more than 100 countries. He has been a member of the organization since 1969 and has held numerous posts during that time. He also currently serves as the IIA international treasurer.

Sister Norberta is an R.N., a Nurse Practitioner and holds an M.S. in Public Health from Tufts University and an M.S. in Management from the Sloan School at M.I.T. She has written and lectured in the fields of maternal and pediatric nursing and has taught as a full-time instructor at Harvard Medical School and the Boston College Graduate School of Nursing. She also has served as the coordinator for Home Care Services for the Tufts New England Medical Center. Before joining St. Joseph Hospital in 1980, she served as an R.N., as national consultant for the American Nurses Association and for the federal government. She was the coordinator of pediatrics at Nazareth Child Care Center in Jamaica Plain, Massachusetts, and Director of the Family Nurse Practitioner Program at Worcester-Hahnemann Hospital.

Under her leadership, St. Joseph Hospital has expanded its service to the community, establishing the Health Care Foundation and the Center for Advanced Medicine. The hospital has become a leader in hospice, lithotripsy, ambulatory services, physical and occupational therapy and women's healthcare.

(Continued on page 24)

Braves Reach NAIA Final Four

Like a fast little sloop running before the wind, the Husson College Women's Basketball team rode the crest of a wave this season that landed them on the shores of Oregon and right in the middle of the Final Four of the NAIA National Tournament.

The Husson community celebrated the women's basketball teams' first trip to the NAIA District II National Tournament and their success in advancing to the tournament semi-finals.

Dubbed "the little team that could" by reporters, the Braves logged a couple of firsts at the tournament: they were the first Husson women's team to advance to a national tournament, and they were the first Husson team in any sport to advance to the semi-finals in a national tournament. As the newcomers to the tournament, they surprised many of the better-known teams who seemed to underestimate the "little team from Maine."

But Coach Mary "Kissy" Walker had watched her players turn up their performance a notch in the District 5 championship a few weeks before, and was confident that the team would do well in the nationals.

"Our first goal was just to go out there and show that we could play, that kids from Maine could play basketball," Walker said. "But I really believed we would make it that far. What I didn't know was how the girls would react to their first time in the national tournament. They had to play very, very well to get that far. I'm just so proud of them."

At center court, senior tri-captains Vicki Mazerall, Kristi Wildman, and Darci Collins accept the NAIA plaque the Braves earned with their appearance in the Final Four of the National Tournament. (Photo by Karen J. Burch.)

As they did all year, the Braves looked to senior tri-captains, Kristi Wildman, Darci Collins and Vicki Mazerall for leadership in the tournament, and they weren't disappointed. The trio combined to score more than half of the team's points in the three tournament games.

"They're talented players. They have heart and courage and the desire to win, and they have an intangible quality that's difficult to find in an athlete," Walker said. "They don't step onto the court to lose."

Behind that leadership, the younger players put in a strong performance, including those coming off the bench.

"The younger players stepped their game up another level," Walker said. "And the bench contributed greatly. They did everything we asked of them."

Relying on their quickness, and a come-at-you-from-everywhere defense, the Braves had won tournament victories from Tampa to Bangor including the NAIA District 5 championship, which gave them a berth in the NAIA's national tournament. They entered the national tournament ranked fifth. After a slow start in their second-round contest against the 12th-ranked Warriors from Sterling College, the Braves overcame the coughs, colds and flu that had plagued them in the early going and went on a 29-6 run in the last 10 minutes of the game to clinch a 71-56 victory.

That win advanced the Braves into a quarter-final matchup with fourth-ranked Indiana Tech. The see-saw battle kept viewers in the stadium and listeners back home on the edge of their seats right up to the final buzzer. With just 19 seconds left, Vicki Mazerall hit a clutch, pull-up jumper to put Husson ahead 57-56. When Tech missed a lay-up, the last few seconds ticked off the clock and the Braves were in the NAIA semi-finals.

"I couldn't believe we won," senior Darci Collins said after the game. "I mean Final Four! The Final Four just seemed so far away. I think all the other teams

Senior Kristi Wildman gets a clear look at the basket during one of the NAIA tournament games. (Photo by Karen J. Burch.)

were like, 'that little team from Maine? Ah, they're not going to be anything.' I think they overlooked us."

The tournament ended for the Braves when they ran up against the top-ranked Northern Montana Skylights, who went on to win the tournament. The Braves kept the game close in the early going, and played the Skylights tough late in the game, but Northern Montana's height advantage, balanced scoring and tough defense combined to defeat the Husson team 77-57. Despite the loss, the Braves couldn't help but be happy with what they'd accomplished.

"Nobody had their head down when we lost," senior Kristi Wildman told a reporter. "We were just so proud to be there."

Coach Walker said the team appreciated the support it received from the Husson family, both on the road and at home. After their first victory, the team received flowers from the athletic and public relations departments and numerous telegrams of congratulations.

"The kids started running to the front desk every day to see what had come in," Walker said. "I know the other teams were not getting the things we were getting in. We were made to feel special."

Several parents traveled to Oregon to support the team as did Athletic Director Pam Hennessey and President William H. Beardsley and his wife, Betsy. Walker noted that with 20 teams in the tournament, Beardsley was one of only three college presidents to attend the tournament.

Assistant Coach Ed Gott was hospitalized after the tournament. He's on the mend now and expects to be back at courtside with the Braves next season.

Senior Tri-Captains Vicki, Kristi, and Darci.

"That meant a lot to the team," Walker said. "And when he had to leave because of a prior commitment, his wife, Betsy, rearranged her schedule and stayed on with us."

Their performances throughout the season and in post-season play won state and national honors for some members of the Husson squad. Mazerall was named to the All-Tourney Team at the tournament. She also was selected as a second-team NAIA All-American. Wildman received honorable mention for the NAIA All-American Team. Mazerall and Wildman also were named to the Maine Association for Intercollegiate Athletics for Women's 1993 All-State first team.

Coach Walker was named the MAIAW Coach of the Year for 1993. Walker, who led the Lady Braves to a 28-3 season, said she appreciated the honor, but stressed that it was a team award.

"This is a reflection on the whole team," she said. "Everyone knows you can't do it without the players. This award is for the entire program here, for me as well as for the players and the other coaches."

The Coach of the Year is selected by all the coaches in the state.

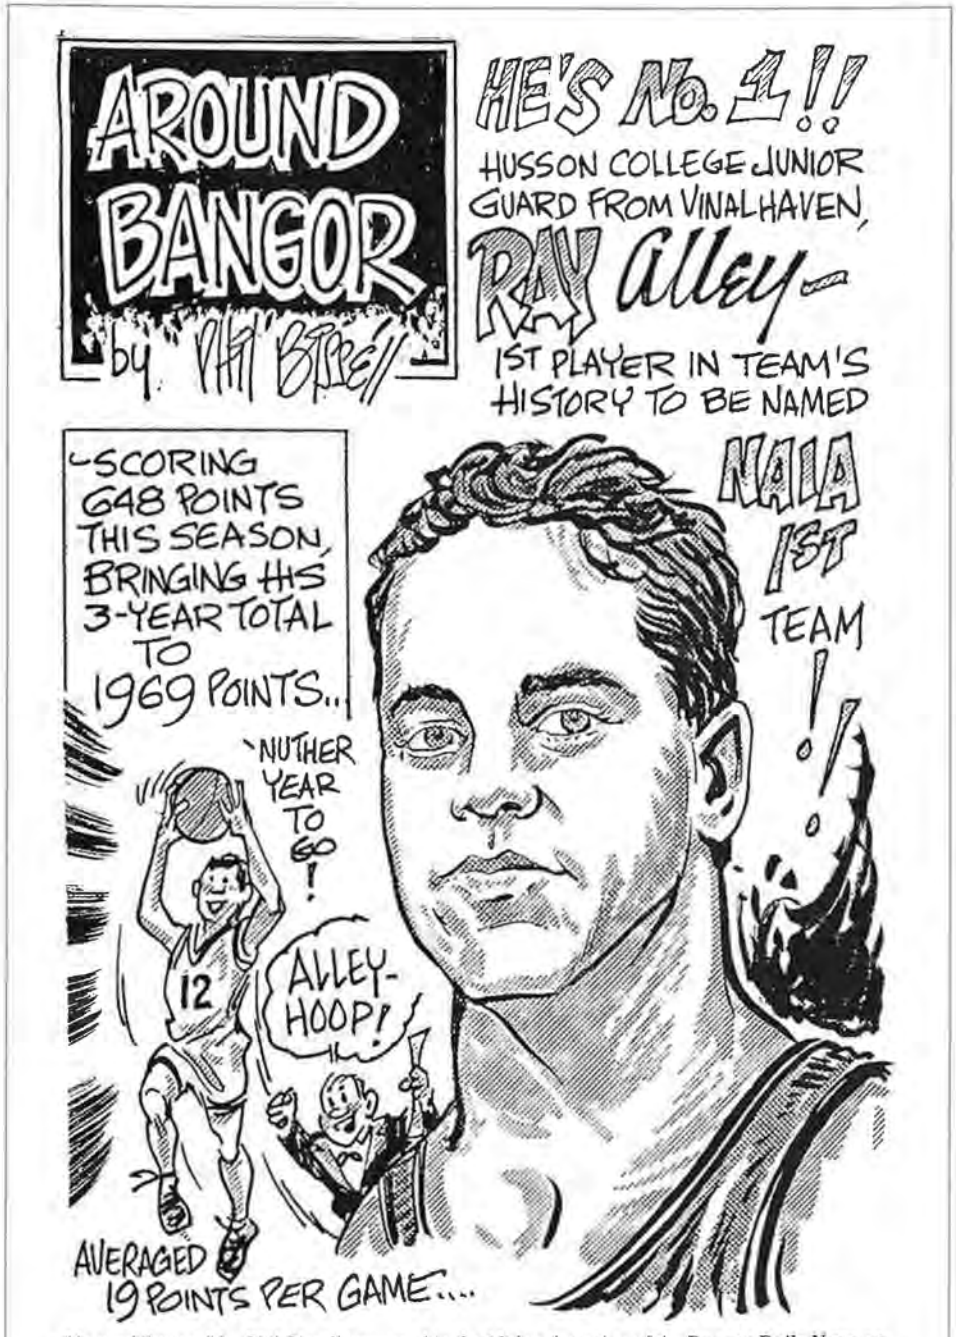

All-American Honors For Alley

Raymond Alley, the Husson Brave's 5' 9" junior guard, was named a first-team National Association of Intercollegiate Athletics All-American at the end of the 1993 season.

Alley became the first Husson men's basketball player to gain a spot on a first team NAIA Division II "Dream Team." He was selected for the honor by the NAIA small school coaches.

Ray scored 648 points this year, averaging 19 points a game as he helped lead the Braves to a 26-8 season. After three years at Husson, he ranks as the College's number two all-time scoring leader. His total of 1,969 is second only to 1974 graduate Dana Wilson's record of 2,471 points.

Jeff Shakoor, the Braves' senior forward earned honorable mention All-American honors.

"Around Bangor" by Phil Bissell appeared in the Midweek section of the ***Bangor Daily News*** *on March 24, 1993.*

Around The Diamond

The Husson College baseball and softball teams got the 1993 season under way in March with their annual spring training trip to Florida.

The baseball team, under the leadership of fifth-year coach John Kolasinski, headed to Tampa while second-year coach Shannon Whiting led the softball team to Fort Pierce.

After a trip to the first round of the NAIA District 5 tournament last year, the softball team is ranked fourth in the NAIA's Division II. Whiting hopes to improve on the team's 13-5 record last year.

Kolasinski also hopes to build on past successes. The team has made the district playoffs the past three years and finished fourth in the district last year.

Global Husson: From Rio To Tokyo To Mogadishu

The Husson family extends far beyond the boundaries of Broadway and encompasses alumni from the graduate, undergraduate and ICLS programs all around the world. Although the distance may be far, the closeness of family remains, as illustrated by the invitation Alumni Director Paul Husson received this year. At this writing, Paul is in Japan attending the wedding of Futoshi Hashigami, MSB, '90, and Mika Kunioku, ICLS and Husson. Paul also was invited to speak at the wedding, an honor to him and to the wedding couple.

While in Japan, he will work to widen the Husson family when he meets with officials from Bunzai Gakuen, a Japanese college with which Husson has an articulation agreement, and several other agencies and schools. He also will meet with Husson alumni in Japan during a planned reunion.

Paul also will fly to Korea where he will work with alumnus Kim Kyung-Young, MSB '89, to spread the word about Husson College in that country.

"International students make a significant contribution to Husson College," he said. "It is important that our students have the opportunity to know people from other cultures and to share ideas with them, particularly in a world where international business and trade is playing an increasingly important role."

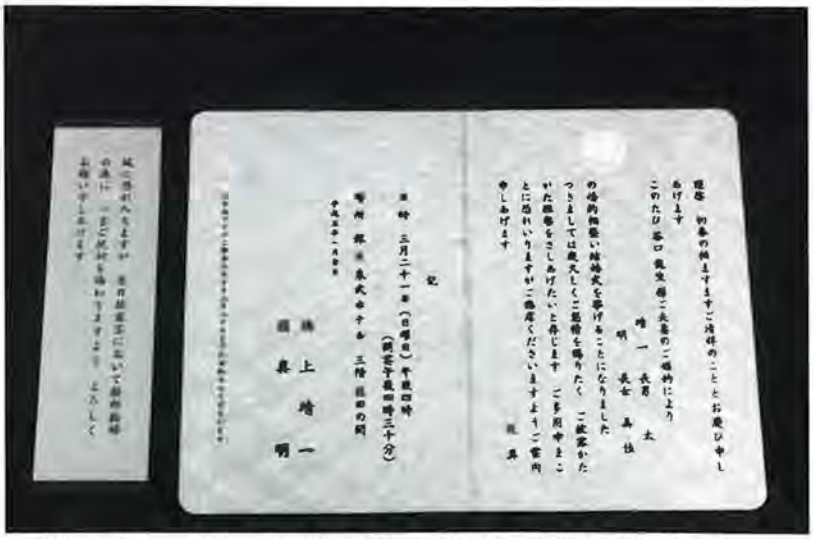

Paul met several alumni during his trip last fall to South and Central America. While in Venezuela, he visited with Arturo Perez '84 and his wife, Sylvia. Arturo is now an account executive for Aviprete, an ad agency and also a partner in a maintenance firm.

Husson alumni play an important role internationally as well. One example is Earl Goodyear '69, Hon. D., 1992. Earl is now in Somalia, where he and his family lived from 1982-86, heading up a rehabilitation effort for CARE. He wrote in February about what he saw there.

"My return to Somalia in September has provided a vivid example of what can occur when the social fabric of society comes unraveled. I don't think my memory will ever erase the events seen in Mogadishu prior to the arrival of the combined military forces in December. The tranquility of our former home...was replaced with the staccato of gunfire at all hours of the day and night. The lovely white plaster buildings in the capital now carry the graphic remnants of heavy shelling and rampant looting which followed the downfall of its former dictator. It was very hard for me to comprehend that man could degenerate to the state seen in Mogadishu. Thanks to the world media, the call for humanitarian assistance was answered."

He said relief agencies like CARE are now able to deliver foods, medicines, grain and vegetable seeds that will help to rebuild the agricultural sector of the Somali economy. CARE is now working to develop a traditional food importation network which, in addition to making food available, helps to create employment for the urban and rural populations.

Paul Husson's invitation to the wedding of Futoshi Hashigami '90 and Mika Kunioku, ICLS.

Working with Somali colleagues, Earl's specific job in Somalia during the next six months, will be to develop a multi-million dollar recovery plan in the areas of agriculture/livestock, health and water, and institution rehabilitation for CARE. While workers are hopeful, he said it will take "...probably years to heal the scars of war."

In his letter, Earl also stressed the importance of Husson's strong emphasis on an international student body. "I firmly believe that (Husson's) international students play a vital role in creating an awareness of world issues and cultures which make us better world citizens," he said. 'And, the direction Husson is pursuing to offer a quality academic environment to a multi-national student body is a step towards a world at peace."

Maria Helena Moreno Quintero, an ICLS alumnus, was Paul's alumni contact in Columbia and helped to work with various groups of prospective students.

Many of Husson's international alumni also keep in close contact with the College after they return to their own countries, and actively support the institution in many ways. During his trip to Central and South America in November, Paul had the assistance of a number of alumni in the nine countries he visited.

In Colombia, Maria Helena Moreno Quintero, ICLS, was on hand to help in making presentations to prospective students. Maria is now an advertising executive in her native Colombia.

In Venezuela, Arturo Perez, '84, and Denise Armelini, ICLS, assisted in appointments and presentations. Arturo is now an account executive with Aviprete, one of Venezuela's largest ad agencies and also is a partner in a maintenance company. Denise is in her first year of medical school.

In Sao Paulo, Brazil, Ben Brandao '73, KΔΦ and Luiz "Big Luiz the Cribbage King" Galvao, '90, provided companionship for Paul and a helping hand with his recruiting duties. Ben is the business manager for the Hydroar Company and Luiz is an investment analyst with the Banco de Investimiento SA. A planned cribbage rematch between Galvao and Husson was cancelled due to "humidity" and because "somebody misplaced the cribbage board."

Paul's most unusual reunion with an alumnus took place in the aisle of an airplane in Guatemala City, Guatemala. Paul's plane had been rerouted there on the way to Costa Rica.

"When we landed, they wouldn't let us off the plane, but I talked to one of the airport police and asked about one of our alumni who, I knew, worked for American airlines there. He agreed to take a note to her, but it was Sunday and I really didn't expect them to find her. But in just a few minutes, he brought her onto the plane to see me. It's not very often that they let anyone come onto an international flight like that."

Paul said he and Nora Arrias Torres, who attended Husson in 1989-90 as part of a U.S.-sponsored exchange program, had a short but pleasant visit in the aisle of his plane.

"That's kind of a bizarre way to meet an alumnus," he said.

Luiz "Big Luiz the Cribbage King" Galvao '90 (center), and Ben Brandao '73 were on hand in Sao Paulo, Brazil to help Paul with his recruiting efforts.

Does A Gift of Real Estate Make Sense?

Many people own real estate which saw tremendous appreciation during the 80's. With less growth in this market projected for the immediate future, however, owners are looking with new concern at their increased property tax and the on-going liability insurance cost of this investment. Selling and reinvesting in other assets becomes a consideration. Those nearing retirement may also be looking to switch the investment into one which is income producing.

Let's assume you own property purchased years ago for $20,000 which now has a fair market value (qualified appraisal) of $100,000. You face a capital gain of $80,000 which translates into a tax (28%) of 22,400. If you sell you'll only net $77,600.

Let's also assume you want to make a gift to Husson of $25,000 from the proceeds of the land sale. Fortunately a gift tax deduction (31%) of $7,750 can be added back so that you would wind up with $60,350 after your $25,000 gift to Husson.

There is another way, however, which would permit you to double your figure to $50,000 and wind up with only $6,050 less in your pocket. You could give Husson 1/2 interest in the property and realize a charitable deduction of $50,000 for an immediate tax savings (31%) of $15,000. Later you and Husson could jointly sell the property and your share of the proceeds would be $50,000.

You would then have $65,000 and only 1/2 of the capital gains liability (28%), which would amount to $11,200. This would leave you with $54,300.

Especially attractive to those at or near retirement, is to transfer property into a charitable remainder unitrust. A trustee, usually a bank, sells the property and places all proceeds in an irrevocable trust which will pay you (and your spouse) a guaranteed fixed rate of return as long as you (and your spouse) live. The remaining asset is paid to Husson upon your (and your spouse's) death.

There are several advantages to this option. 1) You avoid all capital gains, 2) you receive an immediate gift tax deduction, 3) you remove a $100,000 asset from your estate thereby saving estate taxes, 4) you no longer have to pay property taxes or liability insurance on the property and 5) you turn a non-income producing asset into a guaranteed annual income investment for life.

Those concerned about providing for heirs and who do not wish to lose a $100,000 asset upon their death may decide to replace it with a $100,000 insurance policy naming their heirs as beneficiaries. The insurance avoids probate and is paid quickly and directly to heirs without fuss. They wind up with their share of the full value of the insurance instead of their share of the property's sale which has probate costs and taxes deducted first.

A $100,000 asset replacement insurance policy can be purchased with the savings in capital gains or the gift tax deduction after the charitable remainder unitrust is established.

When establishing the unitrust, the donor may stipulate any restrictions on the use of the funds when they are transferred to the College. Possibilities include establishing a "named" scholarship or a special endowed fund.

ILLUSTRATION:

Donor gives $100,000 property (qualified appraisal) with a $20,000 cost basis	*establishes $100,000 irrevocable charitable remainder unitrust*
Donor avoids $80,000 capital gains (28%) on anticipated property sale	*$22,400 savings*
Donor receives immediate charitable tax deduction	*amount depends on age and % of annual return from new unitrust*
Donor receives 6% (illustration) for life (and spouses). If value of trust goes up or down so does income (e.g. $90,000 value would pay out $5,400 at 6%).	*$6,000/yr. on $100,000 value (illustration)*
Donor may choose to replace asset with $100,000 insurance policy naming heirs as beneficiary - avoiding delayed payment and the cost and taxes of probate.	*$100,000 remains available to heirs*
Husson receives remainder of trust upon death of donor (and spouse)	*$100,000?, probably more to Husson*

Dell Renaud Scholarship

The Delores R.C. Renaud Memorial Scholarship remembers a long-time friend and member of the Husson College community who died last fall.

Dell had been associated with the College on a number of levels. She attended Husson while she served in the U.S. Navy and received a B.S. in Business Education (Magna Cum Laude) in 1962. After graduation, she joined the faculty of Husson College and served as a teacher and administrator for 24 years. When she retired in 1986, she held the title of Tenured Full Professor and Head of the Business Teacher Education Program at the College.

Dell kept in close touch with the College after her retirement, and in 1992, in recognition of her leadership at the College and "...the esteem in which she is held by alumni, faculty, administrators, staff and trustees...," the Board of Trustees conferred upon her the rank of Professor Emerita.

Gifts to the scholarship, which will aid a student in the Business Teacher Education program, can be sent to the College in care of the Development Office.

Letter from the Editor

Shortly after Coach MacGregor's 500th win members of the Husson community began exploring ways to honor him for the momentous achievement. According to Kenneth Vogt, Vice President for Institutional Advancement, a scholarship fund has been established as an appropriate means of honoring Coach MacGregor's "outstanding athletic leadership at the College."

The MacGregor scholarship will aid a deserving male athlete who is a full-time student and/or a member of the men's basketball team.

All donations to the scholarship fund will be invested in perpetuity by the College with only 80% of the earnings on the principal awarded annually. Anyone wishing to donate specifically to this new scholarship may contact the Development Office at Husson.

The establishment of a scholarship sets up a win-win situation that will live on at Husson--a most appropriate and deserving honor for Coach MacGregor.

Hall of Fame Room

With the work that was done last fall, the Sports Hall of Fame Room, which will honor Husson athletes from the past and the future, is now about 70 percent complete, according to Alumni Director Paul Husson.

For Homecoming '92, work crews had installed all the lighting and laid the carpeting in the room while masons built a classic brick fireplace. Husson said they still need to install the trophy case and purchase the furnishings for the room. These projects will cost between $7,000 and $8,000.

Contributions to help cover those costs can be sent to the College in care of the Development Office.

In Memoriam

Clara Hurd '27 died in Bangor on April 16, 1993. Clara was employed by Lyford and Woodward Furriers of Bangor before her retirement in 1971.

She is survived by her brother, Lawrence, and several nieces and nephews.

Edward Ames '34 died October 14, 1992 in Brewer. He was an accountant and salesman for Charles Hayward and Co. for 14 years before forming his own business in 1947 in real estate and insurance, known as Ames Real Estate and Insurance. He retired in 1987.

Edward was active in his community as well as professionally. He was an instructor in the continuing education program at the University of Maine, teaching real estate brokerage and appraising. He was executive secretary of the Brewer Chamber of Commerce for 14 years, and former chairman of the Brewer School Committee. He served as a vice president of the State Junior Chamber of Commerce. He was a member of the Brewer Kiwanis, Toastmasters International, Anah Temple Shrine, the Boy Scouts and many professional organizations.

He is survived by his sons, Alan and Brian '84 MSB, daughter, Mary and five grandchildren.

Charles "Bernie" Jenkins '36 died December 8, 1992 in Bangor. He was a U.S. Army Veteran of World War II. Bernie played in The Eastern Maine Baseball League, and remained an avid baseball fan throughout his lifetime. He also enjoyed the outdoors. He was employed by the Federal Prison System.

He is survived by his wife Helen, son Charles, daughter Margaret, stepsons Tim and Jack Furrow, stepdaughter Sally Furrow, a brother and sister, and six grandchildren.

Constance Welch Manship '43 died March 2, 1993 in Portland. Constance worked as an accountant for Metropolitan Life prior to her marriage in 1952 to Joseph Manship. She was active in her church.

She is survived by her daughter, Therese Gardiner, son, Robert Manship, and four grandchildren.

Charlotte Wescott MacLeod '47 EMGH (EMMC) died October 23, 1992. She was a resident of Bar Harbor. Charlotte worked as a registered nurse at Mt. Desert Island Hospital from 1947 until her retirement in 1987.

She was active in her church and was a member of the MDI hospital auxiliary. Charlotte also enjoyed golfing and was a member of the Kebo Valley Golf Club.

She is survived by her husband, Donald, two daughters, Donna and Martha, son, Donald III, and many other close relatives.

Robert Steeves '47 of Hartland died October 6, 1992 in Bangor. Robert served in the U. S. Army in World War II. He was employed at Irving Tanning Company from 1952 until his retirement in 1987. He was a member of the Masons.

He is survived by two aunts and several cousins.

Gerald R. "Jake" Goss '56 ΜΣΧ died December 6, 1992 in Millinocket. Jake was head of the business department at Stearns High School where he had taught for 32 years. He also served as athletic director for 11 years.

He was a member of the Elks and the Masons and served in leadership roles in those organizations. Jake also was a member of several professional organizations

He is survived by his wife Rowene, son Jerry, brother Paul '59 MEX, his mother-in-law and father-in-law and several nieces and nephews.

Charlene Locke '64 EMGH (EMMC) died November 12, 1992 in Bangor. Charlene was a member of the Brewer Music Association.

She is survived by her husband, Gary, daughter, Erin Kate Locke, her mother and step-father, several half brothers and sisters and many other close relatives.

Thomas Wright '70 died October 19, 1992 at his home in Pawcatuck, Connecticut. He was an account representative for the Kellogg Corporation for 20 years.

Tom is survived by two sisters.

Beth Parkhurst Hutchins RN '82 EMMC, MSB '91 died April 13, 1993 in Bangor. Beth was a resident of Brewer. Beth was employed at Eastern Maine Medical Center in many different positions, with the last being Department Head Nurse of the Respiratory Unit Grant 6-West.

She is survived by her husband, Michael, two sons, Jon and Joseph, daughter, Jennifer, two sisters, Kim Oliver and Judy Parkhurst '91.

Bruce Robert Butterwick '87 died August 3, 1992 in Steuben of complications from AIDS. He worked for Continental Airlines in Pennsylvania. He was active in speaking about his illness to school and community groups.

He is survived by his father, Robert, and stepmother, Janet, his mother and stepfather, Elizabeth and Edward Denniston, brother, Charles, and sister, Rolyn, two stepbrothers and a stepsister.

William W. Cook, Ph.D., former administrator and teacher at Husson College, died February 6, 1993 at Togus Veterans Hospital. Bill was a resident of Owls Head.

He was a graduate of the University of Maine and received his law degree from the University of South Carolina. Bill served in the U.S. Marine Corps in Vietnam and was awarded the Bronze Star with a Palm.

He was a scholar and authored two academic publications and several magazine articles. He worked closely with former Husson Professor Louise B. Miller in co-authoring *Husson College: A History 1898-1983*. Bill later served as Director of Development and taught courses in business and communications law.

He is survived by his wife Florence, son Scott, daughter in law Pamela and his mother Margaret Ostron.

Dorothea Stevens Gilman, EMGH (EMMC) died November 7, 1992 in Ellsworth. She owned the Manor Inn in Sullivan for several years. She worked for some time as a registered nurse at Togus VA hospital.

Dorothea is survived by her husband, James, and several sons, Steven, Clifton, Theodore, John, Paul, Robert and Richard, and two daughters, Sarah and Susan, a brother and sister and 11 grandchildren.

Vesta Marie Parsons, Ph.D., former Husson faculty, died February 28. Dr. Parsons served on the Husson Faculty from 1965 to 1975. She chaired the English Department.

She had also taught English at Sea Cliff, Long Island High School, Bloomfield, New Jersey High School, Farleigh Dickinson University and Bates College.

Dr. Parsons was the recipient of many academic honors, authored several scholarly publications, and lead numerous professional societies during her distinguished career. While at Husson College she was contributing editor of *The Husson Review*, Academic Dean's Award recipient, and Outstanding Educator Husson College 1973-74.

She was active in her community and church. Dr. Parsons traveled extensively in Europe and throughout the world.

She is survived by her brother-in-law, Dudley Carter, and several nieces and nephews.

ALUMNI Profile

Dale W. Mower '82 has been elected as President of the Bangor-Waterville Chapter of the Institute of Management Accountants.

Mower is the financial manager and treasurer of ISU/ Fenderson Insurance, an independent insurance agency where he has been employed for six years. He also serves as treasurer of RE/MAX Realty Associates, an affiliated company.

He holds a B.S. in Accounting from Husson College, obtained his CPA in 1984, and most recently earned the CMA designation in 1992.

Dale and his wife, Patti, live in Bangor with their three children: Meaghan, Derek and Melissa.

Dale Mower '82, CMA

1950's

Betty McMillan '52 has been promoted to general accounting assistant in the Pulp and Bleached Board Division of Georgia-Pacific Corporation in Woodland.

Lorraine Smith Fitzpatrick '57 ETE writes that she is currently a student at the University of Maine College of Education. "I have always wanted to finish my education and become a teacher. After working as a Special Education Aide for 6 years, my dreams have become a reality."

Lorraine and Martin have two daughters and a son, and three "beautiful" grandsons ages 7, 9 and 12. The Fitzpatricks live in Brownville Junction.

Richard Dyke '58 ΜΣΧ was quoted extensively in the August 9, 1992, Sunday edition of *The New York Times*. The article by Peter Kerr dealt with the problem of Worker's Compensation.

1960's

Ed Youngblood '61 ΚΔΦ has been elected 2nd Vice President of the Greater Bangor Chamber of Commerce. Ed is Senior Vice President for the Retail Division at Bangor Savings Bank.

Joe Cyr '62 has been elected to the Board of Directors of Bangor 2000. Joe is a member of the Husson College Board of Trustees and is the president of John T. Cyr and Sons.

James Richardson '63 is Merchandise Manager - soft lines for Ann & Hope (Discount Department Stores) in Warwick, Rhode Island.

James and his wife, Charlotte, reside in Warwick with their son, Kevin, who is a student at Rhode Island Community College.

Ralph White '63 was in to visit recently. Ralph is retiring from a career with IBM. He and his family reside in Wappingers Falls, New York.

Dale Paine '64 has joined the sales staff at Kelley Pontiac-Mazda in Bangor.

Dale and his family reside in Eddington

Herb Hopkins '65 ΚΔΦ has been elected Secretary of the Brewer Kiwanis Club.

Thomas Hindle '67 owns and operates Thom Hindle Photography, a studio and gallery at 35 Atkinson Street in Dover, New Hampshire.

Thom also teaches photography at UNH offering beginning and advanced photography workshops. He is very involved in collecting old photographs and antique cameras.

Thom and his wife, Mira, reside in Dover, New Hampshire.

Larry Panzica '67 is living in San Mateo, California. He says "hello" to Professor Bill Curran.

Larry is a loan broker.

Bob Cox '67 is department chairman in Business Ed. at Mountain Pointe High School in Phoenix, AZ. After graduating from Husson, Bob earned his Masters in Secondary Education.

Bob has been in Phoenix for 16 years. He has taught many business courses and has been active in coaching tennis and soccer. Bob was honored by being selected teacher of the year at his previous high school, Corona del Sol.

Bob and his wife, Peggy, have two children, Jennifer Jean, a junior at Arizona State and Bryan, a junior in high school. He enjoys jogging, tennis, golf, biking, and is active in his church.

Della Smith Gleason '68 ΔΣΔ was featured in a story in the *Bangor Daily News* recently. Della is a Technical Sergeant in the Maine Air National Guard and her husband, Michael, is a Master Sergeant. Their daughter, Amanda, enlisted and the ceremony was truly a "family affair". Her uncles Master Sgt. Darrell Smith and Tech. Sgt. Deane Smith, watched on as another uncle, retired Lt. Col. David Smith, administered the oath of office.

Julie Anderson Chickering '69 has joined the Knox County Federal Credit Union as Vice President.

Julie resides in Rockland.

1970's

Dr. Douglas C. Smith '72, MSB '82, ΦΘΠ, was named the 1992-1993 Outstanding Business Teacher for the Commonwealth of Kentucky. Doug, Assistant Professor of Business at the University of Kentucky, received the award at the annual fall meeting of the Kentucky Business Education Association. Doug and his wife Jean **(Gloria Jean Bowden) '72** ETE reside in Versailles, Kentucky.

Edward Fitzpatrick '73 and Pamela Dunning were married in January 1992. Fitz and Pamela have purchased an old farm house in Ft. Plain, New York, which they are renovating. It will have 17 rooms when completed. He says since he now has four stepchildren, he will need the extra space to "accommodate his growing family!"

Glen Hockley '75 TKE is vice president of the David Peet Company, Division of Oakhill Sportswear, a ladies' shirt manufacturing company in New York City. An announcement of Glen's position appeared in *The TEKE*, the national publication of Tau Kappa Epsilon fraternity.

Philip Harriman C.L.U. '77 TKE has been elected to the Maine State Senate on the Republican ticket.

Donald MacLeod '78 is operations manager for the commercial lubricant division of R.H. Foster, Inc. in Hampden. Donald was formerly with the Sawyer Group of companies.

Joe Mesi '79 and his wife, **Sally Bourget Mesi '79**, have returned home to Angola, New York. Joe has accepted a teaching position at Eden High School which is the next town over from Angola.

Joe had coached basketball and taught at Deer Isle-Stonington High school for 13 years.

He says that he looks forward to being back home close to his family.

1980's

Gary Brewster '81 was guest football forecaster for the *Bangor Daily News* Football Forecast recently.

Gary resides in Hampden.

Dale Mower '82 CMA has become a Certified Management Accountant. He successfully completed a comprehensive examination on accounting and related subjects and satisfied the required two years of management accounting experience.

Dale is Financial Manager at ISU Fenderson Insurance in Bangor.

David Doucette '83, '90 has been elected to the Board of Directors of Bangor 2000. David is the manager of the Holiday Inn on the Odlin Road in Bangor.

Scott Stacey '83 ΚΔΦ and Joan Kennedy were married November 7 in Bangor. Scott is employed by Commercial Union Insurance, Co. of Bangor. Joan is a recording artist with MCA records.

Michael Ikeagwuani '83 writes that he chairs the Department of Secretarial Studies at Akanuibiam Federal Polytechnic in Abia State, Nigeria. He keeps in touch with **Sylvester Ajayi '83** and **Johnson Bello '82**, who are also administrators in the Polytechnics of other provinces; Johnson in Plateau State and Sylvester in the North.

Julie Caswell '84 CPA has been elected to serve on the Board of Directors of the Greater Bangor Chamber of Commerce. Julie is a manager at Laeger, Ade and Assoc. She was also recently appointed to serve a three-year term on the Eastern Maine Development Corporation's Finance Committee.

Kenneth Jarvis '85, CPA, has joined the Bangor accounting firm of Tate-Fitch.

Mona Davis '86 is with Bangor Hydro. She was back on campus recently as a volunteer for the United Way of Penobscot Valley. She addressed the October meeting of the Faculty Forum on the importance of supporting this year's campaign.

Norman Weaver Hunt '87 is working as a secretary in the X-ray Department of Pen Bay Medical Center in Rockport. She writes, "the scenery is beautiful looking over the bay from the Center."

Susan McBreairty '87 '92 and Joey Edwards were married September 19 in Island Falls. Susan is employed by Maine Public Service in Island Falls. Joey is employed by Birch Point, Inc.

The couple reside in Island Falls.

Tyler Townsend '87 has been named UD Trucks District Manager of the Year 1991-92 for Nissan Diesel of America. His territory includes Northern California, Northern Nevada, Utah, Colorado, Oregon, Washington, Idaho, Montana and Wyoming. His wife, **Holly Noyes Townsend '87**, graduated June 1992 with a Master's in Pediatric Nurse Practice from the University of California in San Francisco.

Tyler and Holly reside in Pleasanton, California.

Susan Morin '88 and Danny Dishon were married August 15th in East Millinocket. Susan is employed by Northern Penobscot Orthopedics and Danny is employed by ERA Security Realty.

The couple reside in East Millinocket.

Marsha Curran Marley '88 has been elected to the Board of Directors of Bangor 2000. Marsha is with New England Telephone.

CORRECTION

Scot Champlin '88. In the last edition of *The Ledger* Class Notes, Scot was erroneously listed as attending the Thunderbird Institute in Arizona for his M.B.A. In fact he graduated in December, 1992, from Bentley College, Boston, MA, with his master's degree in International Business. Additionally, he was recently promoted to Senior Underwriter at UNUM Life Insurance Co., in Portland, ME, and is engaged to Brenda Levesque, a UMO graduate, who is also employed by UNUM Life Insurance Co.

Kyung Young Kim '89 MSB is manager of Coal Section 1 for Ssangyong Corporation in Seoul, Korea.

Renee Bishop '89 CPA has been promoted to the position of Senior Accountant at Laeger, Ade and Associates. Renee also serves on the Board of Directors of the Good Samaritan Agency and as Chairperson of the Hermon, Carmel and Levant Youth Soccer Club.

Laurel Nielsen '89 and Paul Stewart, Jr. were married September 12 in Spring Cove on Cushing's Island, Maine. Laurel is a nurse at Mid-Maine Medical Center. Paul is employed by Resource Conservation Services, Inc.

The couple reside in Knox.

Tammy Tardiff '89 ETE is now located in San Jose, California. She is employed as Office Manager of AXIC.

1990's

Kimberly Merriam '90 and **James Campbell '90** are engaged. Kimberly is employed by Beal College. James is with Foster, Carpenter, Black and Co. of Bangor. The couple plan a May wedding.

Michael Topolosky '90 stopped in to visit recently. Mike is a Chief Master Sergeant in the USAF stationed in Bitburg, Germany.

Michael and his wife have been there for two years, and have done a lot of traveling throughout Europe.

Kenneth Hines '90 and Jennifer Thompson were married July 11 in Brewer. Kenneth is a special agent with the criminal investigation division of the Internal Revenue Service in Santa Ana, California.

Kenneth and Jennifer reside in Laguna Niguel, California.

Jennifer Grindal '91 and David Mott were married November 14 in Orrington. Jennifer is employed by Fleet Mortgage Corporation in Bangor. David is employed by Georgia Pacific. Jennifer and David reside at Beech Hill Pond in Otis.

Jill MacGregor '92 ΔΣΔ and Todd St. Peter were married January 2 in Bangor. Jill is employed by G.H. Bass and Co. in Bangor. Todd is employed by the University of Maine, Orono. Jill and Todd reside in Bangor.

Susan Coty '91 and Mark Beaulieu were married July 11 in Fort Kent. Susan is employed by Coty's Hardware in Ashland. Mark is with J. P. Levesque and Sons.

Susan and Mark reside in Ashland.

Patricia Zambrano Ellis '91 has joined Loiselle and Beatham CPA's of Bangor.

Patricia resides in St. Albans.

Gary K. Leighton '91 has been appointed manager of Casco Northern Bank's company office in Brewer.

Linda Van Loan '91 and James Kelly were married June 6 in Bangor. Linda is with the First National Bank of Damariscotta. James is employed by Washburn and Doughty in East Boothbay.

Linda and James reside in Boothbay Harbor.

Amy White '91 ETE and George Littlefield were married September 12 in Hampden. Amy is employed by Sam's Club in Bangor. George works at Cianbro Corporation.

Amy and George reside in Bangor.

Robert Kelly '92 has been named to the John Bapst High School Board of Trustees. Bob is the controller of Down East Toyota Buick of Brewer. He and his family reside in Veazie.

Wanda Thayer '92 has joined Thoracic Associates of Bangor as a medical assistant.

Elsie E. Wayne was raised in Saint John, New Brunswick, and in 1983 became that city's first woman mayor, a position she has held through four elections. Mayor Wayne has been a leading force in the Bangor-Saint John Sister City Partnership and in 1992 was one of four Canadians invited by the German Government to study German reunification. She currently sits on the Board of Governors of the University of New Brunswick and on numerous city, provincial and federal committees.

She also has chaired area fund raising campaigns and has received diverse honors, including Canada's Literacy Volunteer Award, Transportation Person of the Year Award, and an Honorary Doctorate from St. Thomas University. In 1992, the Prime Minister of Canada appointed Mayor Wayne to the Citizens Forum on Canada's Future. Last year she received the Canada 125 Commemorative Medal from the Prime Minister for her contribution to making her community, province and country a better place to live.

Senator Mitchell has represented the state of Maine in the U.S. Senate since 1979 when he was appointed to complete the term of Senator Edmund Muskie who had resigned to become Secretary of State. In 1988, he was elected to his second full term with 81 percent of the votes, the highest percentage ever received by a candidate in a state-wide election in Maine history. Mitchell is no stranger to Husson College as he received an honorary doctorate from the college in 1985.

Student Employee of the Year

Amy Gaff, a junior from Bucksport, was named Husson's Student Employee of the Year for 1993.

A Business major, Amy has worked in the Admissions Office since she arrived at Husson. Jane Goodwin, the director of admissions, nominated Amy for the award noting that she was an "exceptional worker."

"She's become our right hand down here," Goodwin said. "she works well on her own and she's never idle. She's the kind of employee you'd like to have working in the office full-time."

Amy was honored along with other nominees during a Student Employee Luncheon in April. She received a certificate and a $50 Savings Bond and was a candidate for the Maine Student Employee of the Year Award.

The Student Employee of the Year Award was developed by the North East Association of Student Employment Administrators as a way of celebrating all student employees.

Teacher of the Year

Husson students have elected Dr. Kathleen Wall, a professor and chair of the Division of Arts and Sciences, the Husson College Teacher of the Year for 1993.

Dr. Wall joined the Husson faculty in 1981 and, in addition to being division chair, she currently teaches Anatomy and Physiology, Pathophysiology, and Research. She said the honor was special because it came from the people she was trying to serve.

"It's a wonderful feeling. I work hard to give these students a good education. When it comes back to you it means so much. It makes the hard work worthwhile. You know you're getting through to them and helping them to achieve their goals."
